1. Project Overview

1.1 Introduction

Employee Management (menu **TaskFlow Management → Employee Management**) is where administrators keep the list of people who use TaskFlow. Each employee is a sign-in account with a role, departments and project allocations. Here an administrator adds people, edits them, switches accounts on or off, removes people who have left and resets lost two-step verification (MFA).

1.2 Business Problem / Current Situation

- Without one owner of the employee list, sign-in accounts, roles and team membership drift apart and people keep access after they leave.
- A "reports to" list kept by hand goes out of date; TaskFlow instead derives a person's managers from departments and projects.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

- Removing the wrong account (the last Administrator, your own account, or someone still holding open work) can lock the organisation out or orphan tasks.
- People who lose their authenticator phone and backup codes cannot sign in without administrator help.

1.3 Project Objectives

ID	Objective	Success measure
OBJ-EMP-01	Keep accurate employee accounts in one place	An administrator adds a person with role, departments and projects in one side panel; the list shows every live employee
OBJ-EMP-02	Control who can sign in	A deactivated or deleted person cannot sign in; their existing sessions end at once
OBJ-EMP-03	Protect the system from lock-out and mistakes	There is always at least one active Administrator; nobody can delete their own account
OBJ-EMP-04	Keep history when people leave	Deleting an employee keeps all their tasks, comments and mail
OBJ-EMP-05	Help people who lost their authenticator	An administrator resets MFA and the person can sign in with their password again

These objectives support the overall TaskFlow objectives in `../../00-Overall/BRD-TaskFlow-Overall.md`.

1.4 Expected Benefits

- Organisation: one trusted list of people that tasks, dashboards, workload, reports and the TaskFlow Assistant rely on.
- Administrators: fast account set-up, safe deactivation and deletion, and immediate effect of access changes.
- Managers: correct teams, because managers follow automatically from departments and projects.
- Employees: a working account with the right role, and a recovery path if they lose their authenticator.

---

2. Stakeholders & User Roles

2.1 Stakeholders

Stakeholder	Interest / responsibility
Project owner (Jojo George)	Defines priorities, approves this BRD
Administrators	Maintain employee accounts, roles and status
Managers	Rely on correct employee data for assignment and team views
Employees	Need a working, correctly-roled account

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

2.2 User Roles

Role	Description	Main responsibilities	Access level
Administrator	Full system owner	Add, edit, activate/deactivate, delete employees; assign any role; reset MFA	Organisation
Manager	Plans and assigns work	No Employee Management screen; may list people in other screens (for example the task assignee picker) through `employees.view`	Organisation list, read only, through other screens
Employee	Works on tasks	No access to this sub-module	None
Custom role	Role built in Role Configuration	Whatever employee permissions it is granted; sees the screen only with at least one employee action permission	As granted (Organisation)

3. Scope

3.1 In Scope

- Employee list with search and filters (project, role, status).
- Employee details side panel (read only), including derived managers and, for Managers, the projects they manage and their team.
- Add employee: personal details, role, departments, project allocations, temporary password and initial status.
- Edit employee: code, name, username, email and role.
- Activate / deactivate accounts.
- Delete (soft delete) employees with safety checks.
- Reset an employee's authenticator MFA.

3.2 Out of Scope (this release)

- Changing a person's departments or project allocations after creation – done in Department Management and Project Management.
- Setting or resetting another person's password – people change their own password in My Profile or through account recovery.
- Self-registration – only administrators create accounts.
- Bulk import or export of employees – not requested.
- A Department filter on the employee list – not offered by the screen (see SCREEN 1 change note).

3.3 Modules Overview

#	Module	Purpose	Screens
1	TaskFlow Management → Employee Management	Sign-in accounts, roles, status, deletion and MFA reset for every person	Employee Management (list), Employee details (side panel), Add / Edit employee (side panel)

