Revision History

Version	Date	Author	Summary of changes
1.0	31-Oct-2026	Jojo George	Initial version of the Dashboard sub-module BRD (Administrator, Manager and Employee dashboards), written from the original BRD Screens 2–4 and TaskFlow as built
1.0	31-Oct-2026	Jojo George	Approved and signed off; baselined as the agreed business requirements.
1.0	31-Oct-2026	Jojo George	Editorial only: Related Documents paths updated to the `TF - Documents` folder layout; no requirement changed, sign-off unchanged.

Approvals / Sign-off

1. Project Overview

1.1 Introduction

The Dashboard is the first screen a user sees after signing in to TaskFlow. It shows a summary of task work at the level the user may see: the whole organisation for an Administrator, the manager's own team for a Manager, and only the user's own tasks for an Employee. Every chart part can be clicked to open the matching tasks in the Task List, so each figure can be checked.

1.2 Business Problem / Current Situation

Without a dashboard, people must open the Task List and count tasks by hand to know how much work is pending, in progress, completed or overdue. Managers cannot quickly see who is overloaded

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

or which projects are slipping, and employees can miss deadlines that are close. Figures counted by hand on different screens often disagree.

1.3 Project Objectives

ID	Objective	Success measure	Supports overall objective
OBJ-DASH-01	Send every user to the dashboard that matches their role and permissions	100 % of sign-ins and **Dashboard** menu clicks open the correct dashboard; a user is never shown a dashboard above their level	Monitor task progress
OBJ-DASH-02	Show the state of work at a glance	Total, completed, in-progress, pending, overdue and completion % are visible on the first screen without opening the Task List	Monitor task progress; Identify pending and overdue tasks
OBJ-DASH-03	Help administrators and managers find delayed work and overloaded people	The 5 most overdue team tasks, the 5 projects needing attention and the "High workload" / "Overdue" flags are shown without any search	Identify pending and overdue tasks
OBJ-DASH-04	Help employees act on close deadlines	Up to 10 open tasks that are overdue or due in the next 7 days are listed, soonest first	Reduce missed deadlines
OBJ-DASH-05	Make every figure checkable and consistent	Clicking any chart part opens exactly the tasks it counts in the Task List	Identify pending and overdue tasks; Reports for work planning
OBJ-DASH-06	Keep each person's data private to the right audience	An Employee never sees a colleague's name or task; a Manager never sees figures outside the team	Monitor task progress

1.4 Expected Benefits

- **Organisation:** one consistent view of workload by department, manager, employee and project.
- **Administrators:** compare departments, managers, employees and projects over any date range.
- **Managers:** spot overloaded team members and delayed work early, and open the tasks directly.
- **Employees:** see their own deadlines, progress and project share, while colleagues' workloads stay private.

---

2. Stakeholders & User Roles

2.1 Stakeholders

Stakeholder	Interest / responsibility
Project owner (Jojo George)	Defines priorities and approves this BRD
Administrators	Monitor the whole organisation; grant dashboard permissions in Role Configuration
Managers	Monitor their team's work and deadlines

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Stakeholder	Interest / responsibility
Employees	Follow their own tasks and deadlines

2.2 User Roles

Role	Description	Main responsibilities on the Dashboard	Access level
Administrator	Runs the system and its settings	Reviews organisation-wide figures; may also open the Manager Dashboard	Organisation
Manager	Leads one or more departments or projects	Reviews team figures, delayed work and team workload	Team
Employee	Works on assigned tasks	Reviews own tasks, deadlines, performance and department totals	Own records only
Custom Role	Role created by an Administrator	Uses the dashboard level its permissions allow	Organisation if it holds `dashboard.view.organization`, Team if it holds `dashboard.view.team`, otherwise Own

Dashboard permissions (default grants)

Permission	Meaning	Administrator	Manager	Employee	Custom Role
`dashboard.view.own`	View my dashboard	Always On	Always On	Always On	Always On
`dashboard.view.team`	View team dashboard	Granted	Granted	Not granted	Configurable
`dashboard.view.organization`	View organisation dashboard	Granted	Not granted	Not granted	Configurable
`dashboard.analytics.view`	View charts and figures	Granted	Granted	Granted	Configurable
`dashboard.filters.use`	Use dashboard filters	Granted	Granted	Granted	Configurable

3. Scope

3.1 In Scope

- One **Dashboard** menu item that opens the right dashboard for each user.
- Administrator Dashboard: organisation summary cards, analytics sections and filter bar.
- Manager Dashboard: team summary cards, team performance summary, team workload with flags, filter bar.
- Employee Dashboard: own summary cards, upcoming deadlines, personal performance, my projects, department overview.
- Drill-down from any chart part to the matching tasks in the Task List.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

3.2 Out of Scope (this release)

- Recent system / task activity feeds on the dashboards – not built; activity is on the Task Details screen.
- Recent notifications on the Employee Dashboard – not built; notifications are in the Notification Center.
- Quick task-creation button on the Manager Dashboard – not built; tasks are created from the Task List.
- Per-card or per-chart permissions for custom roles – only the five dashboard permissions exist.
- Creating or changing any data from the dashboard – the dashboard is read-only.

3.3 Modules Overview

#	Module	Purpose	Screens
1	Dashboard (Overview)	Route each user to their dashboard; summary cards; Manager team summary; Employee deadlines and department overview	Administrator Dashboard, Manager Dashboard, Employee Dashboard
2	Dashboard (Analytics)	Charts, filter bar, period chips and drill-down on the same three screens	(sections of the three dashboards)

3.4 Change from Original BRD

Original BRD (Screens 2–4)	Current requirement
Admin: "Active employees" card	Replaced by **Employees**, **Managers**, **Departments** and **Projects** cards
Admin: "Recent system activity" / recent employee and task activity	Not provided (out of scope, 3.2)
Admin: navigation to Employee and Department Management from the dashboard	Provided by the side menu, not by dashboard links
Admin: "open relevant records from dashboard cards"	Provided by chart drill-down to the Task List
Manager: "Tasks due today" and "Upcoming deadlines" cards	Not on the Manager Dashboard; the dashboard lists the most overdue tasks instead
Manager: recent task activity, quick task creation button	Not provided (out of scope, 3.2)
Manager: filter by employee, priority and status	Filters are date range, date basis, project and employee; priority and status are reached by clicking the donut charts
Employee: "My tasks due today" card	Shown as "Due today" badges in the Upcoming deadlines list
Employee: recent notifications, recently updated tasks, shortcut to update progress	Not provided; each deadline row opens Task Details
Employee Dashboard access "Employee"	Every signed-in user has an Employee Dashboard (`dashboard.view.own` is Always On)
New (not in original)	Analytics charts, filter bar, period chips, team workload flags, department overview with privacy limit, drill-down

