1. Project Overview

1.1 Introduction

The Reports sub-module gives Managers and Administrators one screen, **Task Reports**, that summarises task allocation and completion. Users filter tasks by deadline range, employee, project, status and priority and see the total, completed, pending and overdue counts with a completion summary bar. Users with the export permission can download the filtered tasks as a CSV file for office use.

1.2 Business Problem / Current Situation

Without reports, managers count tasks by hand to prepare status reviews, and the numbers differ from person to person. There is no easy way to give a spreadsheet of an employee's or project's tasks to someone else, and spreadsheet files built by hand can carry unsafe content.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

1.3 Project Objectives

ID	Objective	Success measure	Supports overall objective
OBJ-RPT-01	Show task totals for any filter combination	Total, completed, pending and overdue counts appear for any mix of deadline range, employee, project, status and priority, without an "Apply" step	Reports for work planning
OBJ-RPT-02	Show completion progress at a glance	The completion bar and "X of Y completed · Z%" match the counts	Monitor task progress; Reports for work planning
OBJ-RPT-03	Highlight overdue work for planning	The Overdue card counts every open task whose deadline has passed at the moment the report runs	Identify pending and overdue tasks
OBJ-RPT-04	Give a safe file for office use	Users with the export permission download the same filtered tasks (up to 50,000 rows) as a CSV that a spreadsheet opens without running formulas	Reports for work planning
OBJ-RPT-05	Keep reports to authorised users	Users without `reports.view` cannot open the screen or receive report data; users without `reports.export` cannot download	Reports for work planning

1.4 Expected Benefits

- **Organisation:** one consistent source of task totals for reviews and audits.
- **Managers and Administrators:** filtered figures in seconds and a CSV to share or archive.
- **Employees:** no change to their screens; their task data is reported correctly, including after reassignment or removal.

---

2. Stakeholders & User Roles

2.1 Stakeholders

Stakeholder	Interest / responsibility
Project owner (Jojo George)	Defines priorities and approves this BRD
Administrators	Use reports; grant or remove report permissions in Role Configuration
Managers	Use reports for planning and reviews
Employees	Their tasks are counted; no report access by default

2.2 User Roles

Role	Description	Main responsibilities in Reports	Access level
Administrator	Runs the system and its settings	Views and exports reports	Organisation
Manager	Leads one or more departments or projects	Views and exports reports	Organisation (not limited to the team)

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Role	Description	Main responsibilities in Reports	Access level
Employee	Works on assigned tasks	None by default	No access unless an Administrator grants `reports.view`
Custom Role	Role created by an Administrator	Views / exports if granted	Organisation, if `reports.view` is granted

Report permissions (default grants)

Permission	Meaning	Administrator	Manager	Employee	Custom Role
`reports.view`	View reports – open Task Reports and filter them	Granted	Granted	Not granted	Configurable
`reports.export`	Export reports – download a report as a file (requires `reports.view`)	Granted	Granted	Not granted	Configurable
`projects.view` (Project Management key)	Needed only to fill the **Project** filter list	Granted	Granted	Not granted	Configurable

The Administrator is re-granted every permission on each application start. Manager and Employee values are seed defaults that an Administrator can change in Role Configuration. A custom role starts with no permissions.

---

3. Scope

3.1 In Scope

- Task Reports screen with a Reports menu item.
- Filters: deadline from / to, employee, project, status, priority; **Reset**.
- Count cards: Total Tasks, Completed, Pending, Overdue; completion summary bar.
- CSV export of the filtered tasks (`taskflow-report.csv`).

3.2 Out of Scope (this release)

- Department filter – not built; future phase.
- Per-status / per-priority / per-employee breakdown and a chart – not built; future phase.
- Per-user data scope (reports limited to the records each user may access) – not built; see 3.4 and section 13.
- Export formats other than CSV (PDF, Excel) – not built.
- Scheduled or emailed reports – not built.
- Workload reports – provided by the Employee Workload sub-module.

3.3 Modules Overview

#	Module	Purpose	Screens
1	Reports	Filtered task totals, completion summary and CSV export	Task Reports

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

3.4 Change from Original BRD

Original BRD (Screen 17)	Current requirement
Date-range filter	Deadline range filter (Deadline from / Deadline to), both days included
Department filter	Replaced by a **Project** filter (assignee's project allocations)
Completion summary chart	Completion summary **progress bar** with "X of Y completed · Z%"
FR2 "Display task counts by status"	Four totals (Total, Completed, Pending, Overdue) plus a Status filter
FR6 "Reports contain only records the user is permitted to access"	Any holder of `reports.view` sees the whole organisation (chosen to match the dashboards) – > ⚠️ To be confirmed: acceptance of organisation-wide scope for Managers
FR5 "Export authorized report data to CSV"	CSV export needs `reports.export`; data is the same organisation-wide filtered set
New (not in original)	Spreadsheet formula protection; 50,000-row export limit; separate view and export permissions

