1. Project Overview

1.1 Introduction

Project Management (menu **TaskFlow Management → Project Management**) is where administrators keep the list of projects and decide who works on each one, in which position, for what percentage of their time, and who manages the project. The **Project Details** screen shows one project's team, summary figures and tasks. Positions (such as Developer or QA) are labels picked or created while building a team.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

1.2 Business Problem / Current Situation

- Every task must belong to a project, so the organisation needs one controlled list of projects.
- Without a cap, the same person can be promised to several projects at once and becomes over-booked.
- A project without a responsible manager has no one who sees its team on the manager dashboard.
- Managers need a read-only view of each project's team and tasks to plan work.
- The original BRD has **no** Project Management screen; projects, project teams, allocations and positions were added during development. This BRD records them as the current requirement.

1.3 Project Objectives

ID	Objective	Success measure
OBJ-PROJ-01	Keep one list of projects that tasks belong to	Every live project is listed once, with a unique name
OBJ-PROJ-02	Prevent over-booking of people	No person is ever allocated more than 100% across all projects
OBJ-PROJ-03	Give every project team a responsible manager	Every non-empty team has at least one project manager with the Manager role
OBJ-PROJ-04	Give managers visibility of projects	Managers see every project's team, summary figures and tasks, read only
OBJ-PROJ-05	Describe each person's role on a project consistently	Positions are shared, reusable labels without duplicates

These objectives support the overall TaskFlow objectives in `../../00-Overall/BRD-TaskFlow-Overall.md`.

1.4 Expected Benefits

- Organisation: realistic staffing, because allocations never pass 100% per person.
- Administrators: create a project and its team in one flow.
- Managers: see each project's people, progress (overdue and completed figures) and tasks in one screen.
- Employees: a clear position and share of time on each project they work on.

---

2. Stakeholders & User Roles

2.1 Stakeholders

Stakeholder	Interest / responsibility
Project owner (Jojo George)	Defines priorities, approves this BRD
Administrators	Create projects, build teams, choose project managers
Managers	Plan and assign work using project teams; manage flagged projects
Employees	Work on projects in a given position and share of time

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

2.2 User Roles

Role	Description	Main responsibilities	Access level
Administrator	Full system owner	Add, edit and delete projects; manage teams; create positions	Organisation
Manager	Plans and assigns work	View projects, project details and positions (read only); can be flagged as a project manager	Organisation, read only
Employee	Works on tasks	No access to this sub-module	None
Custom role	Role built in Role Configuration	Whatever project permissions it is granted; needs `projects.view` to see the screen	As granted (Organisation)

---

3. Scope

3.1 In Scope

- Project list with search, team size and manager names.
- Add, edit and delete projects.
- Project team: people, position, allocation percentage and project-manager flag.
- Positions: pick an existing one or create a new one while building a team.
- Project Details: summary figures, team and a filtered task list.

3.2 Out of Scope (this release)

- Renaming or deleting positions – only "pick or create" is offered.
- Project dates, budgets or status – not requested.
- Creating tasks from the project screens – done in Task Management.
- Changing a person's allocations from Employee Management after creation – done here.

3.3 Modules Overview

#	Module	Purpose	Screens
1	TaskFlow Management → Project Management	Projects, teams with position and allocation, project managers, positions	Project Management (list), Add / Edit project (dialog), Project team / Assign team (dialog), Project Details