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

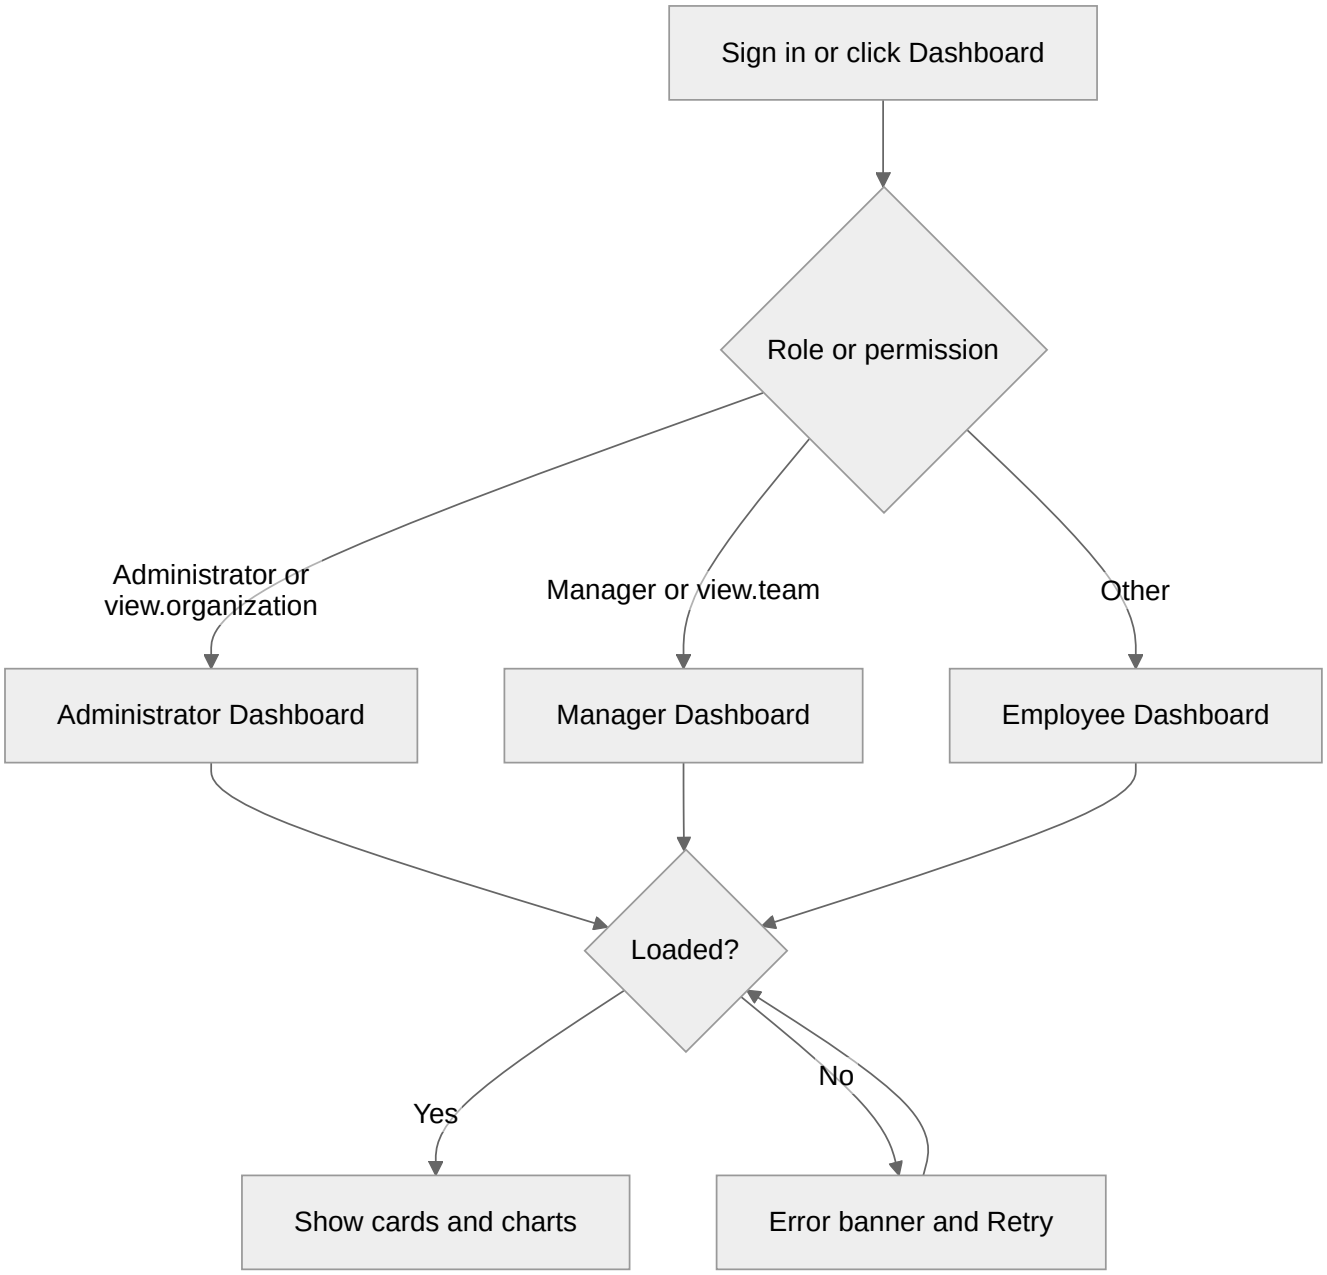

4. Business Process / Workflows

4.1 Open My Dashboard

Trigger: User signs in (after any security setup) or clicks **Dashboard** in the side menu · **Actors:** All users, System

Step	Actor / System	Action	Result
1	User	Signs in or clicks **Dashboard**	Request to open the dashboard
2	System	Decides the dashboard: Administrator → Administrator Dashboard; Manager → Manager Dashboard; other roles → Administrator Dashboard if they hold `dashboard.view.organization`, else Manager Dashboard if they hold `dashboard.view.team`, else Employee Dashboard	Correct dashboard chosen
3	System	If the user typed the address of a dashboard they may not open, sends them to their own dashboard without a message	No unauthorised figures shown
4	System	Shows placeholders, then loads cards and charts	Dashboard shown
5	System	On a load failure shows an error banner with **Retry**	User can reload

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: Meera has a custom role "Team Lead" holding `dashboard.view.team` but not `dashboard.view.organization`. She signs in on 31-Oct-2026 and lands on the Manager Dashboard. She types the Administrator Dashboard address and is taken back to the Manager Dashboard with no message.

Exceptions / alternate flows:

- Network or server error → *"Could not load analytics. Check your connection and try again."* (Administrator / Manager) or *"Could not load your dashboard. Check your connection and try again."* (Employee), with **Retry**.

