18. Project Summary

1. Project Overview

1.1 Introduction

The Board (Kanban) shows the tasks a user may access as status columns. Users with the status permission drag a card to another column to change the task's status, and click a card to open its details. It gives everyone a quick visual picture of where work stands.

1.2 Business Problem / Current Situation

A list of tasks does not show at a glance how much work is waiting, in progress, in testing, blocked or done. Updating a status means opening each task, and late work is easy to overlook.

1.3 Project Objectives

Sub-module objectives; they support the global objectives in section 1.3 of the overall BRD (`../../00-Overall/BRD-TaskFlow-Overall.md`).

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Objective	Success measure (this sub-module)
OBJ-BOARD-01	Monitor the progress of assigned tasks	All accessible tasks are visible by status on one screen, with a count per column
OBJ-BOARD-02	Help managers identify pending and overdue tasks	Overdue cards are highlighted on the board
OBJ-BOARD-03	Maintain a history of task updates and changes	Every accepted card move appears in the task's activity history

1.4 Expected Benefits

- One visual overview of work by stage for every role.
- Fastest way to update a status: one drag, same rules and history as Task Details.
- Late work stands out without opening tasks.

---

2. Stakeholders & User Roles

2.1 Stakeholders

Stakeholder	Interest / responsibility
Project owner (Jojo George)	Defines priorities, approves this BRD
Managers	Follow their team's progress, move tasks
Employees	Move their own tasks through the stages
Administrators	Overview of all work

2.2 User Roles

Role	Description	Main responsibilities	Access level
Administrator	System owner	View, filter, move any task	Organization (all tasks)
Manager	Leads a team	View, filter, move team tasks	Team, plus tasks they created, are assigned or are notified about
Employee	Works on tasks	View, filter, move own tasks	Own (tasks they are assigned, created or are notified about)
Custom role	Role defined in Role Configuration	As granted by "View board" (`board.view`), "Use board filters" (`board.filters.use`) and "Update task status" (`tasks.status.change`)	Follows the user's task scope

---

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

3. Scope

3.1 In Scope

- Board screen with five status columns and task cards.
- Drag-and-drop status change using the Task Management status rules.
- Project, Assignee, Status and Deadline filters.
- Refresh and open-task-from-card.

3.2 Out of Scope (this release)

- A Cancelled column – cancelled tasks are not shown on the board.
- Re-ordering cards within a column – the order always follows the deadline.
- Paging of the board – all accessible tasks are loaded at once.
- Notifications for a status change – status changes are recorded in the history only.
- Editing task details on the board – done on Task Details (`../02.1-Task-Management/BRD-Task-Management.md`).

3.3 Modules Overview

#	Module	Purpose	Screens
1	Board (TaskFlow Monitoring)	See tasks by status and move them	Board (Kanban)

3.4 Change from original BRD

Original BRD (Screen 10)	Current requirement (as built)
Four columns: To Do, In Progress, Blocked, Completed	Five columns: To Do, In Progress, **In QA**, Blocked, Completed
Cancelled status not mentioned	Cancelled tasks have no column and are not shown
Card shows ID, title, assignee, priority, deadline, status	Card shows code, priority, title, **project**, assignee and deadline; the column gives the status
No filters	Filters for Project, Assignee, Status and Deadline range
"Refresh the board"	A **Refresh** button reloads the latest statuses

