18. Project Summary

1. Project Overview

1.1 Introduction

Employee Workload shows how open work is spread across employees. For each person it shows active, high-priority, overdue and completed task counts, their project allocations, and a "High load" badge for people carrying much more than average. Administrators and Managers use it to balance work and jump to a person's tasks.

1.2 Business Problem / Current Situation

Managers hand out work without seeing how much each person already carries. Some employees are overloaded while others are under-used, and overdue work is noticed only when a deadline is already missed.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

1.3 Project Objectives

Sub-module objectives; they support the global objectives in section 1.3 of the overall BRD (`../../00-Overall/BRD-TaskFlow-Overall.md`).

ID	Objective	Success measure (this sub-module)
OBJ-WORK-01	Simplify employee task allocation	A Manager sees every employee's active load on one screen before assigning or reassigning work
OBJ-WORK-02	Help managers identify pending and overdue tasks	Each employee's overdue count is shown and highlighted when greater than 0
OBJ-WORK-03	Generate reports for better work planning	Project allocation percentages are shown next to task counts, and the list can be narrowed to one project

1.4 Expected Benefits

- Overloaded and under-used employees are spotted before deadlines slip.
- Planning uses both project allocation and actual open tasks.
- One click leads from a busy person to their task list, where work can be reassigned.

---

2. Stakeholders & User Roles

2.1 Stakeholders

Stakeholder	Interest / responsibility
Project owner (Jojo George)	Defines priorities, approves this BRD
Managers	Balance work across employees
Administrators	Oversee load across the organization
Employees	Benefit from fair distribution (no access to this screen by default)

2.2 User Roles

Role	Description	Main responsibilities	Access level
Administrator	System owner	Review load, filter, open an employee's tasks	Organization
Manager	Leads a team	Review load, filter, open an employee's tasks	Organization (the list is not narrowed to the team; the task list opened from it follows the Manager's normal task scope)
Employee	Works on tasks	Is listed on the screen; cannot open it by default	No access

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Role	Description	Main responsibilities	Access level
Custom role	Role defined in Role Configuration	As granted by "View workload" (`workload.view`), "Use workload filters" (`workload.filters.use`) and "Open an employee's tasks" (`workload.tasks.open`)	Organization when granted

3. Scope

3.1 In Scope

- Employee Workload screen with per-employee task counts and project allocations.
- Average active load and "High load" highlighting.
- Project and Employee filters.
- Link from a row to that employee's task list.

3.2 Out of Scope (this release)

- Department column and Department filter – replaced by project allocations and the Project filter.
- A separate workload summary chart – replaced by a per-row workload bar and the header summary; workload charts are on the Dashboard.
- Changing or reassigning tasks on this screen – done on Task Details / Reassign Task (`../02.1-Task-Management/BRD-Task-Management.md`).
- Limiting the list to a Manager's own team.

3.3 Modules Overview

#	Module	Purpose	Screens
1	Employee Workload (TaskFlow Monitoring)	See how open work is spread across employees	Employee Workload

3.4 Change from original BRD

Original BRD (Screen 16)	Current requirement (as built)
Department column	**Projects** column (project name and allocation %) and **Allocated %** total
Filter by department and employee	Filter by **Project** and **Employee**
Workload summary chart	Header summary ("N employees · average X active tasks") and a workload bar per row
"Highlight employees with unusually high active task counts"	Defined as: active count at least **twice the average** of the rows shown ("High load" badge)
Not specified	The list shows active users whose role cannot view all tasks (the Employee role by default), across the whole organization