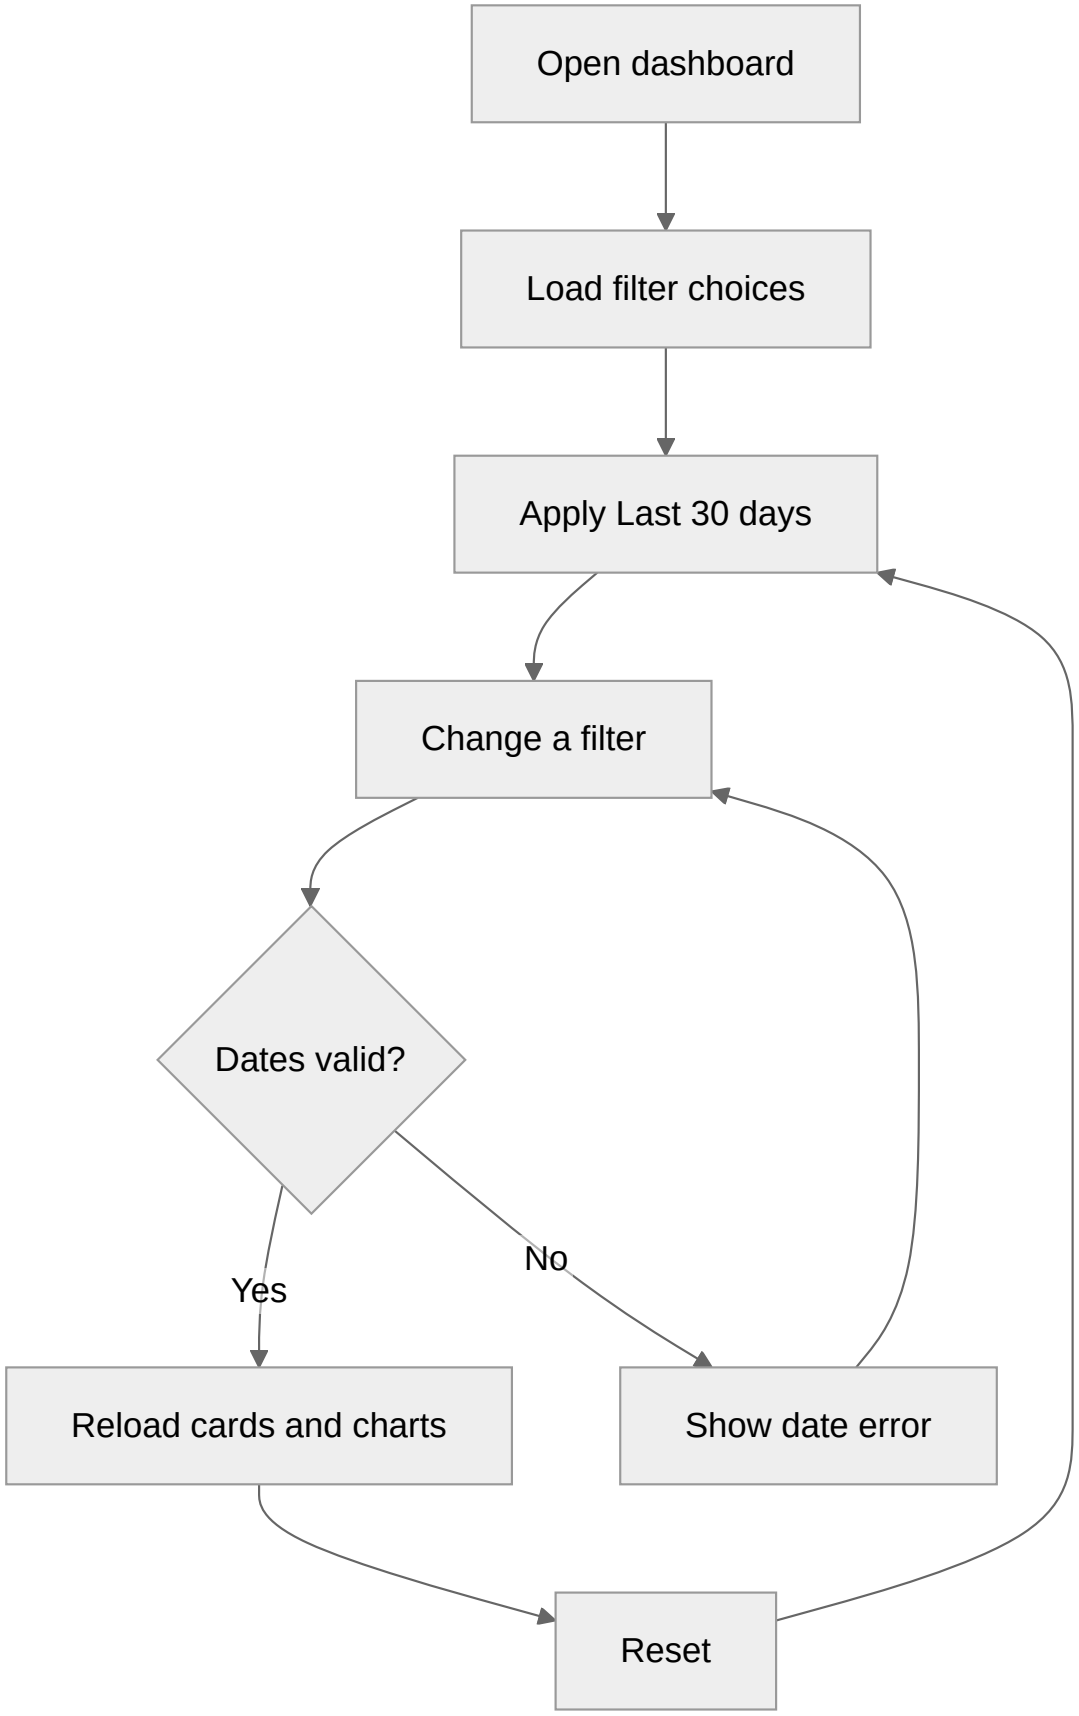

4.2 Filter Dashboard Analytics (Administrator / Manager)

Trigger: User changes a filter on the Administrator or Manager Dashboard · **Actors:** Administrator, Manager, System

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Step	Actor / System	Action	Result
1	System	Loads the filter choices (for a Manager only the team's employees and in-scope projects) and applies Last 30 days by Created date	Default view
2	User	Picks a preset or From / To dates, a date basis, and optionally Department, Project, Manager or Employee	New filter
3	System	Checks the dates on the screen	Error message if invalid
4	System	Reloads every card and chart and updates the subtitle (e.g. "Last 7 days by deadline")	Filtered figures
5	User	Clicks **Reset**	Back to the default filter

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: The Administrator picks **Previous month** (01-Sep-2026 to 30-Sep-2026), Date basis **Deadline** and Department **Engineering**. All ten cards and the charts reload for Engineering tasks whose deadline fell in September.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

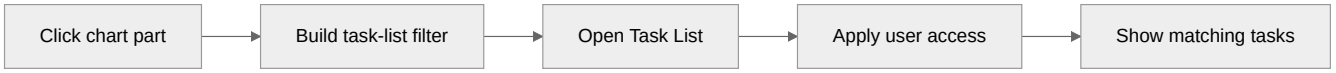

Exceptions / alternate flows:

- A date missing → *"Choose both a start and an end date."*; end before start → *"The end date cannot be before the start date."*; no reload.
- A Manager's filter naming an employee outside the team is refused; the dashboard shows the load-error banner.

4.3 Drill Down from a Chart

Trigger: User clicks a chart part (donut slice, bar segment, deadline bar, trend point, project or manager count) · **Actors:** All users, System

Step	Actor / System	Action	Result
1	User	Clicks a chart part	Drill-down requested
2	System	Opens the Task List with the dashboard filters plus the clicked part (e.g. bucket "Overdue", priority "High")	Task List opens with a drill-down banner
3	System	Limits the list again to the tasks the user may see	Exactly the counted tasks are shown

Example: The "Overdue" slice of the Manager's status donut shows 4. The Manager clicks it and the Task List shows the same 4 team tasks.