---

4. Business Process / Workflows

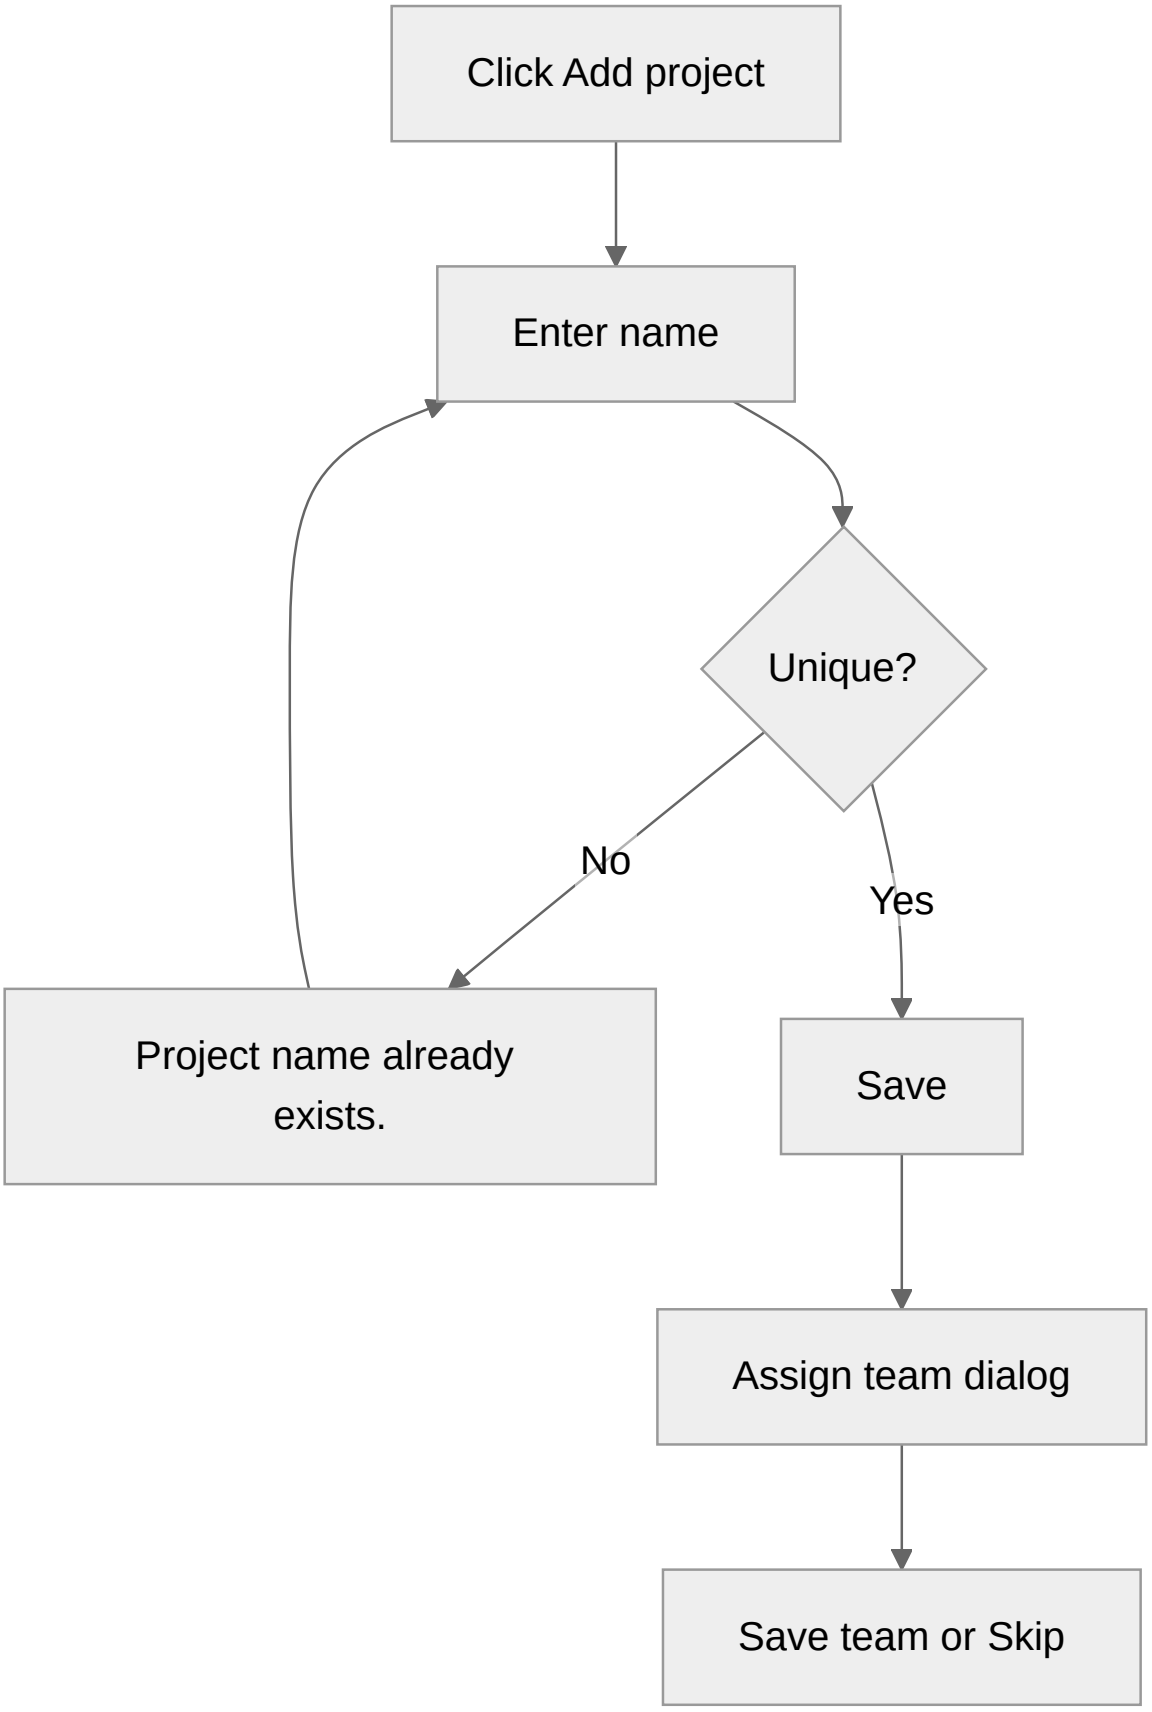

4.1 Add a Project and Assign Its Team

Trigger: A new project starts · **Actors:** Administrator, System

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Step	Actor / System	Action	Result
1	Administrator	Clicks **Add project**, enters the name and optional description	Data submitted
2	System	Checks the name is unique and saves	"{name} added"
3	System	Opens **Assign team: {name}**	Team dialog shown with **Skip for now**
4	Administrator	Adds people with position and percentage and ticks a project manager, or skips	Team saved or left empty