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

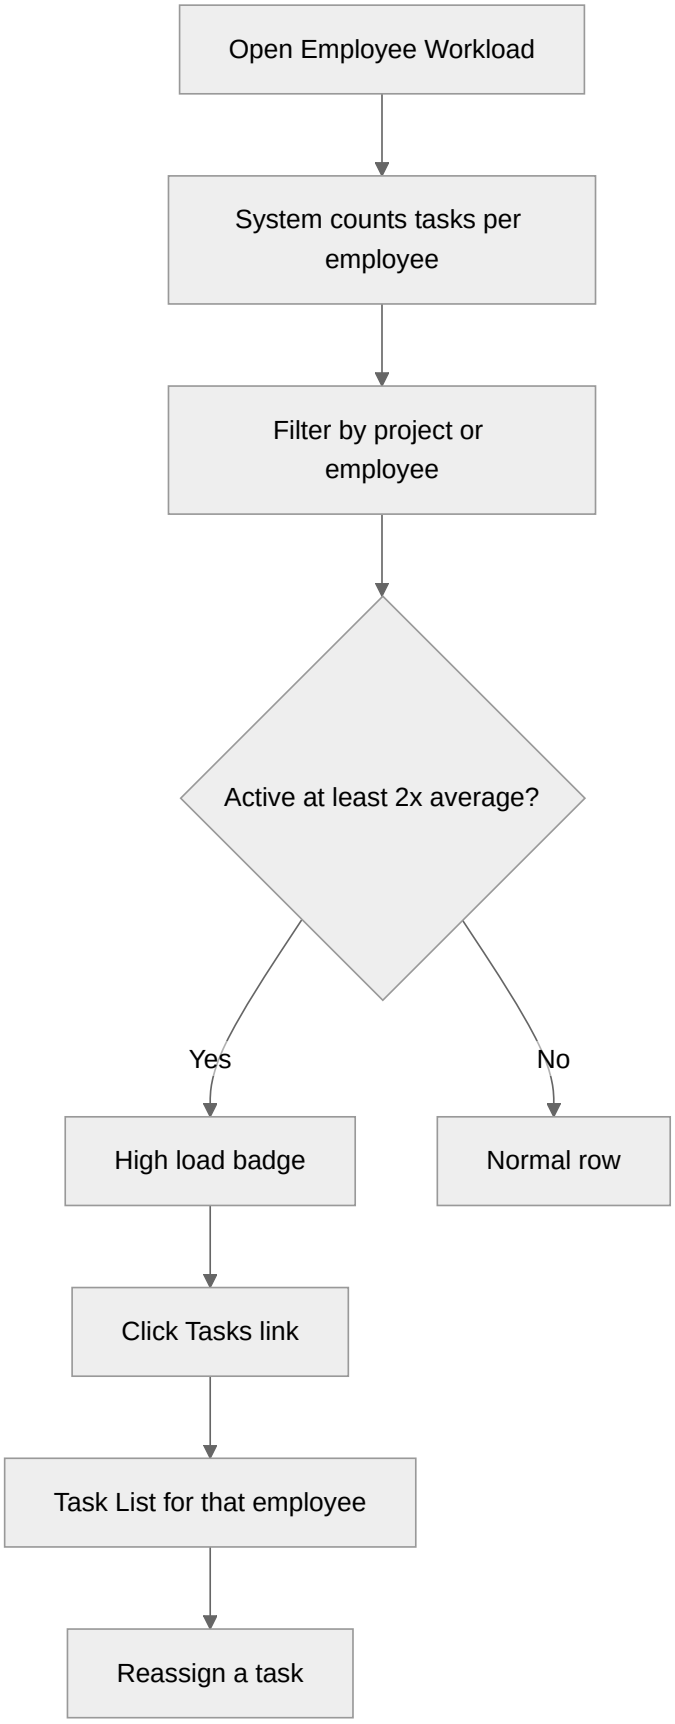

4. Business Process / Workflows

4.1 Review and Balance Workload

Trigger: A Manager plans new work or checks for overload · **Actors:** Manager / Administrator, System

Step	Actor / System	Action	Result
1	Manager	Opens **TaskFlow Monitoring → Employee Workload**	System loads the employee list
2	System	Counts active, high-priority, overdue and completed tasks per employee and the average active load	Table, header summary and legend shown
3	Manager	Optionally picks a **Project** or an **Employee**	List narrowed
4	System	Marks rows with at least twice the average active load as "High load"	Overloaded people stand out
5	Manager	Clicks **Tasks →** on a busy row	Task List opens filtered to that employee
6	Manager	Reassigns a task on Task Details (Task Management)	Load moves to another person