Exceptions / alternate flows:

- The user's task access is narrower than the dashboard count → the Task List shows only the tasks the user may open.

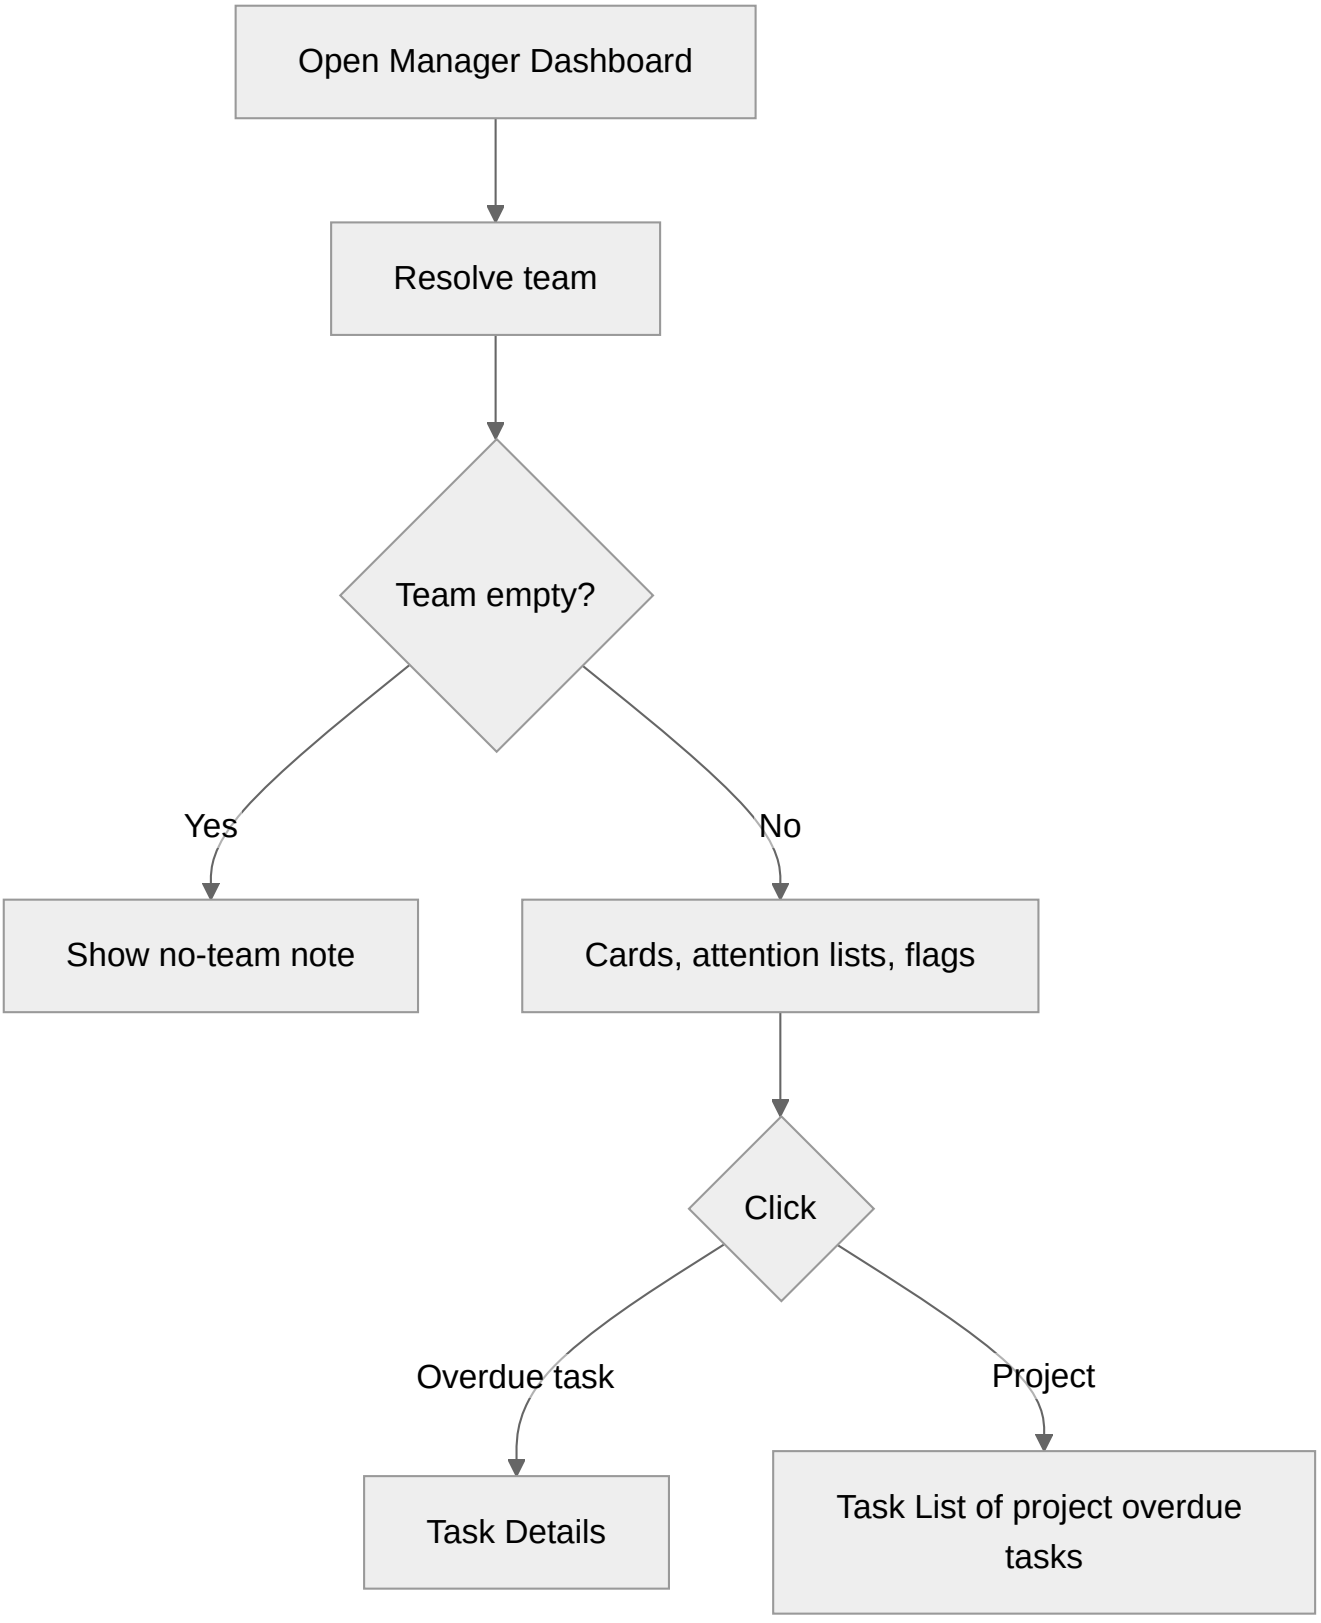

4.4 Review Team Performance (Manager)

Trigger: Manager opens the Manager Dashboard · **Actors:** Manager, System

Step	Actor / System	Action	Result
1	System	Works out the team: active members of the departments the manager runs plus members of projects where the manager is flagged project manager (the manager is not counted)	Team known
2	System	If the team is empty shows the no-team note	Manager knows to ask an Administrator
3	System	Shows team cards, the most overdue tasks with days overdue, and projects needing attention	Delayed work visible
4	System	Flags members with "High workload" or "Overdue" in the workload table	Overloaded people visible

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Step	Actor / System	Action	Result
5	Manager	Clicks an overdue task or a project	Task Details, or Task List with that project's overdue tasks

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: Priya manages a team of 6 with 27 open tasks (average 4.5). Arun has 9 open tasks: 9 ≥ 5 and 9 ≥ 6.75 (1.5 × 4.5), so he is flagged **High workload**. Arun also has 1 task 3 days overdue, so he is flagged **Overdue** and the task appears in "Most overdue tasks" as "3 days overdue".