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: On 31-Oct-2026 the administrator adds project *Website Revamp*. The Assign team dialog opens; she adds Ravi Menon (Manager role) as Manager at 30%, ticked as project manager, and Anu Thomas as Developer at 60%, then clicks **Save team** and sees "Team saved".

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Exceptions / alternate flows:

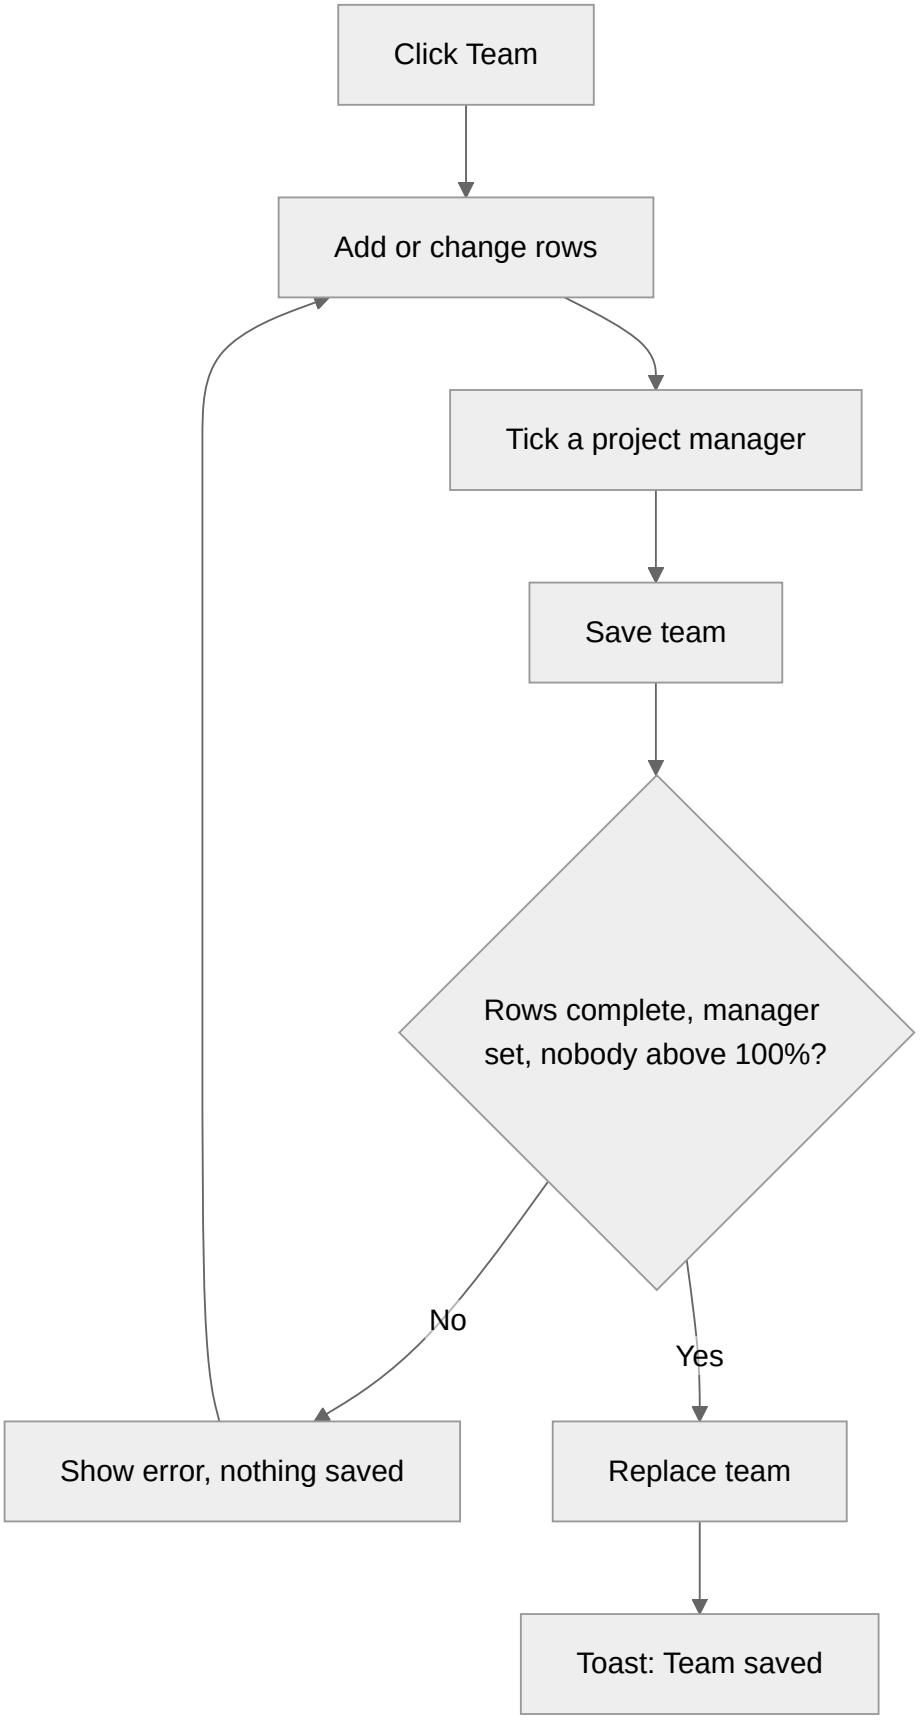

- Name missing → "Name is required."
- Administrator clicks **Skip for now** → project saved with no team; the team can be added later with **Team**.

4.2 Manage a Project Team

Trigger: People join or leave a project · **Actors:** Administrator, System

Step	Actor / System	Action	Result
1	Administrator	Clicks **Team** on a project card	Current team and positions loaded
2	Administrator	Adds a person (picker shows "{n}% remaining" or "Fully allocated"), picks or types a position, enters a percentage	Row added
3	Administrator	Ticks **Project manager** for at least one person with the Manager role	Manager chosen
4	System	On **Save team**, checks every rule for the whole team	All rows saved, or nothing saved
5	System	Shows "Team saved" (or "Team cleared" when no one is left)	Team replaced