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

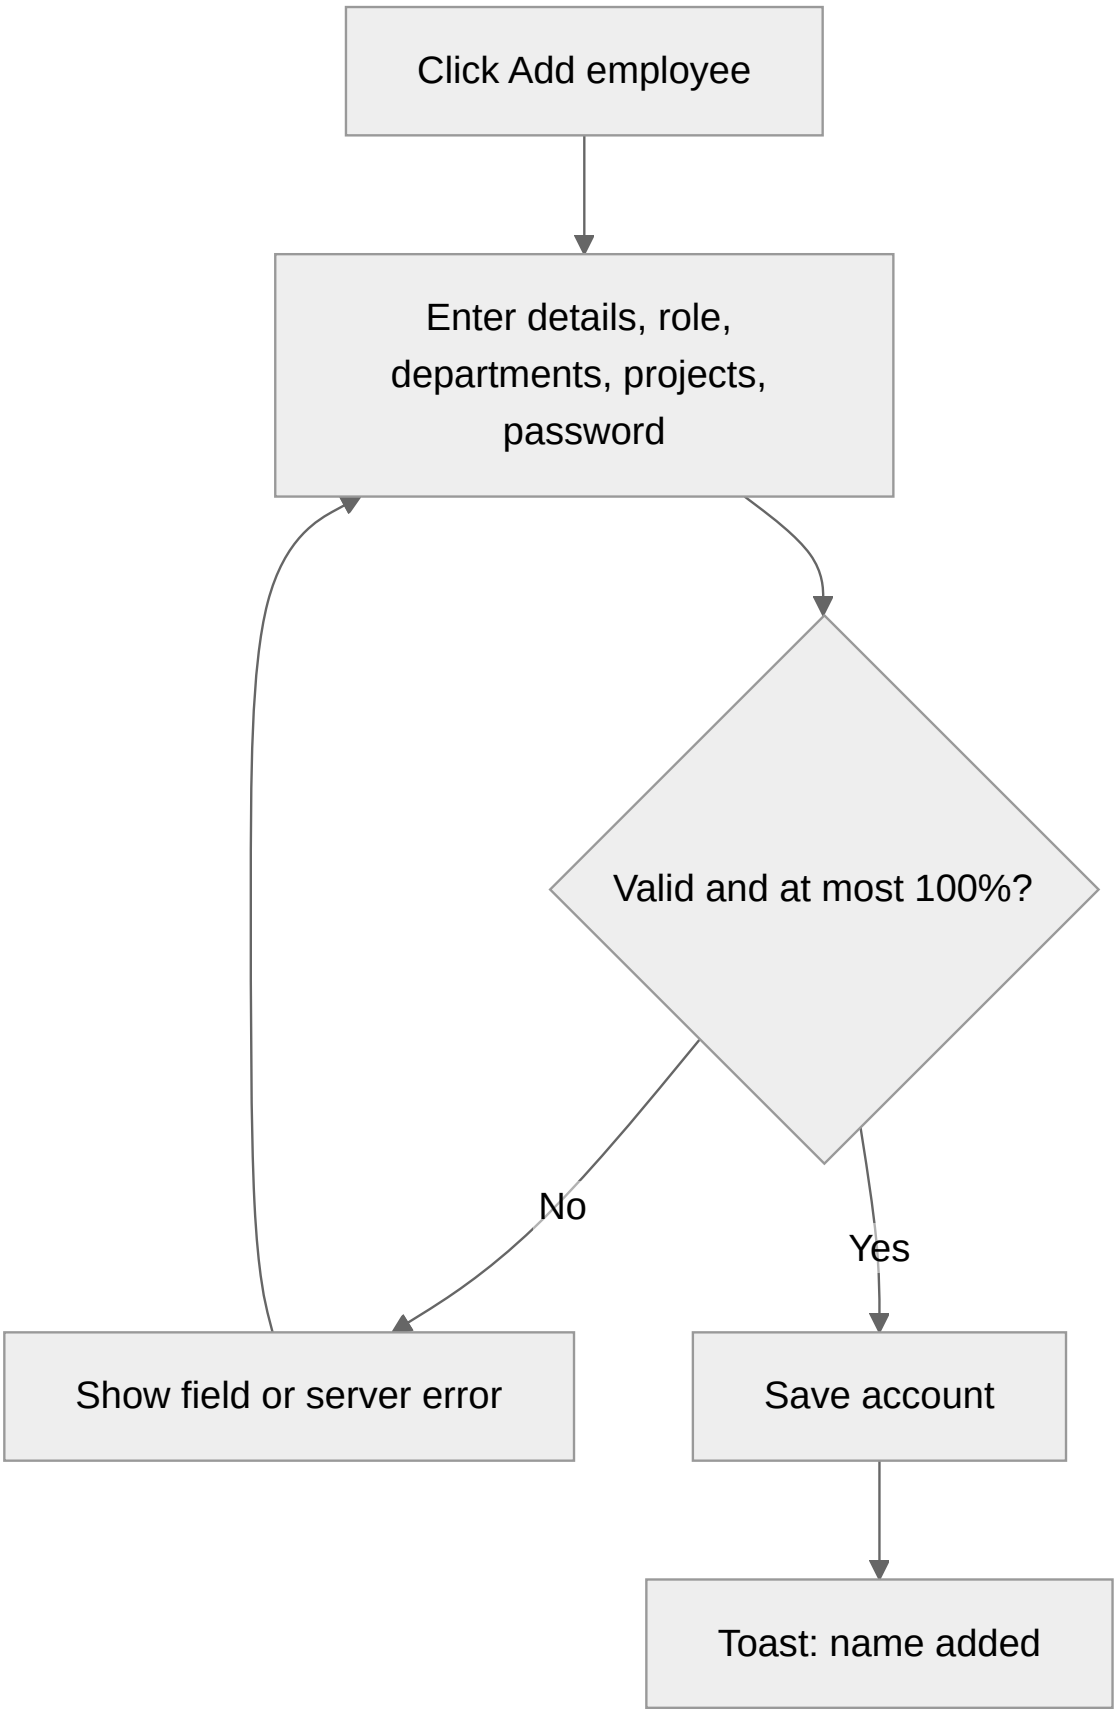

4. Business Process / Workflows

4.1 Add an Employee

Trigger: A new person joins · **Actors:** Administrator, System

Step	Actor / System	Action	Result
1	Administrator	Opens Employee Management and clicks **Add employee**	The Add employee side panel opens
2	Administrator	Enters full name, username, email (part before `@taskflow.com`) and optional employee code	Fields filled
3	Administrator	Picks a role (if allowed), ticks departments, adds project rows with position and percentage	Allocation bar shows "X% allocated, Y% remaining"
4	Administrator	Enters a temporary password and the initial status, then clicks **Add employee**	Data submitted
5	System	Checks required fields, email format, uniqueness, role rights and the 100% cap	Errors shown, or the account is saved
6	System	Shows "{Full name} added" and reloads the list	New employee listed

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: On 31-Oct-2026 the administrator adds *Anu Thomas*, username `anu`, email `anu.thomas@taskflow.com`, role Employee, department Engineering, project Website as Developer at 60%, temporary password `Temp#123`, status Active. The bar shows "60% allocated, 40% remaining" and the toast reads "Anu Thomas added".