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: On 31-Oct-2026 the list shows 5 employees with 4, 2, 1, 1 and 12 active tasks. The average is 4 active tasks ("5 employees · average 4 active tasks"). Asha has 12 active tasks (12 ≥ 8), 3 of them overdue, so her row carries "High load" and the overdue count is highlighted. The Manager clicks **Tasks →** on Asha's row, opens `TSK-000123` and reassigns it to Rahul, who has 1 active task.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Exceptions / alternate flows:

- No employee allocated to the chosen project → "No employees to show – There are no active employees in this project."
- Load failure → "Could not load the workload. Check your connection and try again."
- User without "View workload" → the menu item is hidden and the screen sends the user back to their dashboard.

---

5. Screen-by-Screen Requirements

SCREEN 1: Employee Workload

Field	Value
Screen name	Employee Workload
Module	TaskFlow Monitoring → Employee Workload
Access	Administrator, Manager; Custom role with "View workload" (`workload.view`); Employee: no access by default
Priority	Must
Development plan ref	Original Screen 16

Purpose Show how open work is spread across employees so managers can balance it.

Screen Elements

- Header: "N employees · average X active tasks".
- Filters: **Project**, **Employee**, **Reset**.
- Table: Employee (with "High load" badge), Projects (name and %), Allocated %, Active, High priority, Overdue, Completed, workload bar, **Tasks →** link.
- Legend: "Highlighted rows carry at least twice the average active load (X active tasks)."

Functional Requirements

ID	Requirement	Priority
REQ-WORK-01	The system shall list every active user whose role cannot view all tasks (the Employee role by default), ordered by name.	Must
REQ-WORK-02	The system shall show each employee's Active count: tasks that are not completed, cancelled or deleted.	Must
REQ-WORK-03	The system shall show each employee's High priority count: active tasks with High or Critical priority.	Must
REQ-WORK-04	The system shall show each employee's Overdue count (active tasks past their deadline) and highlight it when greater than 0.	Must
REQ-WORK-05	The system shall show each employee's Completed count.	Must

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-WORK-06	The system shall list employees with no tasks with zero counts.	Should
REQ-WORK-07	The system shall show each employee's project allocations (project name and percentage) and the Allocated % total.	Should
REQ-WORK-08	The system shall show the number of employees listed and their average active tasks in the header.	Should
REQ-WORK-09	The system shall mark with a "High load" badge every row whose active count is at least twice the average of the rows shown, when the average is above 0, and explain this in the legend.	Must
REQ-WORK-10	The system shall show a workload bar per row, scaled to the busiest row shown.	Could
REQ-WORK-11	The system shall filter by Project, showing only people allocated to that project.	Should
REQ-WORK-12	The system shall filter by Employee and offer **Reset** to clear both filters.	Should
REQ-WORK-13	The system shall show the filters only to users with "Use workload filters".	Should
REQ-WORK-14	The system shall open the Task List filtered to the employee from the row's **Tasks →** link, shown only to users with "Open an employee's tasks"; the user's own task scope still applies.	Must
REQ-WORK-15	The system shall show the menu item and screen only to users with "View workload" and refuse the data to anyone else.	Must
REQ-WORK-16	The system shall cover the whole organization, not only a Manager's team.	Must
REQ-WORK-17	The system shall not change any data from this screen.	Should

Validations & Messages

Situation	Rule / message
Load failed	"Could not load the workload. Check your connection and try again."
No rows	"No employees to show – There are no active employees in this project."
Legend	"Highlighted rows carry at least twice the average active load (X active tasks)."
No permission	Menu item hidden; the screen sends the user to their dashboard; the data is refused

Expected Result Managers and Administrators see workload imbalances and overdue work across employees and open a person's tasks to rebalance them.