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: Anu Thomas already has 50% on project *Mobile App*. The administrator adds her to *Website Revamp* at 60%. Save is refused with "Anu Thomas would be allocated 110% in total. They already have 50% on other projects, so 50% remains." After changing the row to 50%, the team saves.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

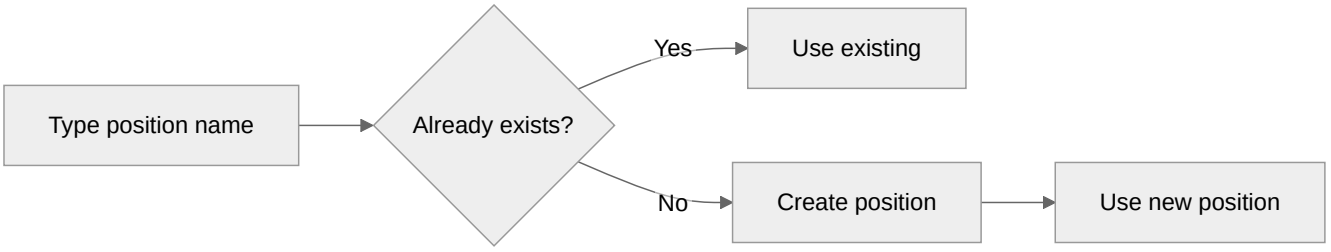

Exceptions / alternate flows:

- No project manager ticked → "Mark at least one person as the project manager."
- A ticked person is not a Manager → "Only a person with the Manager role can manage a project: {names}."
- A person is inactive → "One or more people do not exist or are not active."

4.3 Create a Position

Trigger: A needed position is not in the list · **Actors:** Administrator, System

Step	Actor / System	Action	Result
1	Administrator	Types a new name in a **Position** field (project team or add-employee form)	Name committed
2	System	Uses the existing position if the name matches one, ignoring case	Existing position used
3	System	Otherwise creates the position for everyone to reuse	New position used

Example: The administrator types "qa". TaskFlow uses the existing position "QA". Typing "Business Analyst" creates a new position that appears in every position list.

Exceptions / alternate flows:

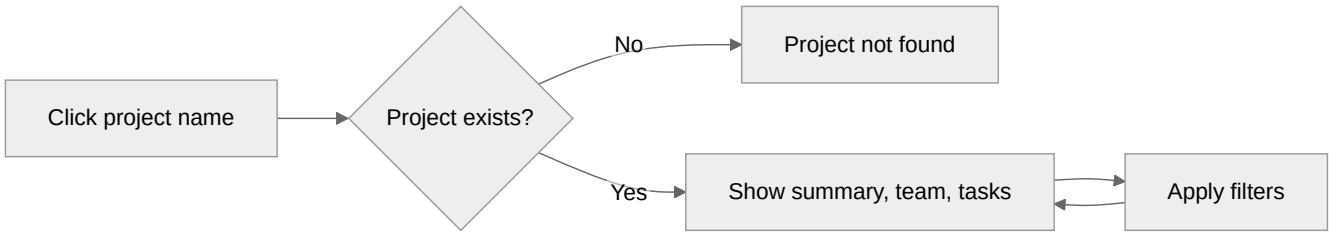

- Creation fails or the user lacks the permission → "The position could not be created."