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Exceptions / alternate flows:

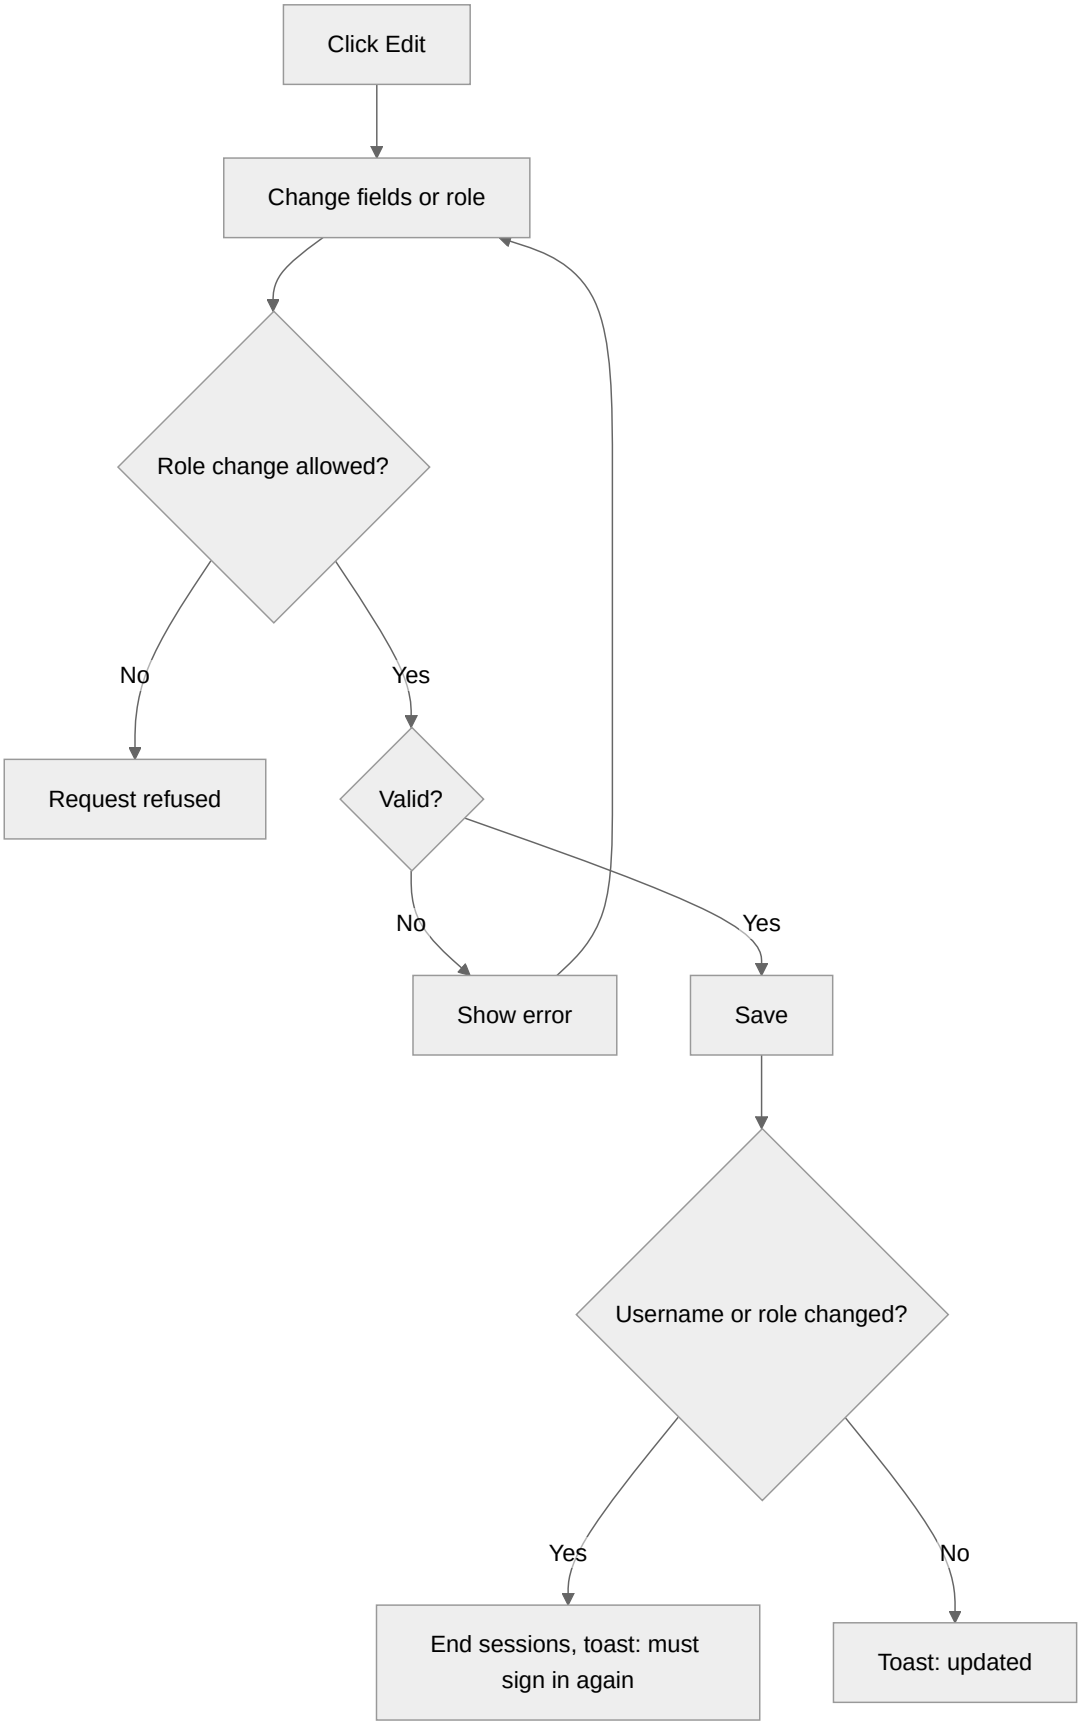

- Email local part already used (even by a deleted person) → "Email already exists."
- Username already used → "Email or username already exists."
- Allocations add up to 110% → "Allocations total 110%. A person can be allocated at most 100%."
- User without the assign-roles permission → the role stays Employee.