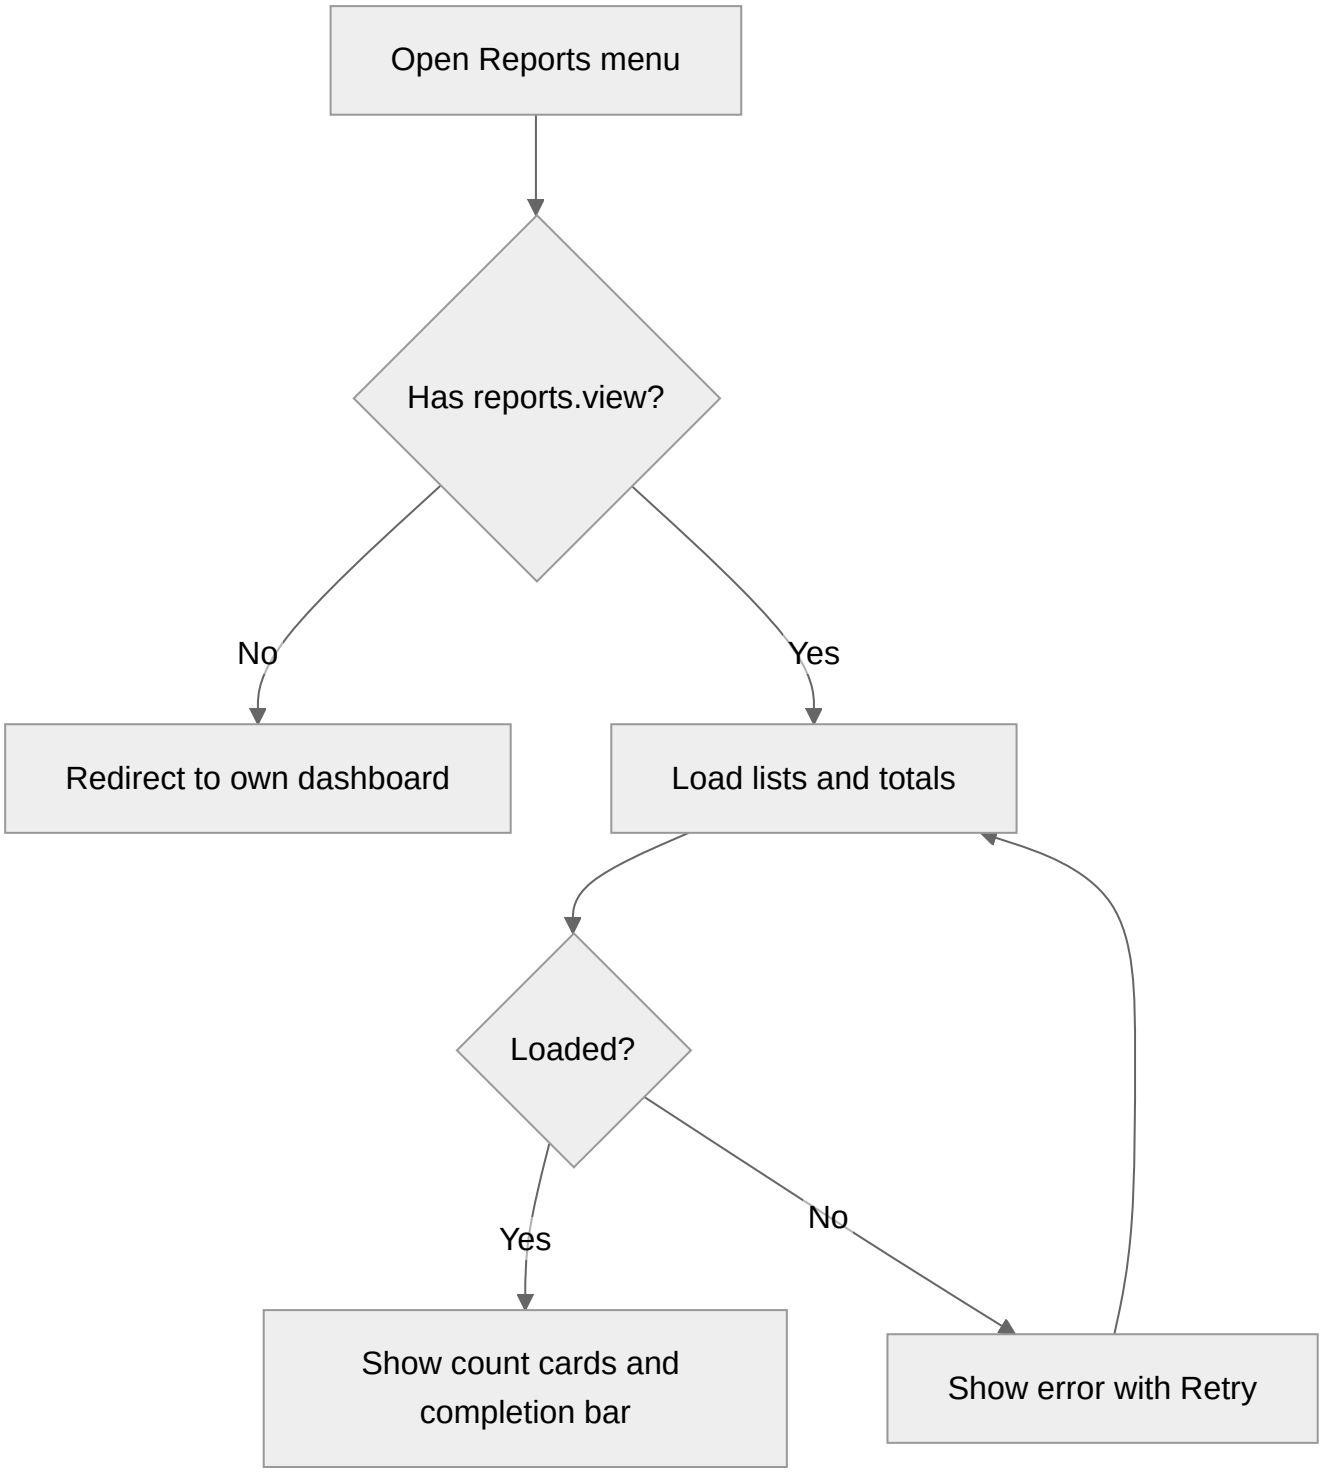

4. Business Process / Workflows

4.1 View the Report

Trigger: User clicks **Reports** in the side menu · **Actors:** Administrator, Manager, Custom Role, System