4.4 View Project Details

Trigger: A user wants to see a project's people and tasks · **Actors:** Administrator, Manager, System

Step	Actor / System	Action	Result
1	User	Clicks a project name on the list	Project Details opens
2	System	Shows summary figures, the team and all tasks, soonest deadline first	Screen filled
3	User	Sets filters	Tasks reload with all filters applied together

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: A manager opens *Website Revamp*: 2 members, 14 tasks, 3 overdue, 43% completed. Filtering by Assigned to "Anu Thomas" and Status "In Progress" shows her 4 open tasks.

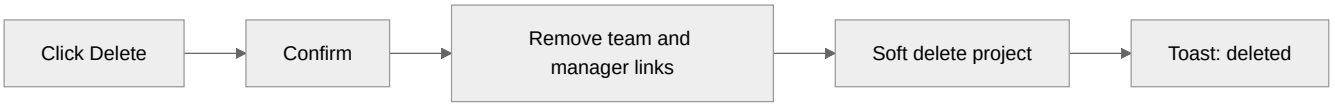

Exceptions / alternate flows:

- Project deleted or wrong link → "Project not found – It may have been deleted, or the link is wrong."

4.5 Delete a Project

Trigger: A project is closed · **Actors:** Administrator, System

Step	Actor / System	Action	Result
1	Administrator	Clicks **Delete** on a card	Confirmation: "Delete project?"
2	System	Takes every person off the project and removes its managers	Allocations freed
3	System	Hides the project (soft delete); its tasks are not deleted	"{name} deleted"

Example: Project *Pilot 2025* with 3 employees is deleted. Each of the 3 people gets their percentage back for other projects; the project's old tasks remain.

Exceptions / alternate flows:

- None; deletion is always allowed for users holding the permission.

---

5. Screen-by-Screen Requirements

SCREEN 1: Project Management (list)

Field	Value
Screen name	Project Management
Module	TaskFlow Management → Project Management
Access	Administrator (full); Manager (read only); custom roles with `projects.view`. Employee: no access

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Field	Value
Priority	Must

Purpose Keep the list of projects and who works on each.

Screen Elements

- Header with the project count and an **Add project** button.
- **Search by name or description** box.
- One card per project: name (link to Project Details), description, "{n} employees", **Manager/Managers** names, **View employees**.
- Card actions: **Team**, **Edit**, **Delete**.

Functional Requirements

ID	Requirement	Priority
REQ-PROJ-01	The system shall list every live project as a card with its name, description, number of employees and manager names.	Must
REQ-PROJ-02	The system shall show the number of projects in the header.	Should
REQ-PROJ-03	The system shall let the user search projects by name or description.	Should
REQ-PROJ-04	The system shall show the Project Management menu item and screen only to users holding `projects.view`, and send other users back to their dashboard.	Must
REQ-PROJ-05	The system shall show **Add project**, **Team**, **Edit** and **Delete** only to users holding the matching permission, so Managers see the list read only.	Must
REQ-PROJ-06	The system shall offer **View employees**, opening Employee Management filtered by the project, only to users who can open Employee Management.	Could
REQ-PROJ-07	The system shall ask for confirmation before deleting a project, stating how many employees will be taken off it.	Must
REQ-PROJ-08	The system shall, on delete, take every person off the project, remove its managers and hide the project, without deleting its tasks.	Must
REQ-PROJ-09	The system shall show an empty-state message when there are no projects.	Could

Validations & Messages

Situation	Rule / message
Delete confirmation	"Delete project?" – ""{name}" will be permanently deleted and its {n} employees will be taken off it." (first part only when the project has no team)
Deleted	"{name} deleted"
List failed	"Could not load projects. Check your connection and try again."
Empty list	"No projects yet – Add the first project to start organising employees."
Delete refused	"Could not delete the project."

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Expected Result Administrators keep an accurate list of projects; Managers can browse every project and its managers.

Change from original BRD: the original BRD has no Project Management screen; this screen is a new requirement.

SCREEN 2: Add / Edit Project (dialog)

Field	Value
Screen name	Add project / Edit project
Module	TaskFlow Management → Project Management
Access	Administrator; custom roles with `projects.create` (add) or `projects.edit` (edit)
Priority	Must

Purpose Enter or change a project's name and description.

Screen Elements

- Name (required), Description.
- **Add project** / **Save** buttons.

Functional Requirements

ID	Requirement	Priority
REQ-PROJ-10	The system shall create a project with a required name of at most 200 characters and an optional description of at most 500 characters.	Must
REQ-PROJ-11	The system shall reject a project name already used by a live project, ignoring case.	Must
REQ-PROJ-12	The system shall let the user change a project's name and description.	Must
REQ-PROJ-13	The system shall open the **Assign team** dialog, with a **Skip for now** option, straight after a project is created.	Should
REQ-PROJ-14	The system shall confirm a successful save with "{name} added" or "{name} updated".	Should

Validations & Messages

Situation	Rule / message
Name missing	"Name is required."
Duplicate name	"Project name already exists."
Saved	"{name} added" · "{name} updated"
Save refused	"Could not add the project." / "Could not update the project."