4.2 Edit an Employee (including a Role Change)

Trigger: Details or role must change · **Actors:** Administrator, System

Step	Actor / System	Action	Result
1	Administrator	Clicks **Edit** on a row or in the details panel	Edit panel opens with saved data; departments and projects are view only
2	Administrator	Changes code, name, username, email or (if allowed) role	Notice: "Changing the username or role signs this employee out. They must sign in again."
3	System	Validates, checks role rights and the last-Administrator rule	Errors shown, or changes saved
4	System	If username or role changed, ends the person's sessions	"{name} updated. They must sign in again."
5	System	If the person stops being a Manager, removes their project-manager flags and department-manager links	Manager duties cleared

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: Ravi Menon is promoted from Employee to Manager. The administrator changes the role and saves; the toast reads "Ravi Menon updated. They must sign in again." and Ravi's next request sends him to the login page.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Exceptions / alternate flows:

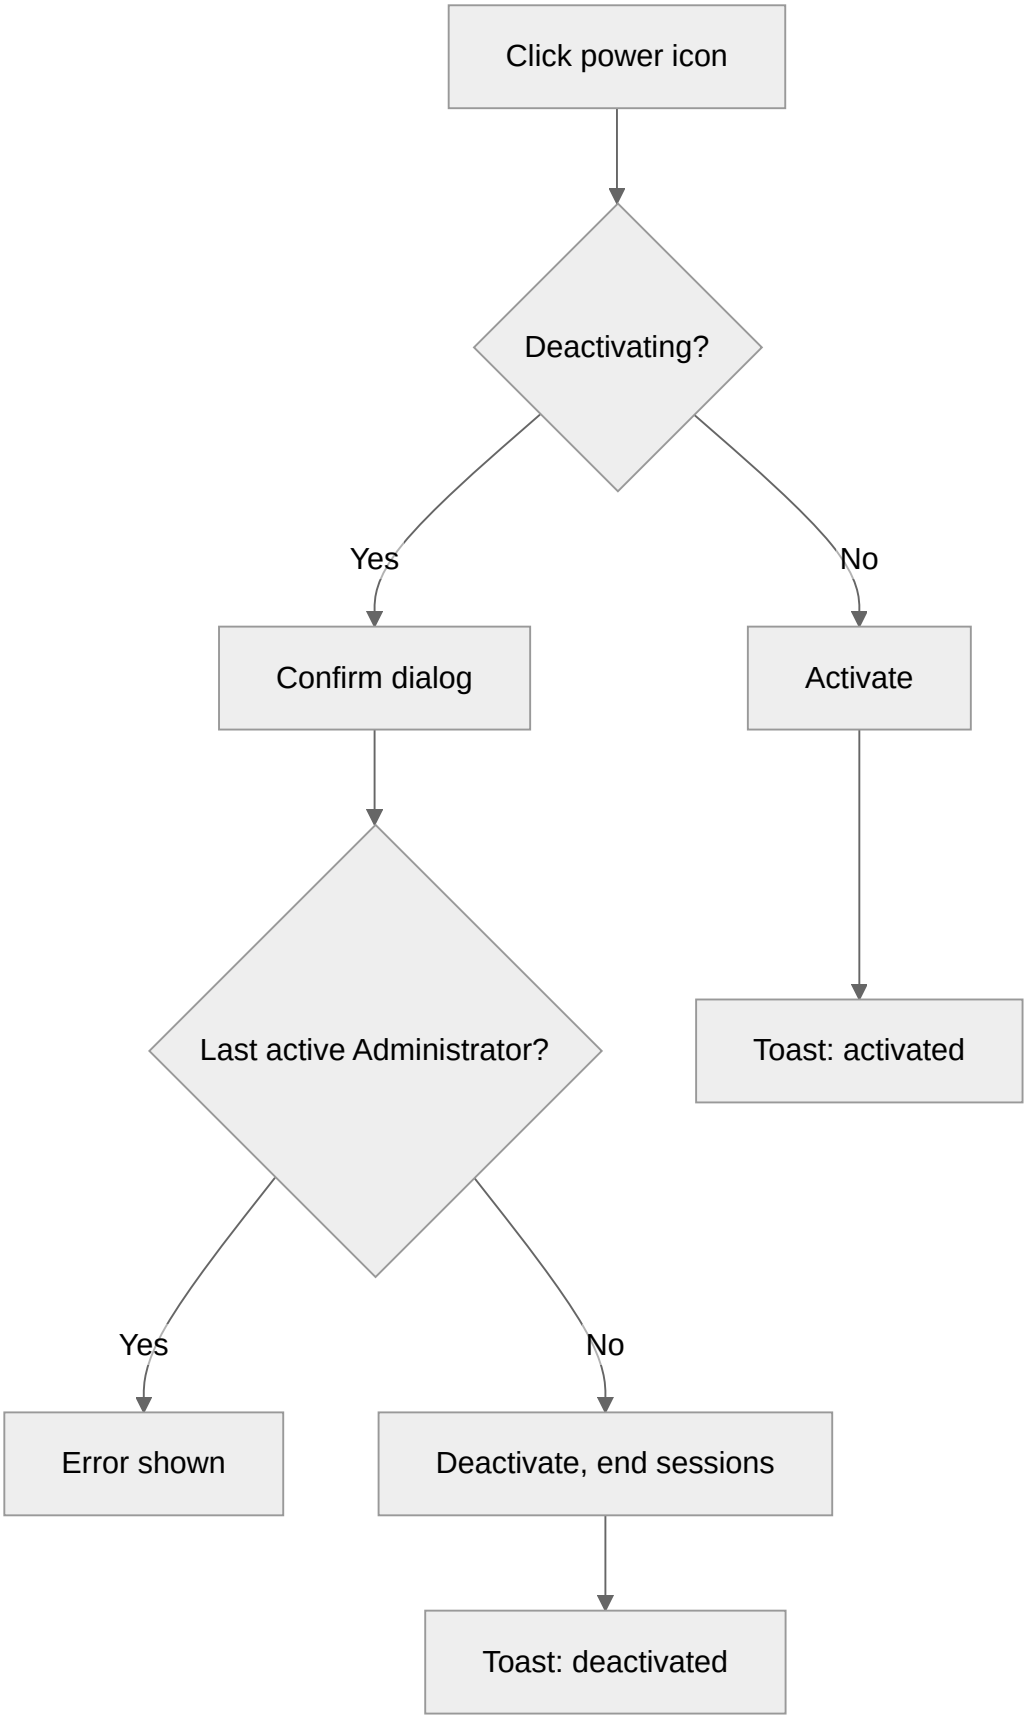

- An administrator changes their **own** username or role → they are signed out at once and taken to the login page.
- Moving the only active Administrator to another role → "The only active Administrator cannot be moved to another role."

4.3 Activate or Deactivate an Employee

Trigger: A person goes on leave or returns · **Actors:** Administrator, System

Step	Actor / System	Action	Result
1	Administrator	Clicks the power icon on a row	Deactivation asks for confirmation; activation does not
2	Administrator	Confirms "Deactivate employee?"	Request sent
3	System	Refuses if this is the only active Administrator; otherwise switches the account off and ends all sessions	"{name} deactivated" or "{name} activated"

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: Meera goes on a 3-month leave on 01-Nov-2026. The administrator deactivates her account; she can no longer sign in until she is activated again.