Step	Actor / System	Action	Result
1	User	Opens **Reports**	Request to open Task Reports
2	System	Checks `reports.view`; without it sends the user to their own dashboard (menu item hidden)	No unauthorised access
3	System	Loads the Employee and Project lists and the totals with no filter; subtitle "Loading report..."	Report loading
4	System	Shows the four count cards and the completion bar	Report shown
5	System	On a failure shows "Something went wrong" with **Retry**	User can reload

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: On 31-Oct-2026 the Manager opens Reports. There are 40 tasks: 12 Completed, 2 Cancelled, 26 pending of which 5 have a passed deadline. The cards show Total 40, Completed 12, Pending 26, Overdue 5 and the bar shows "12 of 40 completed · 30%".

Exceptions / alternate flows:

- Load failure → *"Could not load the report. Check your connection and try again."* with **Retry**.

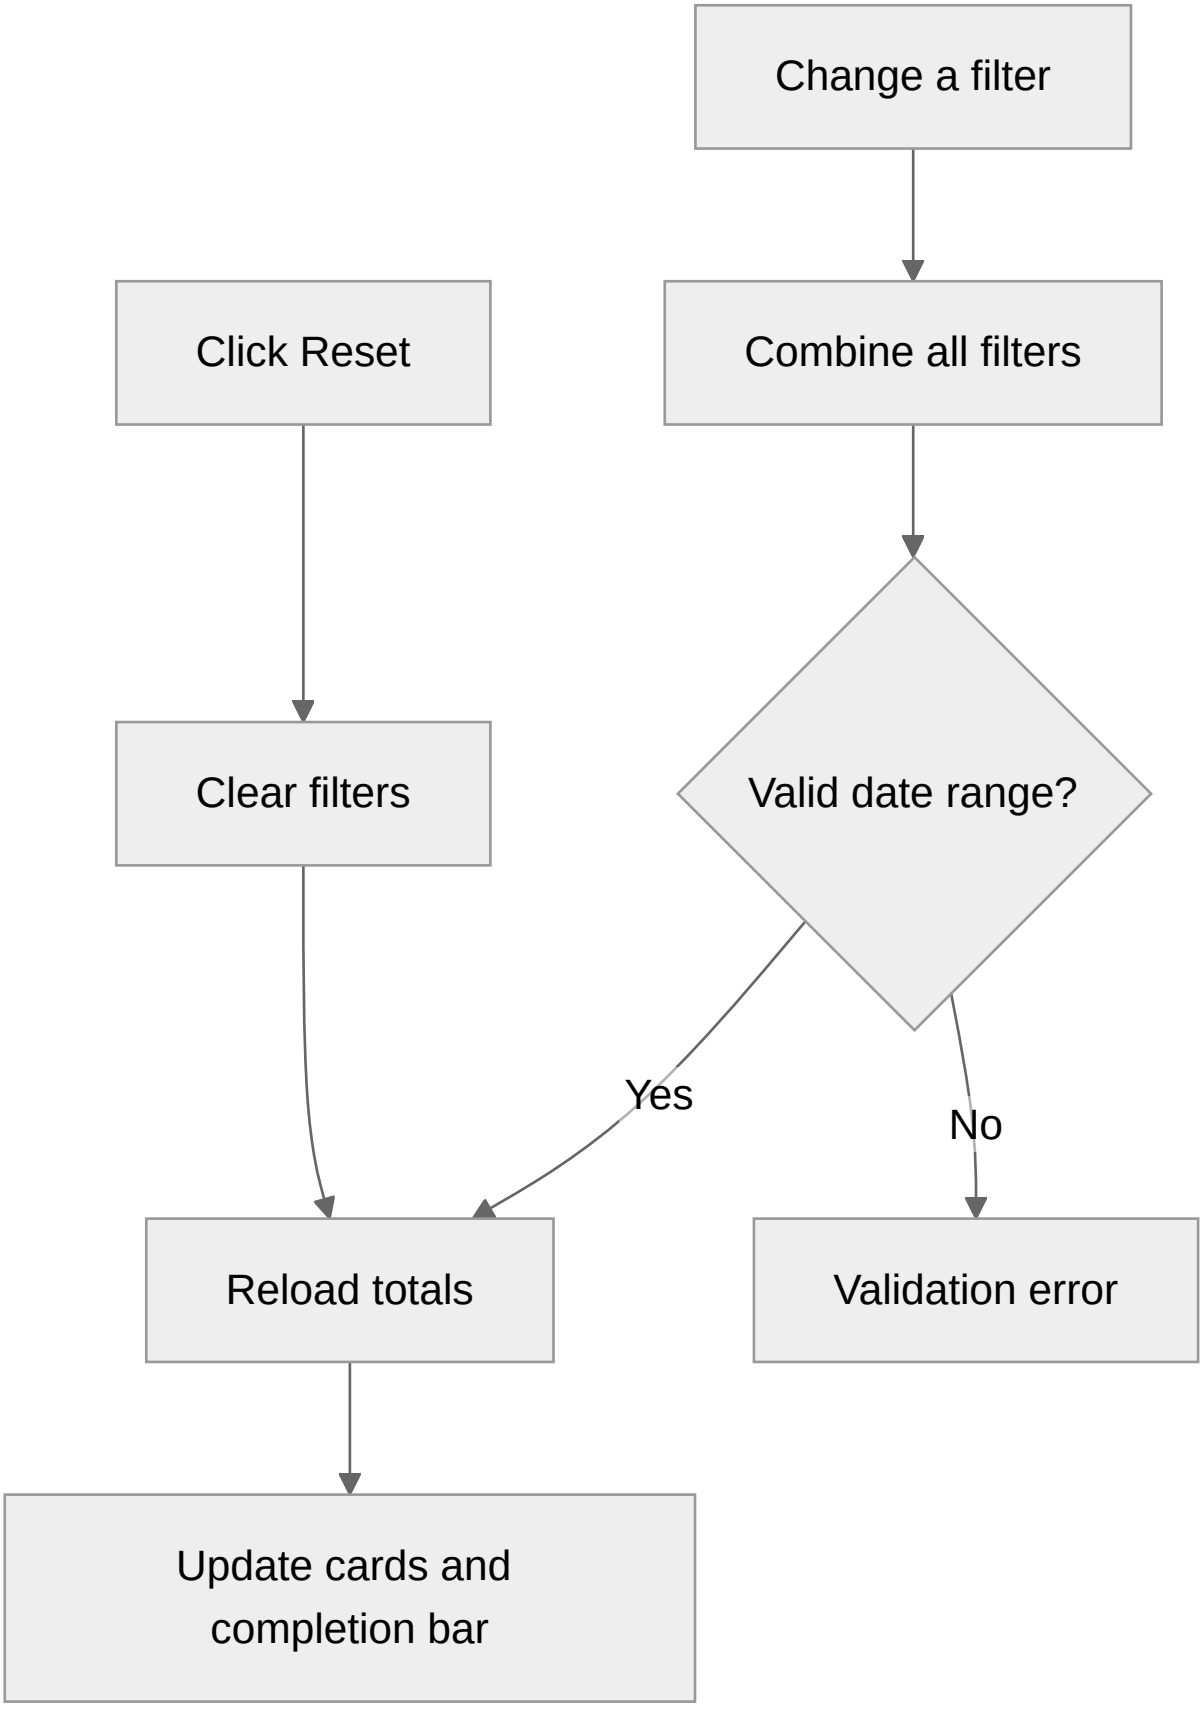

4.2 Filter the Report

Trigger: User changes a filter · **Actors:** Administrator, Manager, Custom Role, System

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Step	Actor / System	Action	Result
1	User	Picks Deadline from, Deadline to, Employee, Project, Status or Priority	Filter changed
2	System	Combines all selected filters and reloads the totals at once (no "Apply" button)	Updated cards and bar
3	System	Stops "Deadline to" being earlier than "Deadline from"; refuses such a request if it still arrives	Valid range only
4	User	Clicks **Reset**	All filters cleared; full report reloads

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: The Manager sets Deadline from 01-Oct-2026, Deadline to 31-Oct-2026, Employee "Arun Kumar" and Priority "High". The cards reload to Total 6, Completed 2, Pending 4, Overdue 1 – "2 of 6 completed · 33%".

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Exceptions / alternate flows:

