Reports Module – Functional Workflow

Project: TaskFlow – Intelligent Task Allocation & Tracking System
Module: Reports · **Child Modules:** Reports
Version: 1.0 · **Last Updated:** 31-Oct-2026
Author: Jojo George (jojogeorge3344@gmail.com)

1. Module Overview

The Reports module gives Managers and Administrators one screen, **Task Reports**, that summarises task allocation and completion. Users filter the tasks by deadline range, employee, project, status and priority. The screen then shows the total, completed, pending and overdue task counts and a completion summary bar. Users with the export permission can download the filtered tasks as a CSV file.

2. Purpose / Business Value

- Shows how much work there is and how much is finished, pending or overdue, without counting tasks by hand.
- Managers can narrow the figures to one employee, project, status, priority or deadline period for planning and reviews.
- The CSV export gives a file for office use (spreadsheets, status reports, audits).
- The status and overdue rules are the same ones the dashboards use, so the figures match across screens.

3. Who Can Access This Module

Role	Can See Module	Can Use Module	Access Level (Own / Team / Organization)
Administrator	✅	✅	Organization
Manager	✅	✅	Organization (the report is not limited to the Manager's team)
Employee	❌	❌	– (no access by default)
Custom Role	Configurable	Configurable	Organization, if `reports.view` is granted

> Note: A Manager sees the report for the **whole organization**, not only their team. The code does this on purpose, to match the dashboards (see section 7 of the technical document).

4. Screens in This Module

#	Screen Name	Menu Path	Purpose	Visible To
1	Task Reports	Side menu → **Reports** (`/reports`)	Filtered task totals, completion summary and CSV export	Administrator, Manager, and custom roles with `reports.view`

5. Child Modules

#	Child Module	Purpose	Visible To	Document
6.1	Reports	Task Reports screen: filtered totals (total, completed, pending, overdue), completion summary and CSV export	Administrator, Manager, and custom roles with `reports.view` (export needs `reports.export`)	`06.1-Reports.md`

Screen details, functionalities, step-by-step workflows, business rules and messages are in the child document.

6. Permission Summary (Module Level)

Permission Key	Description	Administrator	Manager	Employee	Custom Role
`reports.view`	View reports – open task reports and filter them	Granted	Granted	Denied	Configurable
`reports.export`	Export reports – download a report as a file (requires `reports.view`)	Granted	Granted	Denied	Configurable
`projects.view`	View projects – needed only to fill the **Project** filter dropdown (Management module key)	Granted	Granted	Denied	Configurable

Notes:

- The Administrator is re-granted every permission on every application start.
- The Manager and Employee values above are seed defaults. An Administrator can change them in **Role Configuration**.
- A custom role starts with no keys. Permissions can be copied from another role.

7. Related Modules

- **Monitoring (Task Management)** – The report counts the tasks created and updated there. The Employee dropdown comes from the task list's assignee list.
- **Management (Employee / Project Management)** – Project allocations decide the Project filter and the CSV Project column. The Project dropdown needs `projects.view` .
- **Dashboard** – Uses the same status and overdue rules, so the counts match.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

- **Settings (Role Configuration)** – Where `reports.view` and `reports.export` are granted to or taken from roles.
- **TaskFlow Assistant (TFA)** – Help knowledge points users to the Reports screen (`/reports`). It does not run reports itself.

8. Expected Outcome

Managers and Administrators can see task totals, completion progress and overdue work for any mix of deadline range, employee, project, status and priority. Users with the export permission can download the same tasks as a safe CSV file for office use.