Exceptions / alternate flows:

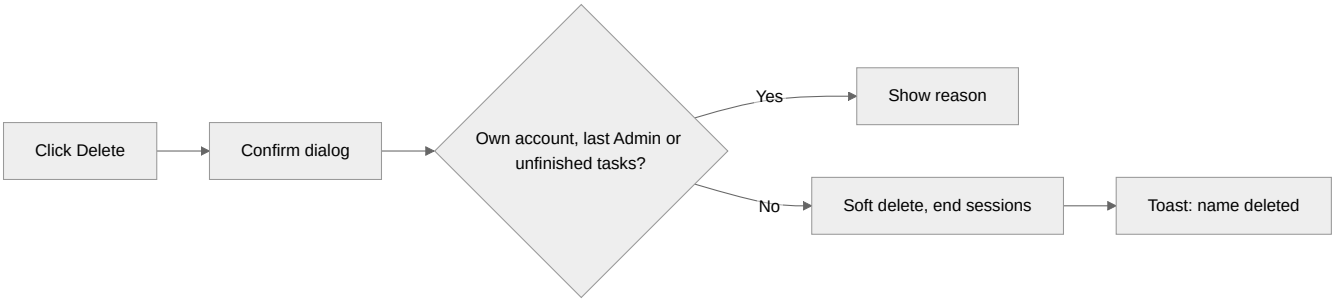

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

- Only active Administrator → "The only active Administrator cannot be deactivated."

4.4 Delete an Employee

Trigger: A person leaves the organisation · **Actors:** Administrator, System

Step	Actor / System	Action	Result
1	Administrator	Clicks the trash icon (never shown on their own row)	Confirmation: "Delete employee?"
2	System	Refuses for own account, the only active Administrator, or a person with unfinished assigned tasks	Reason shown
3	System	Otherwise hides the person from every list, ends their sessions and clears their manager duties	"{name} deleted"

Example: Arun leaves with 2 tasks still In Progress. Delete shows "Arun still has 2 unfinished task(s). Reassign it/them before deleting this employee." After his manager reassigns both tasks, the delete succeeds and his old tasks and comments remain visible in reports.

Exceptions / alternate flows:

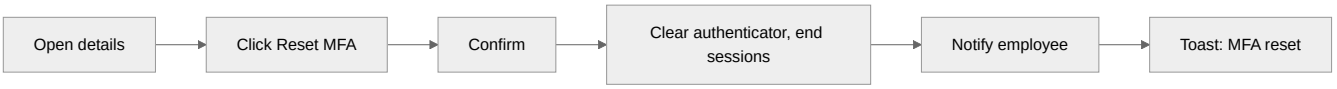

- Own account → "You cannot delete your own account."
- Only active Administrator → "The only active Administrator cannot be deleted."

4.5 Reset Two-Step Verification (MFA)

Trigger: A person lost their authenticator and backup codes · **Actors:** Administrator, System, Employee

Step	Actor / System	Action	Result
1	Administrator	Opens the person's details panel and clicks **Reset MFA**	Confirmation: "Reset two-step verification?"
2	System	Removes the authenticator and ends all of the person's sessions	MFA off
3	System	Sends the person a system notification	"An administrator reset your authenticator MFA. Sign in with your password and set it up again from Profile."
4	System	Shows "MFA reset for {name}"	Done

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: Sanjay's phone is lost on 30-Oct-2026. The administrator resets his MFA; Sanjay signs in with his password and sets up a new authenticator from My Profile.

Exceptions / alternate flows:

- Person has no MFA set up → the **Reset MFA** button is not shown.