Expected Result Each project has a unique, clear name, and a new project moves straight on to team building.

Change from original BRD: new requirement (no project screen in the original BRD).

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

SCREEN 3: Project Team / Assign Team (dialog), including Positions

Field	Value
Screen name	Project team (titled **Assign team** right after a project is created)
Module	TaskFlow Management → Project Management
Access	Administrator; custom roles with `projects.members.manage` (people picker also needs `employees.view`); creating a position needs `positions.create`
Priority	Must

Purpose Choose who works on the project, in which position, for what share of time, and who manages it.

Screen Elements

- One row per person: Employee, Position (pick or type), Allocation %, **Project manager** tick box, Remove.
- **Add employee** (picker shows "{n}% remaining" or "Fully allocated").
- **Save team**; **Skip for now** when opened after creation.

Functional Requirements

ID	Requirement	Priority
REQ-PROJ-15	The system shall show the current team with each person's position, allocation percentage and project-manager flag.	Must
REQ-PROJ-16	The system shall show, when picking a person, how much of their time remains ("{n}% remaining" or "Fully allocated").	Should
REQ-PROJ-17	The system shall require every team row to have an employee, a position and a whole percentage from 1 to 100.	Must
REQ-PROJ-18	The system shall allow a person only once on a project.	Must
REQ-PROJ-19	The system shall require at least one project manager on a non-empty team.	Must
REQ-PROJ-20	The system shall allow only people with the Manager role to be ticked as project manager.	Must
REQ-PROJ-21	The system shall accept only existing, active people on a team.	Must
REQ-PROJ-22	The system shall reject a team in which any person's total across all projects would pass 100%, stating their total and what remains.	Must
REQ-PROJ-23	The system shall save the whole team or nothing, even when two administrators save teams at the same time.	Must
REQ-PROJ-24	The system shall confirm with "Team saved", or "Team cleared" when no one is left.	Should
REQ-PROJ-25	The system shall start new rows with the position **Member** when it exists.	Could

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-PROJ-26	The system shall let the user pick a position or type a new one, reusing an existing position whose name matches ignoring case.	Must
REQ-PROJ-27	The system shall create a typed position that does not exist and make it available to everyone.	Must
REQ-PROJ-28	The system shall require a position name of at most 100 characters and remove extra spaces.	Must
REQ-PROJ-29	The system shall provide the built-in positions Member, Manager, QA, Developer, DevOps and System Admin.	Should
REQ-PROJ-30	The system shall treat positions as labels only, granting no access.	Must

Validations & Messages

Situation	Rule / message
Incomplete rows	"Give every row an employee, a position and a percentage, or remove the row."
Bad percentage	"Use a whole percentage from 1 to 100." · "Allocation percentage must be a whole number from 1 to 100."
Over capacity (form)	"{name} is fully allocated on other projects." · "{name} has only {n}% remaining."
Over capacity (on save)	"{name} would be allocated {total}% in total. They already have {other}% on other projects, so {left}% remains."
No manager	"Mark at least one person as the project manager."
Not a Manager	Tooltip "Only a person with the Manager role can manage a project" · "Only a person with the Manager role can manage a project: {names}."
Duplicate person	"A person can only appear once on a project."
Inactive person	"One or more people do not exist or are not active."
Position errors	"Position name is required." · "Position name must be 100 characters or fewer." · "The position could not be created."
Load / save errors	"Could not load the team. Close this and try again." · "Could not save the team."
Saved	"Team saved" · "Team cleared"

Expected Result Every project team has a manager, nobody is over-booked, and positions stay consistent across projects.

Change from original BRD: new requirement (project teams, allocations and positions are not in the original BRD).

SCREEN 4: Project Details

Field	Value
Screen name	Project Details
Module	TaskFlow Management → Project Management
Access	Administrator, Manager; custom roles with `projects.view`

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Field	Value
Priority	Should

Purpose See who is on a project and the project's tasks.

Screen Elements

- Project name and summary figures: members, tasks, **Overdue**, **Completed** (percentage).
- **Team** list (person, position, percentage).
- **Tasks** table: Task, Assignee, Priority, Status, Deadline, "Overdue" badge.
- Filters: Status, Priority, Assigned to, Role (position on this project), Deadline from, Deadline to, **Clear filters**.