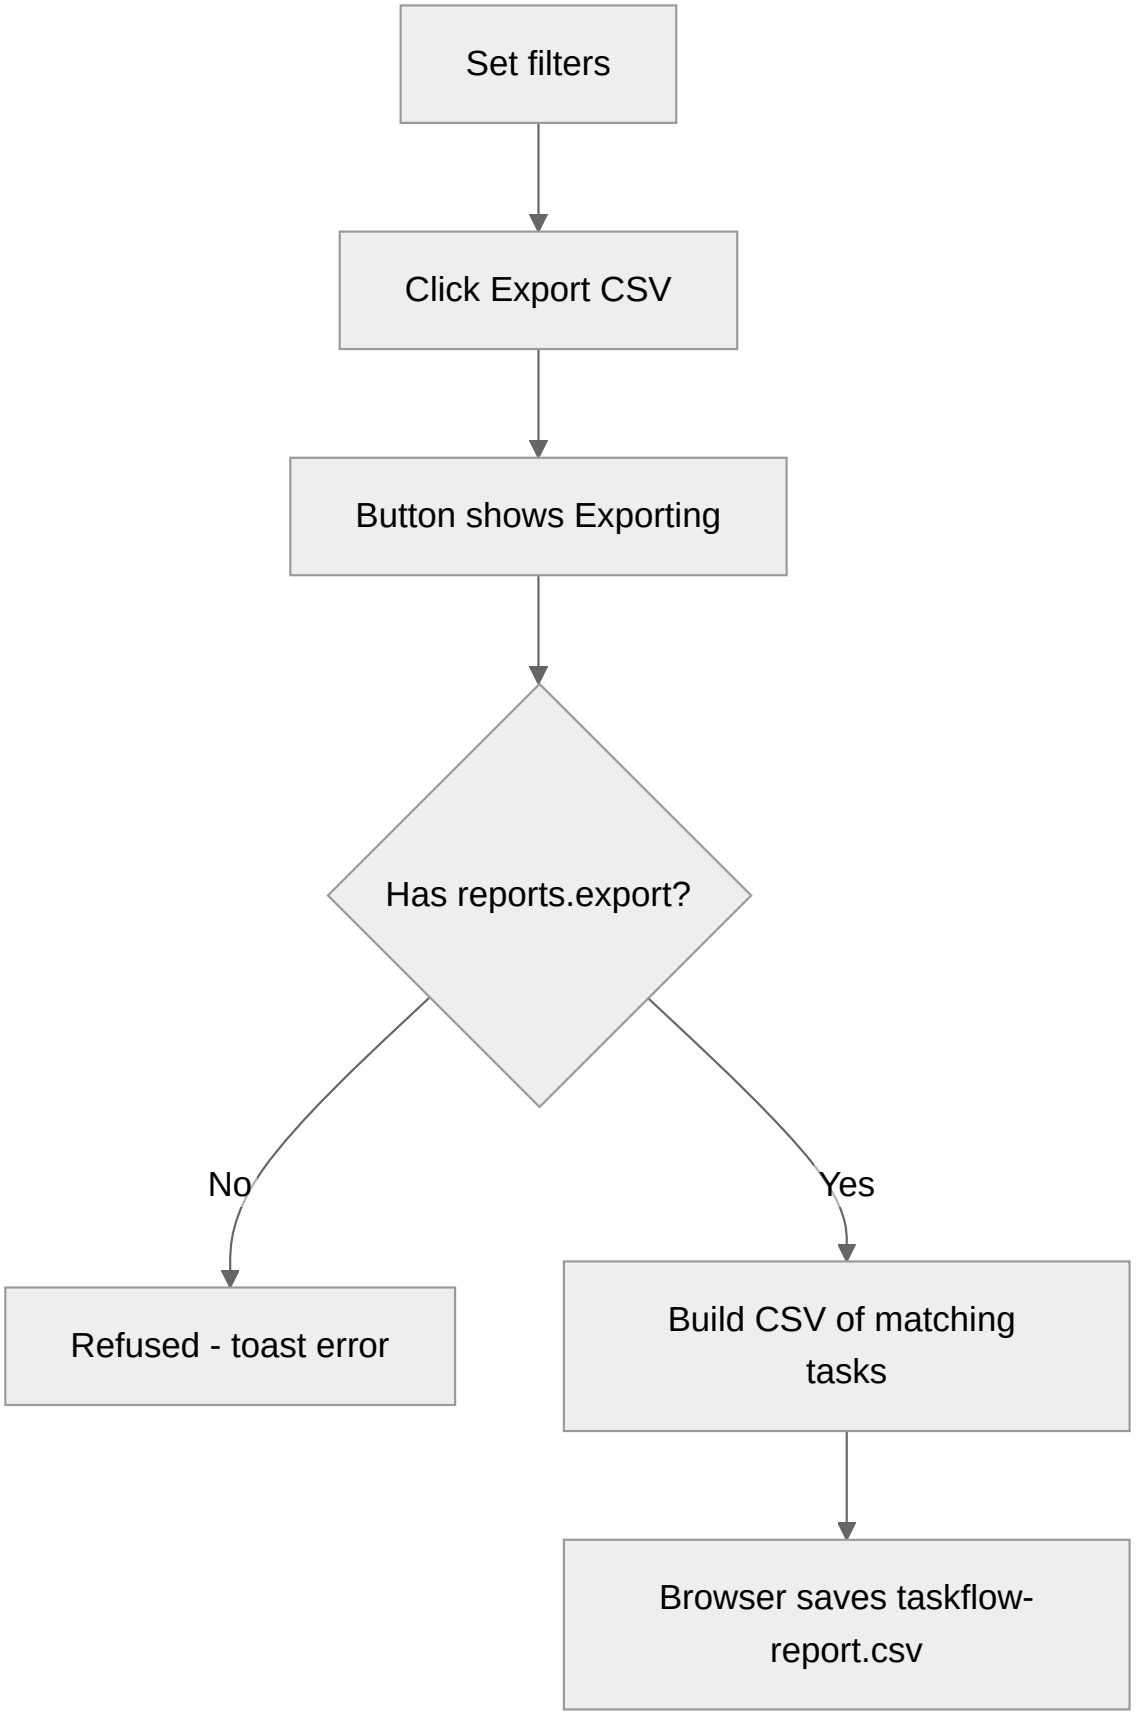

- "To" before "From" reaches the server → *"The report 'to' deadline must be on or after the 'from' deadline."*

4.3 Export CSV

Trigger: User clicks **Export CSV** · **Actors:** Administrator, Manager, Custom Role with `reports.export`, System

Step	Actor / System	Action	Result
1	User	Sets filters and clicks **Export CSV** (shown only with `reports.export`)	Export requested
2	System	Shows "Exporting…" and disables the button	No double export
3	System	Checks `reports.export`; collects the matching tasks, earliest deadline first, at most 50,000 rows	Export rows ready
4	System	Delivers `taskflow-report.csv` to the browser	File saved
5	System	On failure shows the toast *"Could not export the report. Please try again."*	User can retry

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: With the October filter above, the Manager exports 6 rows, earliest deadline first. A task assigned to Arun Kumar, who is allocated to "Portal" and "Website", shows `Portal, Website` in the Project column; its CompletedAt cell is empty because the task is not finished. A title typed as `=SUM(A1)` appears in the file as `'=SUM(A1)`.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Exceptions / alternate flows:

- More than 50,000 matching tasks → only the first 50,000 by deadline are exported.
- No notification, email or activity entry is created by an export.