4. Business Process / Workflows

4.1 Move a Card to a New Status

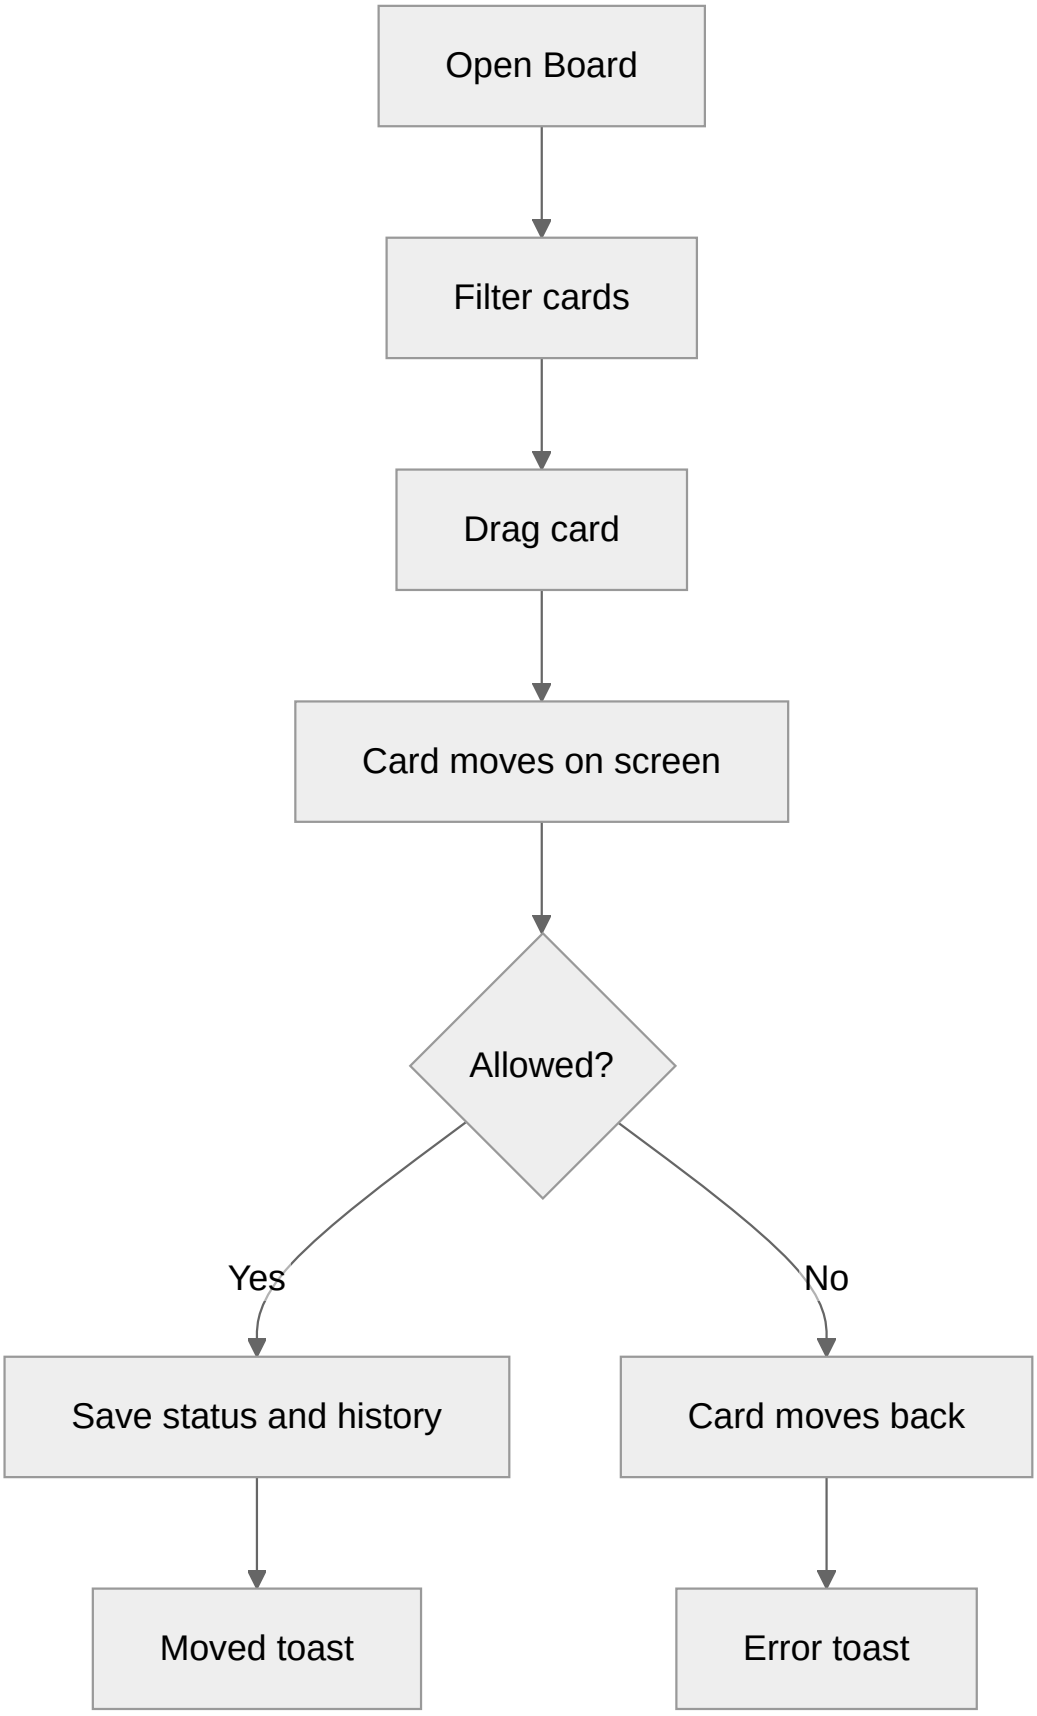

Trigger: Work on a task moves to its next stage · **Actors:** Employee / Manager / Administrator, System

Step	Actor / System	Action	Result
1	User	Opens **Board**	Accessible tasks shown by status, ordered by deadline

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Step	Actor / System	Action	Result
2	User	Optionally filters by project, assignee, status or deadline	Cards narrowed
3	User	Drags a card to another column	Card moves on screen at once
4	System	Checks the permission, task access and the status rules	Move accepted or refused
5	System	Saves the status and records "Status changed from X to Y" ("Task completed" when completed)	Toast "TSK-... moved to Y"
6	System	On refusal, returns the card to its column	Error toast with the reason

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: On 03-Nov-2026 Rahul opens the board, filters by project "Finance Ops" and drags `TSK-000123` "Prepare Monthly Report" from To Do to In Progress. The toast reads "TSK-000123 moved to In Progress" and the task history shows "Status changed from ToDo to InProgress". On 06-Nov-2026

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

he drags it to In QA. Later he tries to drag a Completed card back to In Progress; the card returns to Completed and the toast reads "Cannot move a task from Completed to InProgress.".

Exceptions / alternate flows:

- User without "Update task status" → cards cannot be dragged.
- Server error → the card returns and the toast reads "Could not move TSK-000123.".
- Load failure → "Could not load the board. Try again."
- Card clicked → Task Details opens; Back returns to the board.

---

5. Screen-by-Screen Requirements

SCREEN 1: Board (Kanban)

Field	Value
Screen name	Board
Module	TaskFlow Monitoring → Board (users who can view all tasks), or Task Management → Board (everyone else)
Access	Administrator, Manager, Employee; Custom role with "View board" (`board.view`); content follows the user's task scope
Priority	Must
Development plan ref	Original Screen 10

Purpose Show accessible tasks as status columns and let users drag a card to change its status.

Screen Elements

- Header: "N tasks across 5 stages" and **Refresh**.
- Filter row: Project, Assignee, Status, Deadline from, Deadline to, **Clear filters**.
- Columns: To Do, In Progress, In QA, Blocked, Completed, each with a count.