Functional Requirements

ID	Requirement	Priority
REQ-PROJ-31	The system shall open Project Details when the user clicks a project name.	Must
REQ-PROJ-32	The system shall show the project's number of members, number of tasks, number of overdue tasks and completed percentage.	Should
REQ-PROJ-33	The system shall list the team with each person's position and percentage.	Must
REQ-PROJ-34	The system shall list all of the project's tasks with task, assignee, priority, status and deadline, soonest deadline first, marking overdue tasks.	Must
REQ-PROJ-35	The system shall filter the tasks by status, priority, assignee, position on the project and deadline range, applying all filters together.	Should
REQ-PROJ-36	The system shall clear all task filters when the user clicks **Clear filters**.	Could
REQ-PROJ-37	The system shall show "Project not found" when the project does not exist or was deleted.	Must

Validations & Messages

Situation	Rule / message
Not found	"Project not found – It may have been deleted, or the link is wrong."
Empty team	"No one is assigned to this project yet."
No tasks	"No tasks yet – Tasks created for this project will appear here."
Load errors	"Could not load the project." · "Could not load the project tasks." · "Could not load the tasks."

Expected Result Managers and administrators see a project's people, progress and tasks on one screen and can narrow the task list quickly.

Change from original BRD: new requirement.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

6. Business Rules

ID	Rule	Applies to
BR-PROJ-01	Every task belongs to a project (see Task Management).	All screens
BR-PROJ-02	A project name is required and unique among live projects, ignoring case.	SCREEN 2
BR-PROJ-03	A person's allocations across all projects never total more than 100% (shared with BR-EMP-10).	SCREEN 3
BR-PROJ-04	Each allocation is a whole percentage from 1 to 100, and a person appears only once on a project.	SCREEN 3
BR-PROJ-05	A non-empty team has at least one project manager, and only a person with the Manager role can be one.	SCREEN 3
BR-PROJ-06	Only existing, active people can be put on a team.	SCREEN 3
BR-PROJ-07	Saving a team is all-or-nothing: if one rule fails, nothing is saved.	SCREEN 3
BR-PROJ-08	Positions are shared labels, unique ignoring case, at most 100 characters; they cannot be renamed or deleted and grant no access.	SCREEN 3
BR-PROJ-09	Deleting a project takes everyone off it and removes its managers; the project is hidden (soft delete) and its tasks are kept (global rule, overall BRD section 6: records with dependent data must not be deleted in a way that damages history).	SCREEN 1
BR-PROJ-10	A manager's team is everyone in the departments they manage plus everyone on the projects they are flagged as manager of; the manager dashboard and task visibility use this team.	SCREEN 3
BR-PROJ-11	Project lists, teams and project tasks are organisation-wide for anyone holding `projects.view`; there is no team limit.	SCREEN 1, SCREEN 4

> Global business rules marked "global rule, overall BRD section 6" are defined in section 6 of the overall BRD (`../../00-Overall/BRD-TaskFlow-Overall.md`); they apply to this sub-module in full.

7. Non-Functional Requirements

The global NFRs in section 7 of the overall BRD (`../../00-Overall/BRD-TaskFlow-Overall.md`) apply. Sub-module-specific requirements:

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Category	Requirement	Measure / target
NFR-PROJ-01	Data integrity	The 100% cap holds when several administrators save teams at the same time	No person's stored total ever exceeds 100%
NFR-PROJ-02	Data integrity	A team save never leaves a half-saved team	Either every row changes or none does
NFR-PROJ-03	Security	Permission checks are enforced by the server, not only by hidden buttons	A call without the needed permission is refused
NFR-PROJ-04	Usability	Allocation feedback is shown before saving	The picker shows remaining percentage; the form flags over-capacity rows
NFR-PROJ-05	Usability	Every refusal states the reason in plain words	Messages as listed in section 5

8. Data Requirements

Entity / data set	Purpose	Key fields	Retention / rules
Project	A body of work that tasks belong to	Name, description	Soft delete; name unique among live projects
Project allocation (team row)	Who works on a project and for how much time	Employee, project, position, percentage, project-manager flag	Removed when the project is deleted; total per person at most 100%
Project manager link	Which Managers manage which projects	Manager, project	Kept in step with the project-manager flags; removed on project delete or when the person stops being a Manager
Position	Label for a person's job on a project	Name	Unique ignoring case; seeded with Member, Manager, QA, Developer, DevOps, System Admin; no rename or delete

9. Integrations & External Dependencies

System / service	Purpose	Required?	Notes
Employee Management	Supplies the people for the team picker; can set first allocations when an employee is added	Required	The picker needs `employees.view`
Department Management	Combined with project-manager flags to form a manager's team	Required	–
Task Management	Supplies the project's tasks for Project Details	Required	Tasks are not changed when a project is deleted
Dashboard / Employee Workload / Reports	Use projects, teams and allocations	Required	Read only from this sub-module's data
Email / Notifications	–	Not used	Project actions send no email or notification

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

10. Reporting Requirements

Not applicable for this sub-module. Project Details shows per-project summary figures (members, tasks, overdue, completed %); formal reports filter by project in Reports (`../../05-Reports/05.1-Reports/BRD-Reports.md`).

11. Recommended Technology Stack (optional)

Not applicable for this sub-module. See the overall BRD.