---

5. Screen-by-Screen Requirements

SCREEN 1: Task Reports

Field	Value
Screen name	Task Reports (original BRD Screen 17)
Module	Reports
Access	Administrator, Manager, Custom Role holding `reports.view`; Employee only if an Administrator grants `reports.view` (export needs `reports.export`)
Priority	Must

Purpose Show task allocation and completion for the selected filters, and export the matching tasks to CSV.

Screen Elements

- Header "Task Reports" with subtitle "Task allocation and completion for the selected filters." ("Loading report..." on first load).
- **Export CSV** button (top right), shown only with `reports.export`; label "Exporting..." while running.
- Filter toolbar: Deadline from, Deadline to, Employee ("All employees"), Project ("All projects"), Status ("All statuses", ToDo, InProgress, InQA, Blocked, Completed, Cancelled), Priority ("All priorities", Low, Medium, High, Critical), **Reset**.
- Count cards: Total Tasks, Completed, Pending, Overdue (Overdue highlighted).
- Completion summary: progress bar and "X of Y completed · Z%".
- Error panel "Something went wrong" with **Retry**.

Functional Requirements

ID	Requirement	Priority
REQ-RPT-01	The system shall show the **Reports** menu item only to users holding `reports.view`.	Must
REQ-RPT-02	The system shall send a user without `reports.view` who opens the Reports address to their own dashboard without a message.	Must
REQ-RPT-03	The system shall refuse report data to a user without `reports.view`.	Must
REQ-RPT-04	The system shall load the report with no filter applied when the screen opens.	Must
REQ-RPT-05	The system shall show the subtitle "Loading report..." during the first load.	Could

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-RPT-06	The system shall show four count cards: Total Tasks, Completed, Pending and Overdue, with Overdue highlighted.	Must
REQ-RPT-07	The system shall count in **Total** every non-deleted task that matches the filters, including Cancelled tasks.	Must
REQ-RPT-08	The system shall count in **Completed** the matching tasks with status Completed.	Must
REQ-RPT-09	The system shall count in **Pending** the matching tasks that are neither Completed nor Cancelled.	Must
REQ-RPT-10	The system shall count in **Overdue** the pending tasks whose deadline has passed at the moment the report runs.	Must
REQ-RPT-11	The system shall show a completion bar and the text "X of Y completed · Z%", with Z = Completed ÷ Total rounded to a whole number and 0 % when there are no tasks.	Must
REQ-RPT-12	The system shall filter by deadline range, including both the "from" day and the "to" day in full.	Must
REQ-RPT-13	The system shall stop "Deadline to" from being set earlier than "Deadline from".	Must
REQ-RPT-14	The system shall refuse a request whose "to" deadline is before its "from" deadline.	Must
REQ-RPT-15	The system shall filter by one employee, keeping tasks assigned to that employee.	Must
REQ-RPT-16	The system shall list in the Employee filter the assignees the user can see in the Task List.	Should
REQ-RPT-17	The system shall filter by one project, keeping tasks whose assignee is allocated to that project.	Should
REQ-RPT-18	The system shall fill the Project filter list only for users holding `projects.view`.	Should
REQ-RPT-19	The system shall filter by one status (ToDo, InProgress, InQA, Blocked, Completed, Cancelled).	Must
REQ-RPT-20	The system shall filter by one priority (Low, Medium, High, Critical).	Must
REQ-RPT-21	The system shall treat every filter as optional and combine all selected filters.	Must
REQ-RPT-22	The system shall reload the totals immediately when any filter changes, without an "Apply" button.	Should
REQ-RPT-23	The system shall clear every filter and reload the full report when **Reset** is clicked.	Should
REQ-RPT-24	The system shall leave deleted tasks out of reports and exports.	Must
REQ-RPT-25	The system shall keep the tasks of removed employees in reports and exports, with that person's name.	Must
REQ-RPT-26	The system shall report over the whole organisation for every holder of `reports.view`.	Must

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-RPT-27	The system shall show an error panel with **Retry** when the report cannot be loaded.	Must
REQ-RPT-28	The system shall show the **Export CSV** button only to users holding `reports.export`.	Must
REQ-RPT-29	The system shall refuse an export to a user without `reports.export`.	Must
REQ-RPT-30	The system shall export the tasks that match the current filters, ordered by deadline, earliest first.	Must
REQ-RPT-31	The system shall export at most 50,000 rows per file.	Must
REQ-RPT-32	The system shall name the file `taskflow-report.csv`.	Should
REQ-RPT-33	The system shall export the columns TaskCode, Title, Assignee, Project, Priority, Status, StartDate, Deadline, EstimatedHours and CompletedAt.	Must
REQ-RPT-34	The system shall list in the Project column every project the assignee is allocated to, comma-separated and sorted by name.	Should
REQ-RPT-35	The system shall write dates in the CSV as `yyyy-MM-dd` and leave CompletedAt empty for unfinished tasks.	Should
REQ-RPT-36	The system shall prefix with `'` any cell that starts with `=`, `+`, `-` or `@`.	Must
REQ-RPT-37	The system shall show "Exporting..." and disable the button while an export runs.	Should
REQ-RPT-38	The system shall show a toast message when an export fails.	Must
REQ-RPT-39	The system shall create no notification, email or activity entry when a report is viewed or exported.	Must