- Cards: task code, priority, title, project, assignee, deadline; overdue cards and deadlines highlighted.
- Empty column text "Drop tasks here".

Functional Requirements

ID	Requirement	Priority
REQ-BOARD-01	The system shall show the tasks in the user's task scope (own, team or organization) in the columns To Do, In Progress, In QA, Blocked and Completed, with a count per column.	Must
REQ-BOARD-02	The system shall not show cancelled or deleted tasks on the board.	Must
REQ-BOARD-03	The system shall show on each card the task code, priority, title, project, assignee and deadline.	Must
REQ-BOARD-04	The system shall highlight overdue cards and their deadlines.	Must

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-BOARD-05	The system shall order cards in each column by deadline and not allow manual re-ordering within a column.	Should
REQ-BOARD-06	The system shall show the total, e.g. "N tasks across 5 stages".	Could
REQ-BOARD-07	The system shall let users with "Update task status" drag a card to another column to change the task's status, and disable dragging for everyone else.	Must
REQ-BOARD-08	The system shall apply the same status rules as Task Details and refuse any move they do not allow, showing the reason.	Must
REQ-BOARD-09	The system shall move the card on screen at once and return it to its column if the move is refused or fails.	Should
REQ-BOARD-10	The system shall confirm an accepted move with "TSK-... moved to `<status>`".	Should
REQ-BOARD-11	The system shall record "Status changed from X to Y", and "Task completed" when moved to Completed, in the task's history.	Must
REQ-BOARD-12	The system shall filter by project, status and an inclusive deadline from/to range, combining all chosen filters.	Should
REQ-BOARD-13	The system shall offer the Assignee filter only to users who can view all tasks.	Should
REQ-BOARD-14	The system shall show the filter row only to users with "Use board filters".	Should
REQ-BOARD-15	The system shall show "Drop tasks here" in an empty column and "No tasks match the current filters." when filters hide every task.	Could
REQ-BOARD-16	The system shall reload the latest statuses when the user clicks **Refresh**.	Must
REQ-BOARD-17	The system shall open Task Details when a card is clicked, with Back returning to the board.	Must
REQ-BOARD-18	The system shall show the Board menu item and screen only to users with "View board" and send others back to their dashboard.	Must