---

5. Screen-by-Screen Requirements

SCREEN 1: Employee Management (list)

Field	Value
Screen name	Employee Management
Module	TaskFlow Management → Employee Management
Access	Administrator; custom roles holding at least one of `employees.create`, `employees.edit`, `employees.status.change`, `employees.delete`, `employees.role.assign`, `employees.mfa.reset` (list data needs `employees.view`). Manager and Employee: no access
Priority	Must

Purpose Keep employee accounts accurate and control who can sign in.

Screen Elements

- Header with the employee count (for example "12 employees", plus " match the current filters" when filters are set).
- **Add employee** button.
- Filter bar: **Search** ("Name or email"), **Project**, **Role**, **Status** (All statuses / Active / Inactive), **Reset**.
- Table columns: Employee (name and username), Email, Projects (percentage and position, total when more than one), Departments, Role, Status.
- Row actions: **Edit**, **Activate/Deactivate**, **Delete**.

Functional Requirements

ID	Requirement	Priority
REQ-EMP-01	The system shall list every employee who has not been deleted, ordered by full name.	Must
REQ-EMP-02	The system shall show, per employee, the name and username, email, projects (with percentage and position), departments, role and status.	Must
REQ-EMP-03	The system shall show a project total when an employee has more than one project.	Should

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-EMP-04	The system shall show the number of employees listed and say when the count reflects active filters.	Should
REQ-EMP-05	The system shall let the user search employees by name, email or username.	Must
REQ-EMP-06	The system shall let the user filter employees by project.	Must
REQ-EMP-07	The system shall let the user filter employees by role, listing custom roles only to users who may assign roles.	Must
REQ-EMP-08	The system shall let the user filter employees by status (All, Active, Inactive).	Must
REQ-EMP-09	The system shall clear all filters when the user clicks **Reset**.	Should
REQ-EMP-10	The system shall show the Employee Management menu item and screen only to users holding at least one employee action permission, and send other users back to their dashboard.	Must
REQ-EMP-11	The system shall show each row action and the **Add employee** button only to users holding the matching permission.	Must
REQ-EMP-12	The system shall never offer **Delete** on the user's own row.	Must
REQ-EMP-13	The system shall ask for confirmation before deactivating an employee and activate without confirmation.	Must
REQ-EMP-14	The system shall end all of a person's sessions when their account is deactivated.	Must
REQ-EMP-15	The system shall refuse to deactivate the only active Administrator.	Must
REQ-EMP-16	The system shall ask for confirmation before deleting an employee and then hide the person from every list while keeping their tasks, comments and mail.	Must
REQ-EMP-17	The system shall refuse to let a user delete their own account.	Must
REQ-EMP-18	The system shall refuse to delete an employee who still has unfinished assigned tasks and state how many.	Must
REQ-EMP-19	The system shall refuse to delete the only active Administrator.	Must
REQ-EMP-20	The system shall end the deleted person's sessions and remove their project-manager and department-manager duties.	Must
REQ-EMP-21	The system shall keep a deleted person's email and username reserved so they cannot be reused.	Must

Validations & Messages

Situation	Rule / message
Deactivate confirmation	"Deactivate employee?" – "{name} will not be able to sign in until they are activated again."

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Situation	Rule / message
Delete confirmation	"Delete employee?" – "{name} will no longer appear in the system or be able to sign in. Their tasks, comments and mail are kept."
Status changed	"{name} activated" / "{name} deactivated"
Deleted	"{name} deleted"
Last Administrator	"The only active Administrator cannot be deactivated." / "The only active Administrator cannot be deleted."
Own account	"You cannot delete your own account."
Unfinished tasks	"{name} still has {n} unfinished task(s). Reassign it/them before deleting this employee."
List failed	"Could not load employees. Check your connection and try again."
Empty list	"No employees yet – Add the first employee to get started." / "No employees match these filters – Try a different search or clear the filters."
Action refused	"Could not update the employee status." / "Could not delete the employee."

Expected Result The administrator sees an accurate, searchable list of employees and can safely switch accounts off or remove people who have left, without losing their history.

Change from original BRD (Screen 5)

Original requirement	Current requirement
Department filter on the list	Project, Role and Status filters; departments are shown as a column
Display name, email, department, role, status	Also username and projects (percentage and position)
Prevent deletion of employees with related task records	Deletion is blocked only while the person has **unfinished** assigned tasks; deletion is a soft delete, so history is kept
(not in original)	Delete action, own-account and last-Administrator protection, sessions ended on deactivation and deletion

SCREEN 2: Employee Details (side panel)

Field	Value
Screen name	Employee details
Module	TaskFlow Management → Employee Management
Access	Same as SCREEN 1; **Reset MFA** needs `employees.mfa.reset`
Priority	Must

Purpose Show one employee's full picture, read only, and offer the MFA reset.

Screen Elements

- Employee code, username, email, role, projects, departments, managers.
- For a Manager: projects they manage and their team.
- Status, created date, two-step status, last login.
- **Reset MFA**, **Close** and **Edit** buttons.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Functional Requirements

ID	Requirement	Priority
REQ-EMP-22	The system shall open a read-only details panel when the user clicks an employee's name.	Must
REQ-EMP-23	The system shall show the employee code, username, email, role, projects, departments and managers in the details panel.	Must
REQ-EMP-24	The system shall show, for a Manager, the projects they manage and their team.	Should
REQ-EMP-25	The system shall show the account status, created date, two-step verification status and last login.	Should
REQ-EMP-26	The system shall derive a person's managers from the managers of their departments and the flagged managers of their projects, never from a typed value.	Must
REQ-EMP-27	The system shall show **Reset MFA** only when the person has MFA set up and the user holds the MFA reset permission.	Must
REQ-EMP-28	The system shall, after confirmation, remove the person's authenticator and end all of their sessions.	Must
REQ-EMP-29	The system shall send the person a system notification telling them MFA was reset.	Must

Validations & Messages

Situation	Rule / message
Reset confirmation	"Reset two-step verification?" – "{name} will be signed out everywhere and can sign in with just their password. They can set up an authenticator app again from Profile."
Reset done	"MFA reset for {Full name}"
Notification text	"An administrator reset your authenticator MFA. Sign in with your password and set it up again from Profile."
Reset refused	"Could not reset MFA."