---

6. Business Rules

Global rules from the overall BRD, section 6 that apply here: only authorised users manage tasks; the overdue definition; one application time zone; dashboard statistics and reports use consistent calculation rules.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Rule	Applies to
BR-WORK-01	Active = not completed, cancelled or deleted; High priority = active and High or Critical; Overdue = active and deadline passed; Completed = status Completed.	SCREEN 1
BR-WORK-02	Listed people are active users whose role does not hold "View all tasks"; inactive users are never listed.	SCREEN 1
BR-WORK-03	"High load" = active count at least twice the average active count of the rows currently shown; no badge when the average is 0.	SCREEN 1
BR-WORK-04	Allocated % is the sum of the person's project allocation percentages.	SCREEN 1
BR-WORK-05	The **Tasks →** link never widens what the user may see: the Task List applies the user's own task scope.	SCREEN 1
BR-WORK-06	Workload, filters and the **Tasks →** link need "View workload"; filters and link also need their own permissions, each of which requires "View workload".	SCREEN 1

7. Non-Functional Requirements

The global NFRs in the overall BRD apply. Requirements specific to this sub-module:

ID	Category	Requirement	Measure / target
NFR-WORK-01	Performance	Counts are calculated in one request for all listed employees	One load per screen open or Project change; the Employee filter works without reloading
NFR-WORK-02	Security	The workload data is refused without "View workload"	A direct request without the permission is refused
NFR-WORK-03	Usability	Overload and overdue work stand out without reading every number	"High load" badge, highlighted Overdue, legend
NFR-WORK-04	Reliability	The screen is read-only	No data is changed by viewing or filtering
NFR-WORK-05	Maintainability	Workload counts use the same active, overdue and priority definitions as the Dashboard and Reports	BR-WORK-01 and the global calculation-consistency rule (overall BRD, section 6)
NFR-WORK-06	Compatibility	As global NFRs	Overall BRD
NFR-WORK-07	Accessibility	As global NFRs	Overall BRD

8. Data Requirements

This sub-module stores no data of its own; it reads the data below.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Entity / data set	Purpose	Key fields	Retention / rules
Users	Listed employees	Name, active flag, role	Only active users whose role lacks "View all tasks"
Project allocations	Projects column, Allocated %, Project filter	User, project, position, allocation %	Owned by Employee and Project Management
Tasks	The four counts	Assignee, status, priority, deadline, deleted flag	Owned by Task Management; deleted tasks are not counted

9. Integrations & External Dependencies

System / service	Purpose	Required?	Notes
Task Management	Task data for counts; target of the **Tasks →** link	Required	`../02.1-Task-Management/BRD-Task-Management.md`
Employee / Project Management	Employees and project allocations	Required	Allocations are maintained there
Role Configuration	Workload permissions; which roles hold "View all tasks" decides who is listed	Required	–
Notifications / Mail	–	Not used	Read-only screen

10. Reporting Requirements

Not applicable for this sub-module. Workload is an on-screen view; exportable reports are in `../../05-Reports/05.1-Reports/BRD-Reports.md`.

11. Recommended Technology Stack (optional)

Not applicable for this sub-module. The recommended stack is in the overall BRD.

12. Assumptions, Constraints & Dependencies

Type	Description
Assumption	Global objectives and business rules are defined in the overall BRD (`../../00-Overall/BRD-TaskFlow-Overall.md`, sections 1.3 and 6) and are referenced here by description, not by number
Assumption	Project allocations are kept up to date in Management
Constraint	The list is organization-wide; a Manager also sees employees outside the team
Constraint	"High load" is relative to the rows shown, so it changes with the filters
Dependency	Who is listed depends on which roles hold "View all tasks" in Role Configuration

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

13. Risks

ID	Risk	Impact	Likelihood	Mitigation
R-WORK-01	The filter and **Tasks →** permissions are enforced only on the screen; the Project filter works by direct request without "Use workload filters"	Low	Low	The data itself still needs "View workload"; add a server check later
R-WORK-02	A Manager sees load counts of employees outside the team	Medium	High	Accepted for this release (REQ-WORK-16); the task list keeps the team limit
R-WORK-03	A role that holds "View all tasks" only through an older permission name could still be listed as an employee	Low	Low	Keep role permissions current in Role Configuration
R-WORK-04	Managers expecting a Department view (original BRD) do not find it	Low	Medium	Use the Project filter; department views are on the Dashboard