Validations & Messages

Situation	Rule / message
Move accepted	"TSK-000123 moved to In Progress"
Move not allowed	"Cannot move a task from Completed to InProgress." (statuses vary)
Move failed (other)	"Could not move TSK-000123."
Load failed	"Could not load the board. Try again."
Filters hide all cards	"No tasks match the current filters."
No permission	Menu item hidden; the screen sends the user back to their dashboard

Expected Result Users see their accessible tasks by status at a glance, spot overdue cards, and move tasks to their next allowed status by dragging, with every move recorded.

6. Business Rules

Global rules from the overall BRD, section 6 that apply here: only authorised users modify tasks; employees update only tasks they may manage; the overdue definition; important changes are recorded; one application time zone.

ID	Rule	Applies to
BR-BOARD-01	The board shows exactly the tasks of the user's task-list scope (Own, Team or Organization).	SCREEN 1
BR-BOARD-02	A card move follows BR-TASK-03: Completed and Cancelled are final, so Completed cards cannot be moved out.	SCREEN 1
BR-BOARD-03	A card is overdue when its deadline has passed and it is not completed or cancelled.	SCREEN 1
BR-BOARD-04	All filters work together (AND); the deadline range includes both end dates.	SCREEN 1
BR-BOARD-05	"Use board filters" requires "View board"; the Assignee filter also requires "View all tasks".	SCREEN 1
BR-BOARD-06	Dropping a card in its own column changes nothing.	SCREEN 1

7. Non-Functional Requirements

The global NFRs in the overall BRD apply. Requirements specific to this sub-module:

ID	Category	Requirement	Measure / target
NFR-BOARD-01	Performance	Filtering does not reload data	Filters apply on screen to the loaded tasks; one load per open or Refresh
NFR-BOARD-02	Security	Status permission, task access and status rules are checked on the server for every move	A refused move leaves the task unchanged
NFR-BOARD-03	Usability	Moves feel immediate and failures are visible	Card moves at once; on refusal it returns and a message explains why
NFR-BOARD-04	Reliability	The board never shows a status the server did not accept	Refused moves are rolled back on screen
NFR-BOARD-05	Maintainability	One set of status rules for board and Task Details	Shared transition table (BR-TASK-03)
NFR-BOARD-06	Compatibility	Drag-and-drop works in the supported browsers	As global NFRs in the overall BRD
NFR-BOARD-07	Accessibility	As global NFRs	Overall BRD

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

8. Data Requirements

This sub-module stores no data of its own.

Entity / data set	Purpose	Key fields	Retention / rules
Tasks	Cards and their columns	Code, title, project, assignee, priority, deadline, status, completed time, deleted flag	Owned by Task Management; the status is updated on a move
Activity history entries	Record of each move	Task, event type, old and new status, user, time	Owned by Task Management; never changed by users

9. Integrations & External Dependencies

System / service	Purpose	Required?	Notes
Task Management	Tasks, task scope, status rules, history, Task Details	Required	`../02.1-Task-Management/BRD-Task-Management.md`
Role Configuration	Board and status permissions	Required	–
Settings (Application)	Application time zone for overdue	Required	–
Notifications / Mail	–	Not used	Status changes send no notification

10. Reporting Requirements

Not applicable for this sub-module. Status reports are in `../../05-Reports/05.1-Reports/BRD-Reports.md`.

11. Recommended Technology Stack (optional)

Not applicable for this sub-module. The recommended stack is in the overall BRD.