Expected Result The administrator can check who a person reports to and what they work on, and can help a person who lost their authenticator back into TaskFlow.

Change from original BRD (Screen 5): the original "Employee details view" is kept; derived managers, the Manager's team and the MFA reset are new.

SCREEN 3: Add / Edit Employee (side panel)

Field	Value
Screen name	Add employee / Edit employee
Module	TaskFlow Management → Employee Management
Access	Administrator; custom roles with `employees.create` (add) or `employees.edit` (edit); role choice needs `employees.role.assign`; the Administrator role needs `roles.administrator.assign` (Administrator role only)

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Field	Value
Priority	Must

Purpose Create a sign-in account or change an existing one.

Screen Elements

- Personal details: Full name, Username, Email (part before the fixed `@taskflow.com`), Employee code.
- Role and team: Role, Departments (add only; view only on edit).
- Project allocation: rows of project, position and percentage, **Add project**, allocation bar (add only; view only on edit).
- Sign-in and security (add only): Temporary password with strength meter, Status.
- Notice on edit about signing out; **Add employee** / **Save changes** buttons.

Functional Requirements

ID	Requirement	Priority
REQ-EMP-30	The system shall create an employee with a required full name, username and email and an optional employee code.	Must
REQ-EMP-31	The system shall accept only email addresses on the fixed domain `@taskflow.com` and store them in lower case.	Must
REQ-EMP-32	The system shall reject an email whose part before `@` is already used by any employee, including deleted ones.	Must
REQ-EMP-33	The system shall reject a username already used by any employee, ignoring case and including deleted ones.	Must
REQ-EMP-34	The system shall require a temporary password of at least 6 characters when adding an employee and show its strength.	Must
REQ-EMP-35	The system shall let the user choose the initial status (active or inactive) when adding an employee.	Should
REQ-EMP-36	The system shall give a new employee the Employee role unless the user holds the assign-roles permission and picks another role.	Must
REQ-EMP-37	The system shall allow giving or removing the Administrator role only to users holding the Administrator-only permission.	Must
REQ-EMP-38	The system shall let the user tick existing departments for a new employee.	Must
REQ-EMP-39	The system shall let the user add project allocations for a new employee, each with an existing project, a position (picked or newly typed) and a whole percentage from 1 to 100.	Must
REQ-EMP-40	The system shall allow a project only once per employee.	Must
REQ-EMP-41	The system shall reject allocations that total more than 100% and show the allocated and remaining percentage while editing.	Must
REQ-EMP-42	The system shall show departments and project allocations as view only when editing, with the hint "Projects are assigned in Project management."	Must
REQ-EMP-43	The system shall never change a person's password from the edit panel.	Must

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-EMP-44	The system shall warn, when editing, that changing the username or role signs the employee out.	Should
REQ-EMP-45	The system shall end all of a person's sessions when their username or role changes.	Must
REQ-EMP-46	The system shall sign out an administrator at once, and take them to the login page, when they change their own username or role.	Must
REQ-EMP-47	The system shall refuse to move the only active Administrator to another role.	Must
REQ-EMP-48	The system shall remove a person's project-manager flags and department-manager links when they stop being a Manager.	Must
REQ-EMP-49	The system shall confirm a successful save with "{Full name} added" or "{Full name} updated".	Should

Validations & Messages

Situation	Rule / message
Required fields empty	"Full name is required." · "Username is required." · "Email is required." · "Password is required."
Field limits	Full name at most 200 characters, username at most 100, email at most 256
Bad email	"Use letters, digits, dot, underscore or hyphen before @taskflow.com."
Short password	"Use at least 6 characters."
Duplicate email	"Email already exists."
Duplicate username	"Email or username already exists."
Incomplete allocation row	"Give every project row a project, a position and a whole percentage from 1 to 100."
Same project twice	"A project can only appear once."
Over 100%	"Allocations total {n}%. A person can be allocated at most 100%."
Bad percentage	"Allocation percentage must be a whole number from 1 to 100."
Unknown reference	"Role does not exist." · "Department does not exist." · "Project does not exist." · "Position does not exist."
Last Administrator	"The only active Administrator cannot be moved to another role."
Role locked	"Changing a role needs the assign roles permission."
Roles list failed	"Custom roles could not be loaded. Only the standard roles are listed."
Saved	"{Full name} added" · "{Full name} updated" · "{Full name} updated. They must sign in again."
Save refused	"Could not add the employee." / "Could not update the employee."

Expected Result The administrator creates a ready-to-use account with the right role, departments and projects in one step, and can correct details later knowing that access changes take effect at once.