Validations & Messages

Situation	Rule / message
Page loading for the first time	"Loading report..."
Page loaded	"Task allocation and completion for the selected filters."
Report could not be loaded	"Something went wrong" – "Could not load the report. Check your connection and try again." (with **Retry**)
Invalid date range (server check)	"The report 'to' deadline must be on or after the 'from' deadline."
Invalid status or priority value	Refused; only the listed values are accepted
Export in progress	"Exporting..." (button)
Export failed	"Could not export the report. Please try again."
Completion summary	"X of Y completed · Z%"

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Situation	Rule / message
No permission to open the screen	No message – user sent to their own dashboard; **Reports** menu item hidden
No permission to export	No message – **Export CSV** button hidden

Expected Result Managers and Administrators review task performance for any filter combination and export the same tasks as a safe CSV file for office use.

6. Business Rules

ID	Rule	Applies to
BR-RPT-01	Only holders of `reports.view` can open Task Reports or receive report data; export also needs `reports.export`, which requires `reports.view`. Applies the global rule "only authorised users access records" (overall BRD §6).	SCREEN 1
BR-RPT-02	Counts: Total = all matching tasks; Completed = status Completed; Pending = neither Completed nor Cancelled; Overdue = Pending with a passed deadline; Cancelled tasks count only in Total. Applies the global rule "overdue = deadline passed and not completed or cancelled" (overall BRD §6).	Count cards, completion bar
BR-RPT-03	Completion % = Completed ÷ Total, rounded to a whole number; 0 % when Total is 0.	Completion bar
BR-RPT-04	The date range filters the task deadline and includes both days in full.	Filters, export
BR-RPT-05	The Project filter and the CSV Project column use the assignee's project allocations, not the task's own project.	Filters, export
BR-RPT-06	Deleted tasks are excluded; tasks of removed employees are kept with the person's name, so finished work still counts. Applies the global rule "historical data is not damaged by deletion" (overall BRD §6).	Report, export
BR-RPT-07	Report data is organisation-wide for every holder of `reports.view`.	Report, export
BR-RPT-08	One export contains at most 50,000 rows, earliest deadline first.	Export
BR-RPT-09	Cells that start with `=`, `+`, `-` or `@` are written with a leading `'` so spreadsheets do not run them as formulas.	Export
BR-RPT-10	The overdue rule is the same one the dashboards use. Applies the global rule "dashboards and reports use consistent calculation rules" (overall BRD §6) – > ⚠️ To be confirmed: the dashboards leave Cancelled tasks out of their totals and split open tasks into Pending (To Do, Blocked) and In progress, while Reports counts Cancelled in Total and all open tasks as Pending.	Count cards

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

7. Non-Functional Requirements

Global NFRs (performance, security, usability, compatibility, accessibility) in the overall BRD apply. Sub-module specifics:

ID	Category	Requirement	Measure / target
NFR-RPT-01	Security	View and export permissions are enforced by the server, not only by hiding the menu item and button	A request without the permission is refused; refused requests are logged
NFR-RPT-02	Security	Exported files are safe to open in spreadsheet tools	No cell in the file starts with `=`, `+`, `-` or `@` without a leading `'`
NFR-RPT-03	Compatibility	The CSV opens in common spreadsheet tools	Standard comma-separated format with a header row; dates `yyyy-MM-dd`
NFR-RPT-04	Capacity	Exports stay bounded	At most 50,000 rows per file
NFR-RPT-05	Usability	Filters apply at once and every failure shows a plain-language message	No "Apply" step; messages in section 5
NFR-RPT-06	Performance	Totals reload after each filter change	> ⚠️ To be confirmed: a measured response-time target has not been set

8. Data Requirements

Reports store no data of their own; they read the following business data.

Entity / data set	Purpose	Key fields	Retention / rules
Tasks	Counts and export rows	Code, title, assignee, priority, status, start date, deadline, estimated hours, completed date	Deleted tasks excluded
Users	Employee filter and Assignee column	Name	Removed employees' names are kept on their tasks
Project allocations	Project filter and Project column	Employee, project	Assignee's allocations decide the project
Projects	Project names	Name	Sorted by name in the Project column

9. Integrations & External Dependencies

System / service	Purpose	Required?	Notes
Task Management (Task List)	Source of the Employee filter list	Required	List follows the user's own task access

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

System / service	Purpose	Required?	Notes
Project Management	Source of the Project filter list	Optional	Needs `projects.view`; without it the list stays empty
Role Configuration (Settings)	Grants `reports.view` and `reports.export`	Required	Administrator changes take effect for the role's users

No external (third-party) service is used.

---

10. Reporting Requirements

Report	Audience	Filters	Output formats
Task Reports summary	Administrator, Manager, Custom Role with `reports.view`	Deadline range, employee, project, status, priority	Screen (count cards, completion bar)
Task Reports export	Administrator, Manager, Custom Role with `reports.export`	Same as the summary	CSV (`taskflow-report.csv`)

Charts and team / organisation analytics are provided by the Dashboard sub-module (`../../01-Dashboard/01.1-Dashboard/BRD-Dashboard.md`).