Exceptions / alternate flows:

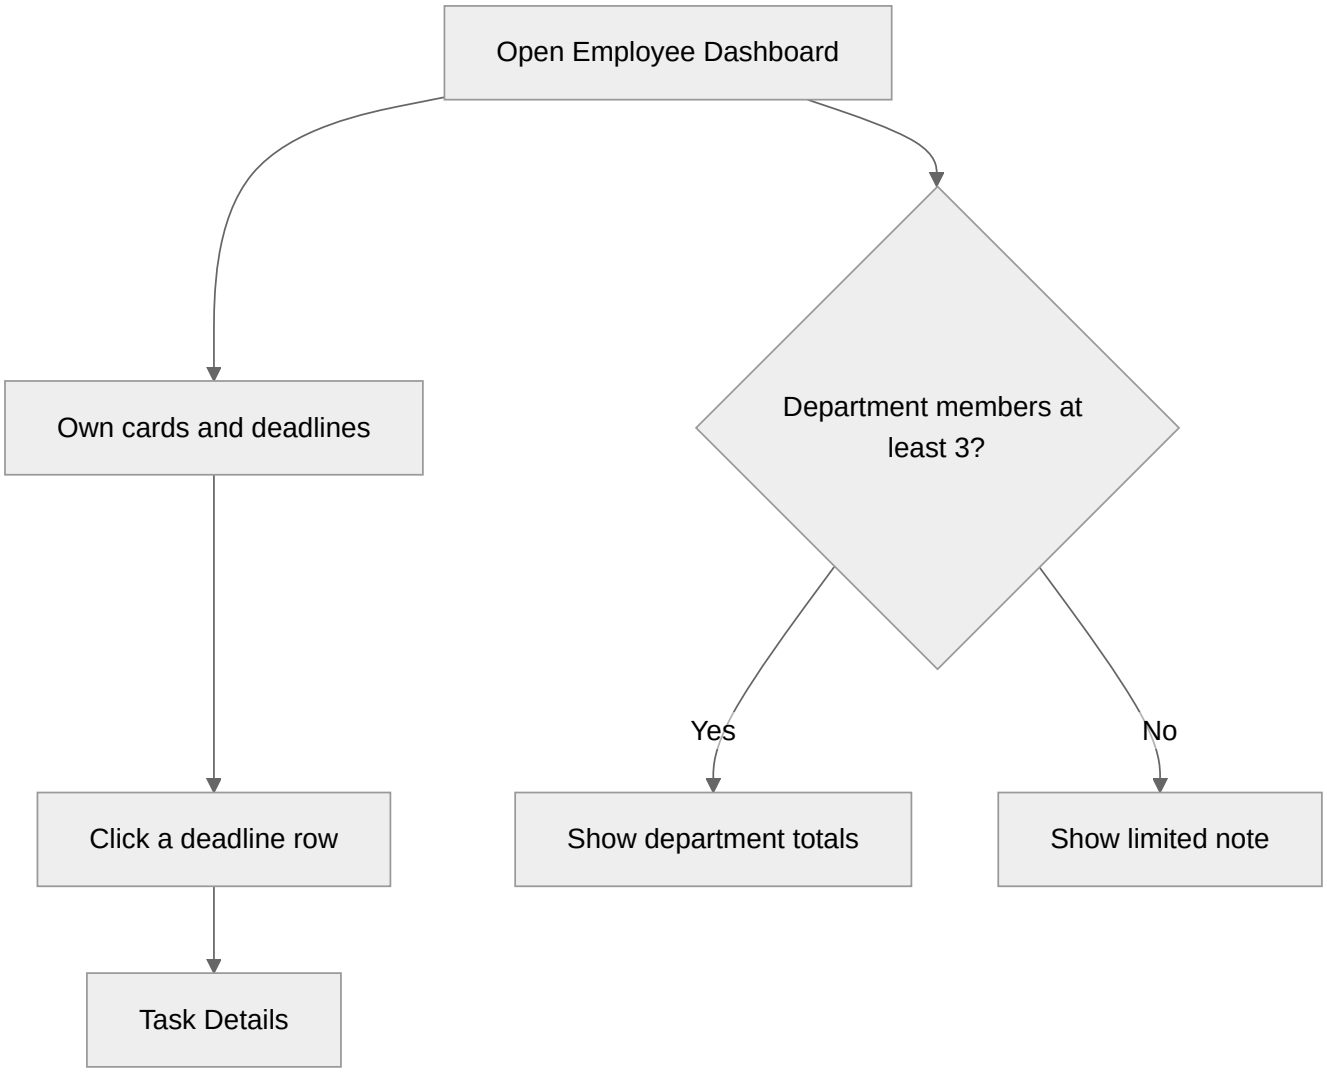

- An Administrator opening the Manager Dashboard without a team sees *"This dashboard shows one manager's team. Organisation-wide figures are on the Administrator Dashboard."*

4.5 Check My Deadlines and Department (Employee)

Trigger: User opens the Employee Dashboard · **Actors:** Employee (any signed-in user), System

Step	Actor / System	Action	Result
1	System	Shows own cards and up to 10 open tasks that are overdue or due in the next 7 days, soonest first	Close deadlines visible
2	User	Clicks a deadline row	Task Details opens
3	User	Clicks a period chip (Last 7 days, Last 30 days, This month)	Personal performance trend and "completed in this period" reload
4	System	Shows the Department overview for the user's first department (by name), or a note if it has fewer than 3 active members	Department totals without colleague details

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: On 31-Oct-2026 (application timezone Asia/Kolkata) Ravi sees TF-104 "Due today", TF-117 "Due tomorrow", TF-120 "In 3 days" and TF-098 "2 days overdue". His department "Design" has 2 active members, so he sees only *"Departments with fewer than 3 members do not show task figures."*

Exceptions / alternate flows:

- No tasks → *"You have no tasks yet. New assignments will appear here."*; nothing due → *"Nothing is due in the next 7 days."*
- Not in any department → *"No department assigned"*.

---

5. Screen-by-Screen Requirements

SCREEN 1: Administrator Dashboard

Field	Value
Screen name	Administrator Dashboard (original BRD Screen 2)
Module	Dashboard (Overview, Analytics)

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Field	Value
Access	Administrator; Custom Role holding `dashboard.view.organization`
Priority	Must

Purpose Give the Administrator an organisation-wide summary of people, projects and task work, with analytics and filters.