12. Assumptions, Constraints & Dependencies

Type	Description
Assumption	A "100%" allocation means a person's full working time; part-time work is not modelled separately.
Assumption	Only people with the Manager system role manage projects; custom roles cannot be project managers.
Constraint	Positions can only be picked or created, not renamed or deleted.
Constraint	Project lists and project tasks are organisation-wide for anyone holding `projects.view`.
Dependency	Employee Management (people and roles), Department Management (manager teams), Task Management (tasks).

13. Risks

ID	Risk	Impact	Likelihood	Mitigation
R-PROJ-01	People over-booked across projects	High	Medium	BR-PROJ-03 cap checked for the whole team at save time
R-PROJ-02	Project Details shows every task of a project to anyone with `projects.view`, regardless of their task-view scope	Medium	Medium	⚠️ To be confirmed whether project tasks should follow the task-view scope
R-PROJ-03	Tasks of a deleted project stay without a visible project	Medium	Low	⚠️ To be confirmed how tasks of a deleted project should be shown
R-PROJ-04	The Assign team dialog opens after creation and the position field always tries to create positions, even for users without those permissions	Low	Low	The server refuses the save; ⚠️ To be confirmed whether the screen should hide these options
R-PROJ-05	The delete confirmation says "permanently deleted" although it is a soft delete	Low	Low	⚠️ To be confirmed whether the wording should change

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Risk	Impact	Likelihood	Mitigation
R-PROJ-06	Duplicate or misspelt positions clutter the list, since they cannot be renamed or deleted	Low	Medium	Case-insensitive reuse and space trimming (REQ-PROJ-26, REQ-PROJ-28)

14. Acceptance Criteria

ID	Criterion	Verified by
AC-PROJ-01	The list shows every live project with team size and managers, and search narrows it.	SCREEN 1, REQ-PROJ-01 to REQ-PROJ-03, REQ-PROJ-09
AC-PROJ-02	Managers see projects read only; users without `projects.view` cannot open the screen.	REQ-PROJ-04 to REQ-PROJ-06
AC-PROJ-03	Deleting a project frees every member's allocation, removes its managers and keeps its tasks.	REQ-PROJ-07, REQ-PROJ-08
AC-PROJ-04	A project cannot be saved without a name or with a name already used by a live project.	SCREEN 2, REQ-PROJ-10 to REQ-PROJ-12, REQ-PROJ-14
AC-PROJ-05	After a project is added, the Assign team dialog opens and can be skipped.	REQ-PROJ-13
AC-PROJ-06	A team without a project manager, with a non-Manager ticked, with a repeated or inactive person, or with an incomplete row is refused and nothing is saved.	SCREEN 3, REQ-PROJ-15, REQ-PROJ-17 to REQ-PROJ-21, REQ-PROJ-23, REQ-PROJ-24
AC-PROJ-07	A team that would put anyone above 100% in total is refused with their total and remaining percentage.	REQ-PROJ-16, REQ-PROJ-22
AC-PROJ-08	Typing an existing position name in any case reuses it; a new name creates a shared position; positions grant no access.	REQ-PROJ-25 to REQ-PROJ-30
AC-PROJ-09	Project Details shows correct summary figures, team and tasks, and the filters combine correctly.	SCREEN 4, REQ-PROJ-31 to REQ-PROJ-36
AC-PROJ-10	Opening a deleted or unknown project shows "Project not found".	REQ-PROJ-37

15. Requirements Traceability Matrix

Objective	Business rule(s)	Screen(s)	Functional requirement(s)	Acceptance criterion
OBJ-PROJ-01	BR-PROJ-01, BR-PROJ-02, BR-PROJ-09	SCREEN 1, SCREEN 2	REQ-PROJ-01 – REQ-PROJ-14	AC-PROJ-01, AC-PROJ-02, AC-PROJ-03, AC-PROJ-04, AC-PROJ-05

OBJ-PROJ-05	BR-PROJ-08	SCREEN 3	REQ-PROJ-25 – REQ-PROJ-30	AC-PROJ-08

16. Project Deliverables

#	Deliverable	Format
1	Project Management screens (list, add/edit dialog, team dialog, Project Details)	Application source code
2	Project, allocation, manager-link and position data with the six seeded positions	Database initialisation
3	BRD, FRD, HLD, LLD for Project Management	Markdown
4	Tests for team replacement and the 100% cap	Test project and results

17. Glossary

Term	Meaning
Project	A body of work that tasks belong to
Team	The people allocated to a project
Allocation	The whole percentage (1–100) of a person's time given to one project
Project manager	A team member with the Manager role, flagged to manage the project
Position	A shared label for a person's job on a project (for example Developer); it grants no access
Manager's team	People in the departments a Manager manages plus people on the projects they manage
Soft delete	Hiding a record from every list while keeping it and its history

18. Project Summary

Project Management keeps one list of projects, lets administrators build each project's team with positions and percentages, and makes sure every team has a Manager in charge and nobody is booked above 100%. Positions stay shared and consistent, deleting a project frees its people without losing tasks, and Project Details gives managers a clear view of each project's team, progress and tasks.