---

11. Recommended Technology Stack (optional)

Not applicable for this sub-module. The recommended stack is in the overall BRD.

---

12. Assumptions, Constraints & Dependencies

Type	Description
Assumption	Managers are allowed to see organisation-wide report figures (matches the dashboards' design choice).
Assumption	A task's project for reporting is the set of projects its assignee is allocated to.
Constraint	The export row limit (50,000) is fixed, not configurable.
Constraint	Only CSV export is offered.
Dependency	Task Management, Employee / Project Management, Role Configuration.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

13. Risks

ID	Risk	Impact	Likelihood	Mitigation
R-RPT-01	Managers see tasks outside their team, unlike original BRD FR6	High	High	Grant `reports.view` only to trusted roles; > ⚠️ To be confirmed: whether a per-user scope is required
R-RPT-02	Exports above 50,000 rows are cut off without a warning	Medium	Low	Narrow the filters; > ⚠️ To be confirmed: whether to warn the user
R-RPT-03	The deadline-day conversion uses the browser's time zone, not the application timezone (global consistent-timezone rule, overall BRD §6)	Medium	Medium	> ⚠️ To be confirmed: use the application timezone
R-RPT-04	Without `projects.view` (or when the list fails to load) the Project / Employee list stays empty with no message	Low	Medium	Grant `projects.view` with `reports.view`; > ⚠️ To be confirmed: show a message
R-RPT-05	A custom role with limited task access sees a partial Employee list but organisation-wide totals	Medium	Low	Review custom role grants; > ⚠️ To be confirmed: align the list with the report scope
R-RPT-06	A task whose assignee is allocated to two projects appears under both project filters; a task whose assignee has no allocation never matches a project filter	Low	Medium	Documented in BR-RPT-05; > ⚠️ To be confirmed: whether the task's own project should be used

14. Acceptance Criteria

ID	Criterion	Verified by
AC-RPT-01	A user without `reports.view` does not see the menu item, is redirected from the address, and is refused report data.	SCREEN 1, REQ-RPT-01, REQ-RPT-02, REQ-RPT-03
AC-RPT-02	On opening, the unfiltered report shows the four cards for a known data set (e.g. 40 / 12 / 26 / 5).	SCREEN 1, REQ-RPT-04 – REQ-RPT-10
AC-RPT-03	The completion bar shows "12 of 40 completed · 30%" for that data set and "0%" with no tasks.	SCREEN 1, REQ-RPT-11
AC-RPT-04	A deadline range includes tasks due on both end days; a reversed range cannot be entered and is refused by the server.	SCREEN 1, REQ-RPT-12, REQ-RPT-13, REQ-RPT-14
AC-RPT-05	Employee, Project, Status and Priority filters each narrow the totals, combine with each other, and reload at once.	SCREEN 1, REQ-RPT-15 – REQ-RPT-22
AC-RPT-06	**Reset** clears every filter and reloads the full report.	SCREEN 1, REQ-RPT-23
AC-RPT-07	Deleted tasks are not counted; a removed employee's tasks are counted and exported with their name.	SCREEN 1, REQ-RPT-24, REQ-RPT-25

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Criterion	Verified by
AC-RPT-08	A Manager sees the same organisation-wide totals as the Administrator for the same filters.	SCREEN 1, REQ-RPT-26
AC-RPT-09	A load failure shows the error panel; **Retry** reloads.	SCREEN 1, REQ-RPT-27
AC-RPT-10	Only `reports.export` holders see **Export CSV**; others are refused.	SCREEN 1, REQ-RPT-28, REQ-RPT-29
AC-RPT-11	The exported `taskflow-report.csv` contains the filtered tasks, ordered by deadline, at most 50,000 rows, with the ten columns, project list and date format stated.	SCREEN 1, REQ-RPT-30 – REQ-RPT-35
AC-RPT-12	A title starting with `=` is written with a leading `'` in the file.	SCREEN 1, REQ-RPT-36
AC-RPT-13	The button shows "Exporting..." while running; a failure shows the toast; no notification, email or activity entry is created.	SCREEN 1, REQ-RPT-37, REQ-RPT-38, REQ-RPT-39

15. Requirements Traceability Matrix

Objective	Business rule(s)	Screen(s)	Functional requirement(s)	Acceptance criterion

#	Deliverable	Format
3	Unit tests (report logic, CSV format and formula protection) and integration tests (endpoints and permissions)	Repository (test projects)
4	Sample data covering every status, priority and an overdue task	Seed data

17. Glossary

Term	Meaning
Pending (Reports)	A task that is neither Completed nor Cancelled (ToDo, InProgress, InQA, Blocked)
Overdue	A pending task whose deadline has passed at the moment the report runs
Allocation	The link between an employee and a project they work on
CSV	Comma-separated values file that spreadsheet tools open
Formula protection	Writing a leading `'` before a cell starting with `=`, `+`, `-` or `@`

18. Project Summary

The Reports sub-module gives Managers and Administrators a single Task Reports screen that turns any mix of deadline range, employee, project, status and priority into total, completed, pending and overdue counts with a completion bar, and lets authorised users export the same tasks as a safe CSV file. It is protected by separate view and export permissions and uses the shared overdue rule, while the organisation-wide scope and the missing department filter are recorded as changes from the original BRD.