Screen Elements

- Header "Administrator Dashboard", "Welcome back, *name*", subtitle "Organisation-wide analytics · *range* by *date basis*".
- Filter bar: preset chips (Today, Last 7 days, Last 30 days, This month, Previous month, Custom range), From / To dates, Date basis (Created date, Deadline, Completed date), Department, Project, Manager, Employee, **Reset**.
- Ten summary cards: Employees, Managers, Departments, Projects, Total tasks, Completed, In progress, Pending, Overdue, Completion (%).
- Sections: Department-wise tasks, Employee-wise workload, Task status & priority, Completion trend, Deadlines, Manager-wise teams, Project-wise progress.
- Error banner with **Retry**; empty-state note.

Functional Requirements

ID	Requirement	Priority
REQ-DASH-01	The system shall provide one **Dashboard** menu item that opens the dashboard matching the user's role and permissions (rule in 4.1, step 2).	Must
REQ-DASH-02	The system shall open the user's dashboard automatically after sign-in.	Must
REQ-DASH-03	The system shall send a user who opens a dashboard above their level to their own dashboard without a message.	Must
REQ-DASH-04	The system shall show placeholders on the cards while the dashboard loads.	Should
REQ-DASH-05	The system shall show an error banner with a **Retry** button when the dashboard cannot be loaded.	Must
REQ-DASH-06	The system shall show ten summary cards: Employees, Managers, Departments, Projects, Total tasks, Completed, In progress, Pending, Overdue and Completion (%).	Must
REQ-DASH-07	The system shall count on the **Employees** card the active users whose role cannot view all tasks.	Must
REQ-DASH-08	The system shall count on the **Managers** card the users holding the Manager system role.	Must
REQ-DASH-09	The system shall show task status and task priority as two donut charts.	Must
REQ-DASH-10	The system shall show a completion trend of tasks created versus completed per day for ranges up to 31 days.	Should
REQ-DASH-11	The system shall show the completion trend per week (weeks start on Monday) for ranges longer than 31 days.	Should

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-DASH-12	The system shall show open tasks by deadline window: Overdue, Due today, Next 7 days, Later.	Must
REQ-DASH-13	The system shall show department-wise tasks as bars stacked by status, with a "No department" row when needed.	Should
REQ-DASH-14	The system shall show employee-wise workload for the top 10 people by open tasks.	Should
REQ-DASH-15	The system shall let the Administrator switch between **View all *n* employees with tasks** and **Show top 10**.	Could
REQ-DASH-16	The system shall show manager-wise teams with Manager, Depts, Staff, Projects and task counts.	Should
REQ-DASH-17	The system shall show project-wise progress with a "Projected end" equal to the latest task deadline in the project.	Should
REQ-DASH-18	The system shall show the filter bar only to users holding `dashboard.filters.use`.	Must
REQ-DASH-19	The system shall apply the default filter Last 30 days (ending today) by Created date.	Must
REQ-DASH-20	The system shall let the user filter by date preset or custom From / To dates.	Must
REQ-DASH-21	The system shall let the user choose the date basis: Created date, Deadline or Completed date.	Must
REQ-DASH-22	The system shall let the Administrator filter by Department, Project, Manager and Employee.	Should
REQ-DASH-23	The system shall reject a date range of 3660 days or more.	Should
REQ-DASH-24	The system shall reload every card and chart and update the subtitle when a valid filter is applied.	Must
REQ-DASH-25	The system shall return to the default filter when **Reset** is clicked.	Should
REQ-DASH-26	The system shall open the Task List with the dashboard filters plus the clicked part when a chart part is clicked.	Must
REQ-DASH-27	The system shall show in a drill-down exactly the tasks the dashboard counted, limited to the tasks the user may see.	Must
REQ-DASH-28	The system shall show an empty-state note when no task matches the filters.	Should

Validations & Messages

Situation	Rule / message
Start or end date missing	"Choose both a start and an end date."
End date before start date	"The end date cannot be before the start date."
Dashboard failed to load (also any filter the server refuses)	"Could not load analytics. Check your connection and try again."

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Situation	Rule / message
No task matches	"No tasks match these filters. Try a wider date range or reset the filters."
Empty chart / empty trend	"No tasks match these filters." / "No tasks were created or completed in this period."
No projects / no managers	"No projects match these filters." / "No managers match these filters."
No permission for this dashboard	No message – the user is taken to their own dashboard

Expected Result The Administrator understands the overall state of the organisation's work from one screen and can open the exact tasks behind any figure.

SCREEN 2: Manager Dashboard

Field	Value
Screen name	Manager Dashboard (original BRD Screen 3)
Module	Dashboard (Overview, Analytics)
Access	Manager; Custom Role holding `dashboard.view.team`; Administrator (by direct address)
Priority	Must

Purpose Help managers monitor their team's work, delayed tasks and team workload.

Screen Elements

- Header "Manager Dashboard", "Welcome back, *name*", subtitle "Team analytics · *range* by *date basis*".
- Filter bar without Department and Manager fields.
- Six summary cards: Team tasks, Completed, In progress, Pending, Overdue, Completion (%).
- Team performance summary: "Most overdue tasks" (up to 5) and "Projects needing attention" (up to 5).
- Task status & priority donuts, Project-wise progress, Employee-wise workload table (Open, Done, Overdue, Completion, Flag, Tasks-by-status bar).
- No-team note.

Functional Requirements

ID	Requirement	Priority
REQ-DASH-29	The system shall show six summary cards: Team tasks, Completed, In progress, Pending, Overdue and Completion (%).	Must
REQ-DASH-30	The system shall define the team as the active members of the departments the manager runs plus the members of projects where the manager is flagged project manager, excluding the manager.	Must
REQ-DASH-31	The system shall show a no-team note when the manager has nobody on the team.	Must
REQ-DASH-32	The system shall show a different note to an Administrator who opens the Manager Dashboard without a team.	Could

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-DASH-33	The system shall list up to 5 most overdue team tasks with their days overdue.	Must
REQ-DASH-34	The system shall open Task Details when a task in "Most overdue tasks" is clicked.	Must
REQ-DASH-35	The system shall list up to 5 projects with overdue team tasks under "Projects needing attention".	Should
REQ-DASH-36	The system shall open the Task List with that project's overdue tasks when a project in "Projects needing attention" is clicked.	Should
REQ-DASH-37	The system shall show the team's task status and priority donuts and project-wise progress.	Must
REQ-DASH-38	The system shall show an employee-wise workload table with Open, Done, Overdue, Completion, Flag and a tasks-by-status bar for each team member.	Must
REQ-DASH-39	The system shall flag a member **High workload** when their open tasks are at least 5 and at least 1.5 × the team average.	Must
REQ-DASH-40	The system shall flag a member **Overdue** when they have any overdue task.	Must
REQ-DASH-41	The system shall compare a single filtered employee with the whole team's average.	Should
REQ-DASH-42	The system shall show the Manager's filter bar without the Department and Manager fields.	Must
REQ-DASH-43	The system shall offer in the Manager's filter only the team's employees and the projects in the manager's scope.	Must
REQ-DASH-44	The system shall refuse a filter naming an employee outside the team or a project outside the manager's scope.	Must
REQ-DASH-45	The system shall let an Administrator open the Manager Dashboard by its direct address.	Could

Validations & Messages

Situation	Rule / message
Manager has no team	"You have no team yet. Ask an administrator to assign departments or direct reports to you."
Administrator opens the Manager Dashboard (no team)	"This dashboard shows one manager's team. Organisation-wide figures are on the Administrator Dashboard."
Nothing overdue	"Nothing is overdue for the team."
No team tasks match	"No team tasks match these filters. Try a wider date range or reset the filters."
No team members to show	"No team members to show. Ask an administrator to assign departments or direct reports to you."
Filter refused or load failed	"Could not load analytics. Check your connection and try again."
Date errors	Same as SCREEN 1

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Expected Result Managers quickly identify pending work, overloaded employees and tasks requiring attention in their own team.