12. Assumptions, Constraints & Dependencies

Type	Description
Assumption	Global objectives and business rules are defined in the overall BRD (`../../00-Overall/BRD-TaskFlow-Overall.md`, sections 1.3 and 6) and are referenced here by description, not by number
Assumption	The number of accessible tasks stays small enough to load the whole board at once
Constraint	No Cancelled column; no manual card order

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Type	Description
Dependency	Task Management for scope, status rules and history

13. Risks

ID	Risk	Impact	Likelihood	Mitigation
R-BOARD-01	Large task volumes slow the board, because it is not paged	Medium	Low	Use filters; add paging or server filtering in a later release
R-BOARD-02	"Use board filters" is enforced only on the screen	Low	Low	Filters only narrow data the user may already see
R-BOARD-03	Cancelled tasks are invisible on the board	Low	Medium	Find them in the Task List with the Status filter
R-BOARD-04	The Task List **Board view** button is shown even without "View board"; the board then sends the user back	Low	Medium	Hide the button without the permission

14. Acceptance Criteria

ID	Criterion	Verified by
AC-BOARD-01	An Employee, a Manager and an Administrator each see their own scope of tasks in five columns with correct counts; cancelled and deleted tasks are absent.	SCREEN 1, REQ-BOARD-01, REQ-BOARD-02, REQ-BOARD-06
AC-BOARD-02	Cards show code, priority, title, project, assignee and deadline, ordered by deadline; overdue cards are highlighted.	SCREEN 1, REQ-BOARD-03, REQ-BOARD-04, REQ-BOARD-05
AC-BOARD-03	Dragging To Do → In Progress saves the status, shows "TSK-... moved to In Progress" and adds a "Status changed" entry to the history.	SCREEN 1, REQ-BOARD-07, REQ-BOARD-10, REQ-BOARD-11
AC-BOARD-04	Dragging Completed → In Progress is refused, the card returns and the reason is shown; without "Update task status" cards cannot be dragged.	SCREEN 1, REQ-BOARD-07, REQ-BOARD-08, REQ-BOARD-09
AC-BOARD-05	Filters narrow the cards with AND and inclusive dates; Assignee appears only for view-all users; the filter row is hidden without "Use board filters"; empty states show.	SCREEN 1, REQ-BOARD-12, REQ-BOARD-13, REQ-BOARD-14, REQ-BOARD-15
AC-BOARD-06	Refresh shows a status changed elsewhere; clicking a card opens Task Details and Back returns to the board; without "View board" the screen is not reachable.	SCREEN 1, REQ-BOARD-16, REQ-BOARD-17, REQ-BOARD-18

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

15. Requirements Traceability Matrix

Objective	Business rule(s)	Screen(s)	Functional requirement(s)	Acceptance criterion
OBJ-BOARD-01	Global (overall §6), BR-BOARD-01, BR-BOARD-02, BR-BOARD-06	SCREEN 1	REQ-BOARD-01, REQ-BOARD-02, REQ-BOARD-03, REQ-BOARD-05, REQ-BOARD-06, REQ-BOARD-07, REQ-BOARD-08, REQ-BOARD-09, REQ-BOARD-10	AC-BOARD-01, AC-BOARD-02, AC-BOARD-03, AC-BOARD-04
OBJ-BOARD-01	BR-BOARD-04, BR-BOARD-05	SCREEN 1	REQ-BOARD-12, REQ-BOARD-13, REQ-BOARD-14, REQ-BOARD-15, REQ-BOARD-16, REQ-BOARD-17, REQ-BOARD-18	AC-BOARD-05, AC-BOARD-06
OBJ-BOARD-02	Global (overall §6), BR-BOARD-03	SCREEN 1	REQ-BOARD-04	AC-BOARD-02
OBJ-BOARD-03	Global (overall §6)	SCREEN 1	REQ-BOARD-11	AC-BOARD-03

16. Project Deliverables

#	Deliverable	Format
1	Board screen with drag-and-drop and filters	Repository (source code)
2	BRD, FRD, HLD and LLD for the Board	Markdown
3	Tests for the shared status transition rules	Repository (automated tests)
4	Sample tasks in every status for demonstration	Seed data

17. Glossary

Term	Meaning
Board / Kanban	A view of tasks as columns, one per status
Card	One task on the board
Column	A status: To Do, In Progress, In QA, Blocked or Completed
In QA	The task is being checked before it is completed
Overdue card	A card whose deadline has passed and whose task is not completed or cancelled
Task scope	The set of tasks a user may see: Own, Team or Organization

18. Project Summary

The Board gives every TaskFlow user a visual overview of their accessible work across To Do, In Progress, In QA, Blocked and Completed. Overdue cards stand out, and a single drag moves a task to its next allowed status under the same rules and history as Task Details, so progress is easy to follow and quick to update.