14. Acceptance Criteria

ID	Criterion	Verified by
AC-WORK-01	Only active users whose role cannot view all tasks are listed, by name, including those with no tasks (zero counts).	SCREEN 1, REQ-WORK-01, REQ-WORK-06
AC-WORK-02	For a sample employee, Active, High priority, Overdue and Completed match the task data, and Overdue greater than 0 is highlighted.	SCREEN 1, REQ-WORK-02, REQ-WORK-03, REQ-WORK-04, REQ-WORK-05
AC-WORK-03	Projects and Allocated % match the employee's allocations.	SCREEN 1, REQ-WORK-07
AC-WORK-04	With 5 employees averaging 4 active tasks, a person with 8 or more active tasks shows "High load"; the header and legend show the average; bars scale to the busiest row.	SCREEN 1, REQ-WORK-08, REQ-WORK-09, REQ-WORK-10
AC-WORK-05	Picking a project lists only people allocated to it; picking an employee shows only that person; Reset clears both; filters are hidden without "Use workload filters".	SCREEN 1, REQ-WORK-11, REQ-WORK-12, REQ-WORK-13
AC-WORK-06	**Tasks →** opens the Task List for that employee, within the user's own task scope, and is hidden without "Open an employee's tasks".	SCREEN 1, REQ-WORK-14
AC-WORK-07	An Employee cannot see the menu item or the data; a Manager sees the whole organization; nothing is changed by using the screen.	SCREEN 1, REQ-WORK-15, REQ-WORK-16, REQ-WORK-17

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

15. Requirements Traceability Matrix

Objective	Business rule(s)	Screen(s)	Functional requirement(s)	Acceptance criterion
OBJ-WORK-01	BR-WORK-02, BR-WORK-03, BR-WORK-05	SCREEN 1	REQ-WORK-01, REQ-WORK-02, REQ-WORK-06, REQ-WORK-08, REQ-WORK-09, REQ-WORK-10, REQ-WORK-14	AC-WORK-01, AC-WORK-02, AC-WORK-04, AC-WORK-06
OBJ-WORK-02	Global (overall §6), BR-WORK-01	SCREEN 1	REQ-WORK-03, REQ-WORK-04, REQ-WORK-05	AC-WORK-02
OBJ-WORK-03	BR-WORK-04	SCREEN 1	REQ-WORK-07, REQ-WORK-11, REQ-WORK-12, REQ-WORK-13	AC-WORK-03, AC-WORK-05
OBJ-WORK-01	Global (overall §6), BR-WORK-06	SCREEN 1	REQ-WORK-15, REQ-WORK-16, REQ-WORK-17	AC-WORK-07

16. Project Deliverables

#	Deliverable	Format
1	Employee Workload screen and its server function	Repository (source code)
2	BRD, FRD, HLD and LLD for Employee Workload	Markdown
3	Unit and integration tests for workload counts, custom roles and loading the workload data	Repository (automated tests)
4	Sample employees, allocations and tasks for demonstration	Seed data

17. Glossary

Term	Meaning
Active task	A task that is not completed, cancelled or deleted
High priority task	An active task with High or Critical priority
Overdue task	An active task whose deadline has passed
Allocation	A person's share (percentage) of a project, with a position
Allocated %	The sum of a person's project allocations
High load	Active count at least twice the average of the rows shown
Task scope	The set of tasks a user may see: Own, Team or Organization

18. Project Summary

Employee Workload gives Administrators and Managers one view of how open work is spread across employees: active, high-priority, overdue and completed counts next to project allocations, with overloaded people flagged. From any row they open that person's tasks and rebalance work through Task Management, reducing missed deadlines caused by uneven allocation.