SCREEN 3: Employee Dashboard

Field	Value
Screen name	Employee Dashboard (original BRD Screen 4)
Module	Dashboard (Overview, Analytics)
Access	Employee; every signed-in user (Administrator, Manager, Custom Role) through `dashboard.view.own`
Priority	Must

Purpose Give each user a personal view of their own tasks, deadlines, progress and projects.

Screen Elements

- Header "Employee Dashboard", "Welcome back, *name*", subtitle "Your tasks, projects and progress · *period*".
- Period chips Last 7 days, Last 30 days (default), This month, with the note "Only your own data is shown."
- Six summary cards: My tasks, Completed, In progress, Pending, Overdue, Completion (%).
- Overall task summary: progress bar, "*n* completed · *n* outstanding · *n*%", status and priority donuts.
- Upcoming deadlines & overdue list; Personal performance trend; My projects; Department overview.

Functional Requirements

ID	Requirement	Priority
REQ-DASH-46	The system shall show six summary cards: My tasks, Completed, In progress, Pending, Overdue and Completion (%).	Must
REQ-DASH-47	The system shall show on the Employee Dashboard only the signed-in user's own tasks.	Must
REQ-DASH-48	The system shall show an overall task summary with a progress bar, "*n* completed · *n* outstanding · *n*%" and status and priority donuts.	Should
REQ-DASH-49	The system shall list up to 10 open tasks that are overdue or due within the next 7 days, soonest first.	Must
REQ-DASH-50	The system shall show on each deadline row the task code, title, priority, deadline and a badge ("Due today", "Due tomorrow", "In *n* days", "Overdue", "*n* days overdue").	Must
REQ-DASH-51	The system shall open Task Details when a deadline row is clicked.	Must
REQ-DASH-52	The system shall offer period chips Last 7 days, Last 30 days (default) and This month.	Should
REQ-DASH-53	The system shall show a personal performance trend of tasks created versus completed per day for the chosen period, with "*n* completed in this period".	Should

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-DASH-54	The system shall apply the chosen period only to the personal performance trend and its completed count.	Should
REQ-DASH-55	The system shall list under "My projects" the projects where the user has tasks or is allocated, with progress of the user's own tasks only.	Should
REQ-DASH-56	The system shall show a Department overview with aggregate task figures for the user's first department by name.	Should
REQ-DASH-57	The system shall never show a colleague's name or task in the Department overview.	Must
REQ-DASH-58	The system shall show no department figures when the department has fewer than 3 active members.	Must

Validations & Messages

Situation	Rule / message
Dashboard failed to load	"Could not load your dashboard. Check your connection and try again." (with **Retry**)
No tasks	"You have no tasks yet. New assignments will appear here."
No upcoming deadlines	"Nothing is due in the next 7 days."
Empty personal trend	"You created or completed no tasks in this period."
No projects	"You have no projects yet."
Small department	"Departments with fewer than 3 members do not show task figures."
Not in any department	"No department assigned"

Expected Result Employees understand what work they need to complete and which deadlines need attention, without seeing colleagues' data.

---

6. Business Rules

ID	Rule	Applies to
BR-DASH-01	A task is counted only if it is not deleted and not cancelled.	All dashboards
BR-DASH-02	Each counted task is in exactly one bucket: **Completed** if its status is Completed; else **Overdue** if its deadline has passed; else **In progress** if its status is In Progress or In QA; else **Pending** (To Do, Blocked). Applies the global rule "a task is overdue when its deadline has passed and it is not completed or cancelled" (overall BRD §6).	All cards and charts; Task List drill-down
BR-DASH-03	Completion % = completed ÷ all counted tasks, rounded to the nearest whole number; 0 % when there are no tasks.	All dashboards
BR-DASH-04	A task belongs to a person if they are its assignee or one of its recipients.	Manager and Employee dashboards

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Rule	Applies to
BR-DASH-05	"Today", "due today" and "next 7 days" use the application timezone, so they match the deadline reminders. Applies the global rule "consistent timezone for deadline comparisons" (overall BRD §6).	All dashboards
BR-DASH-06	The date basis decides which task date must fall in the range; the completion trend always uses created and completed dates.	SCREEN 1, SCREEN 2
BR-DASH-07	The three view permissions are levels: Organisation includes Team, Team includes Own; `dashboard.view.own` is always on.	Dashboard routing
BR-DASH-08	Charts and figures need `dashboard.analytics.view`; the filter bar needs `dashboard.filters.use`; period chips need no filter permission.	All dashboards
BR-DASH-09	The Manager Dashboard covers only the manager's team; the Employee Dashboard covers only the user's own tasks. Applies the global rule "only authorised users access records" (overall BRD §6).	SCREEN 2, SCREEN 3
BR-DASH-10	The Department overview shows only aggregate figures and none at all for departments with fewer than 3 active members.	SCREEN 3
BR-DASH-11	The dashboard is read-only: it creates no notification, email or activity entry.	All dashboards
BR-DASH-12	A drill-down shows the same tasks the chart part counted, using the same bucket rules. Applies the global rule "dashboards and reports use consistent calculation rules" (overall BRD §6).	All dashboards, Task List

7. Non-Functional Requirements

Global NFRs (performance, security, usability, compatibility, accessibility) in the overall BRD apply. Sub-module specifics:

ID	Category	Requirement	Measure / target
NFR-DASH-01	Security	Dashboard scope is enforced by the server, not only by hiding screens	A Manager request for an employee outside the team is refused; an Employee cannot request another user's data
NFR-DASH-02	Privacy	Small departments cannot be used to infer one colleague's workload	No department figures below 3 active members
NFR-DASH-03	Consistency	Dashboard counts and Task List drill-down agree	Drill-down count = chart count for the same user
NFR-DASH-04	Usability	Every empty or failed section shows a plain-language message and a recovery action	Messages in section 5; **Retry** on load errors
NFR-DASH-05	Performance	The dashboard shows aggregated figures, not lists of all tasks	> ⚠️ To be confirmed: a measured load-time target (e.g. seconds for a given task volume) has not been set

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Category	Requirement	Measure / target
NFR-DASH-06	Capacity	Filter ranges stay bounded	Date range shorter than 3660 days; top 10 employees by default

8. Data Requirements

The dashboard stores no data of its own; it reads the following business data.

Entity / data set	Purpose	Key fields	Retention / rules
Tasks	All task figures	Code, title, status, priority, deadline, created date, completed date, assignee, project	Deleted and cancelled tasks are not counted
Task recipients	Ownership of tasks for Manager and Employee figures	Task, recipient user	A recipient counts as an owner of the task
Users	Employees and Managers cards, team members, names	Name, role, active status	Only active users count on the Employees card and in teams
Departments and members	Department-wise figures, manager teams, department overview	Name, manager, members	Fewer than 3 active members → no figures
Projects and allocations	Project figures, manager scope, My projects	Name, members, project-manager flag	Projected end = latest task deadline
Application settings	"Today" and day windows	Application timezone	Default Asia/Kolkata

9. Integrations & External Dependencies

System / service	Purpose	Required?	Notes
Task List (Task Management sub-module)	Drill-down target and Task Details	Required	Applies the user's own access rules
Role Configuration (Settings)	Grants the five dashboard permissions	Required	Changes take effect for the role's users
Application Settings	Application timezone	Required	Decides "today"

No external (third-party) service is used.

10. Reporting Requirements

Report	Audience	Filters	Output formats
Administrator Dashboard analytics	Administrator, Custom Role with `dashboard.view.organization`	Date range, date basis, department, project, manager, employee	Screen
Manager Dashboard analytics	Manager, Custom Role with `dashboard.view.team`, Administrator	Date range, date basis, project, employee (team only)	Screen
Employee Dashboard analytics	Every signed-in user	Period (Last 7 days, Last 30 days, This month)	Screen

File export of task figures is provided by the Reports sub-module (`../../05-Reports/05.1-Reports/BRD-Reports.md`).

11. Recommended Technology Stack (optional)

Not applicable for this sub-module. The recommended stack is in the overall BRD.

12. Assumptions, Constraints & Dependencies

Type	Description
Assumption	Each user belongs to zero or more departments; the Department overview uses the first by name.
Assumption	Managers are linked to their team through departments they run and projects where they are flagged project manager; no separate "direct reports" relation exists.
Constraint	Thresholds are fixed, not configurable: default range 30 days, maximum range 3660 days, daily trend up to 31 days, top 10 employees, attention lists of 5, upcoming list of 10, 7-day deadline window, High workload at 5 open tasks and 1.5 × average, department minimum 3 active members.
Dependency	Task Management (Task List, Task Details), Employee / Department / Project Management, Application Settings, Role Configuration.

13. Risks

ID	Risk	Impact	Likelihood	Mitigation
R-DASH-01	A role without `dashboard.analytics.view` opens a dashboard and sees only the generic load error	Medium	Low	Grant the permission with the view keys; > ⚠️ To be confirmed: whether the screen should show a "no permission" message instead
R-DASH-02	Filter errors from the server (range too long, employee outside the team) look like a connection problem	Low	Medium	Validate dates on screen first; > ⚠️ To be confirmed: show the server's message

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Risk	Impact	Likelihood	Mitigation
R-DASH-03	The team on the Manager Dashboard differs from the team used by the Administrator's Manager filter and "Manager-wise teams"	Medium	Medium	> ⚠️ To be confirmed: the single team definition to use
R-DASH-04	Administrator trend counts tasks completed in the range even if later reopened, while the Employee trend counts only tasks still completed	Low	Medium	> ⚠️ To be confirmed: one rule for both trends

14. Acceptance Criteria

ID	Criterion	Verified by
AC-DASH-01	Administrator, Manager, Employee and a custom role each land on the correct dashboard after sign-in and from the menu.	SCREEN 1, REQ-DASH-01, REQ-DASH-02
AC-DASH-02	A user typing a dashboard address above their level is taken to their own dashboard.	SCREEN 1, REQ-DASH-03
AC-DASH-03	A load failure shows the error banner; **Retry** reloads the dashboard.	SCREEN 1, REQ-DASH-04, REQ-DASH-05
AC-DASH-04	The Administrator Dashboard shows the ten cards with the counting rules of BR-DASH-01 to BR-DASH-03.	SCREEN 1, REQ-DASH-06 – REQ-DASH-08
AC-DASH-05	Status, priority, trend, deadlines, department, employee, manager and project sections show correct figures for a known data set.	SCREEN 1, REQ-DASH-09 – REQ-DASH-17
AC-DASH-06	Filters, default, date validation, range limit and **Reset** behave as stated.	SCREEN 1, REQ-DASH-18 – REQ-DASH-25, REQ-DASH-28
AC-DASH-07	Clicking any chart part opens the Task List with exactly the counted tasks.	SCREEN 1, REQ-DASH-26, REQ-DASH-27
AC-DASH-08	The Manager Dashboard shows only the team's figures and the no-team notes when the team is empty.	SCREEN 2, REQ-DASH-29 – REQ-DASH-32, REQ-DASH-37
AC-DASH-09	Most overdue tasks and projects needing attention are listed (up to 5 each) and open the right targets.	SCREEN 2, REQ-DASH-33 – REQ-DASH-36
AC-DASH-10	A member with 9 open tasks in a team averaging 4.5 is flagged High workload; a member with an overdue task is flagged Overdue.	SCREEN 2, REQ-DASH-38 – REQ-DASH-41
AC-DASH-11	A Manager cannot select or request an employee or project outside the team; an Administrator can open the Manager Dashboard.	SCREEN 2, REQ-DASH-42 – REQ-DASH-45
AC-DASH-12	The Employee Dashboard shows only the user's own figures, the summary and up to 10 deadline rows with correct badges that open Task Details.	SCREEN 3, REQ-DASH-46 – REQ-DASH-51
AC-DASH-13	Period chips change only the personal trend and its completed count; My projects shows own-task progress.	SCREEN 3, REQ-DASH-52 – REQ-DASH-55
AC-DASH-14	The Department overview shows totals without colleague details, and only the note for a department of fewer than 3 active members.	SCREEN 3, REQ-DASH-56 – REQ-DASH-58

OBJ-DASH-06	BR-DASH-09, BR-DASH-10, BR-DASH-11	SCREEN 2, 3	REQ-DASH-42, REQ-DASH-43, REQ-DASH-44, REQ-DASH-47, REQ-DASH-55, REQ-DASH-56, REQ-DASH-57, REQ-DASH-58	AC-DASH-11, AC-DASH-12, AC-DASH-13, AC-DASH-14

16. Project Deliverables

#	Deliverable	Format
1	Administrator, Manager and Employee dashboards (source code)	Repository
2	Dashboard BRD, FRD, HLD, LLD	Markdown
3	Unit and integration tests for counters, analytics, scopes, drill-down and isolation	Repository (test projects)
4	Sample data that fills every dashboard section	Seed data

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

17. Glossary

Term	Meaning
Bucket	One of Completed, Overdue, In progress, Pending; each counted task is in exactly one
Date basis	The task date that must fall in the filter range: Created date, Deadline or Completed date
Drill-down	Opening the Task List with the filter of the clicked chart part
Team	Active members of the departments a manager runs plus members of projects where the manager is flagged project manager
Recipient	A user configured to be notified about a task; counts as an owner of it on dashboards
Projected end	The latest task deadline in a project (projects have no deadline of their own)
High workload	At least 5 open tasks and at least 1.5 × the team's average

18. Project Summary

The Dashboard sub-module gives every TaskFlow user one screen that shows their work at the right level – organisation, team or own. It counts tasks with one set of bucket and timezone rules, highlights overdue work, overloaded people and close deadlines, keeps colleagues' data private, and lets the user click through to the exact tasks behind every figure.