Change from original BRD (Screen 5)

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Original requirement	Current requirement
Assign employees to departments	Departments are set when **adding**; later changes are made in Department Management
Assign appropriate roles	Roles other than Employee need the assign-roles permission; the Administrator role is Administrator-only
Prevent duplicate registered email addresses	Kept; uniqueness also covers usernames and deleted people, and the email domain is fixed to `@taskflow.com`
(not in original)	Project allocations with position and the 100% cap; temporary password; sessions ended on username or role change

6. Business Rules

ID	Rule	Applies to
BR-EMP-01	Every employee is a sign-in account; only active, non-deleted accounts can sign in (global rule, overall BRD section 6: deactivated users must not log in).	All screens
BR-EMP-02	Employee email addresses always use the fixed domain `@taskflow.com`; the part before it may hold only letters, digits, dot, underscore or hyphen.	SCREEN 3
BR-EMP-03	Email (by the part before `@`) and username (ignoring case) are unique for ever; deleted people keep theirs reserved.	SCREEN 1, SCREEN 3
BR-EMP-04	There must always be at least one active Administrator; the only one cannot be deactivated, deleted or moved to another role.	SCREEN 1, SCREEN 3
BR-EMP-05	Nobody can delete their own account.	SCREEN 1
BR-EMP-06	An employee with unfinished assigned tasks cannot be deleted until those tasks are reassigned (global rule, overall BRD section 6: records with dependent data must not be deleted in a way that damages history).	SCREEN 1
BR-EMP-07	Deleting an employee is a soft delete: the person is hidden, and their tasks, comments and mail are kept.	SCREEN 1
BR-EMP-08	Changing a username or role, deactivating, deleting, or resetting MFA ends all of the person's sessions at once.	SCREEN 1, SCREEN 2, SCREEN 3
BR-EMP-09	Choosing any role other than Employee needs the assign-roles permission; giving or removing the Administrator role also needs the Administrator-only permission.	SCREEN 3
BR-EMP-10	Each project allocation is a whole number from 1 to 100, a project appears once per person, and a person's total across all projects never passes 100% (shared with BR-PROJ).	SCREEN 3
BR-EMP-11	Departments and project allocations are set only when adding an employee; afterwards they are managed in Department Management and Project Management.	SCREEN 3

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Rule	Applies to
BR-EMP-12	A person's managers are the managers of their departments plus the flagged managers of their projects; they are never typed in.	SCREEN 2
BR-EMP-13	Administrators never set another person's password when editing; people change their own password in My Profile or through account recovery.	SCREEN 3
BR-EMP-14	A person who stops being a Manager, or is deleted, stops managing projects and departments automatically.	SCREEN 1, SCREEN 3

> Global business rules marked "global rule, overall BRD section 6" are defined in section 6 of the overall BRD (`../../00-Overall/BRD-TaskFlow-Overall.md`); they apply to this sub-module in full.

7. Non-Functional Requirements

The global NFRs in section 7 of the overall BRD (`../../00-Overall/BRD-TaskFlow-Overall.md`) apply. Sub-module-specific requirements:

ID	Category	Requirement	Measure / target
NFR-EMP-01	Security	Access changes take effect immediately	After a deactivation, deletion, username or role change, or MFA reset, the person's next request with an old session is rejected
NFR-EMP-02	Security	Permission checks are enforced by the server, not only by hidden buttons	A call without the needed permission is refused even if made outside the screen
NFR-EMP-03	Security	Passwords are never shown or stored in plain text	Temporary passwords are stored hashed
NFR-EMP-04	Usability	Every destructive action asks for confirmation	Deactivate, Delete and Reset MFA show a confirmation dialog
NFR-EMP-05	Usability	Every refusal states the reason in plain words	Messages as listed in section 5
NFR-EMP-06	Data integrity	Uniqueness holds even when two administrators save at the same time	No two live or deleted accounts share an email local part or username

8. Data Requirements

Entity / data set	Purpose	Key fields	Retention / rules
Employee (user account)	Sign-in account and identity	Employee code, full name, username, email, mobile number (set in My Profile), role, active status, created / updated / last-login dates, two-step verification status	Soft delete; email and username unique for ever

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Entity / data set	Purpose	Key fields	Retention / rules
Project allocation	What share of a person's time goes to a project	Employee, project, position, percentage, project-manager flag	Total per person at most 100%; set here on create, then in Project Management
Department membership	Which departments a person belongs to	Employee, department	Set here on create, then in Department Management
Role	What a person may do	Role name, permissions	Managed in Role Configuration

9. Integrations & External Dependencies

System / service	Purpose	Required?	Notes
Authentication (sign-in sessions)	End sessions after access changes	Required	Built in; no external service
Notifications (in-app)	Tell a person their MFA was reset	Required	System notification only; no other employee action sends a notification
Role Configuration	Supplies the roles offered in the form and filter	Required	If custom roles cannot be loaded, only the standard roles are listed
Project Management / Department Management	Supply projects, positions and departments for filters and the add form	Required	The screen needs view rights on projects and departments to fill these lists
TaskFlow Assistant	Can prepare a role change that an administrator confirms	Optional	Uses the same employee update after confirmation
Email	–	Not used	Employee actions send no email

10. Reporting Requirements

Not applicable for this sub-module. The employee count in the list header is the only summary; Reports keep showing deleted people's history (see `../../05-Reports/05.1-Reports/BRD-Reports.md`).

11. Recommended Technology Stack (optional)

Not applicable for this sub-module. See the overall BRD.

12. Assumptions, Constraints & Dependencies

Type	Description
Assumption	One organisation with one fixed email domain, `@taskflow.com`.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Type	Description
Assumption	The administrator gives the temporary password to the new employee outside TaskFlow.
Constraint	Departments and project allocations can only be set while adding; later changes happen in the sibling sub-modules.
Constraint	The employee list is organisation-wide; there is no team limit for anyone holding the view permission.
Dependency	Role Configuration (roles and permissions), Project Management (projects, positions), Department Management (departments), Authentication (sessions, MFA).
Dependency	Task Management: the unfinished-task count blocks deletion.

13. Risks

ID	Risk	Impact	Likelihood	Mitigation
R-EMP-01	Organisation locked out if the last Administrator is removed	High	Low	BR-EMP-04 guard on role change, deactivation and deletion
R-EMP-02	Open work orphaned when a person leaves	High	Medium	BR-EMP-06 blocks deletion until tasks are reassigned
R-EMP-03	A changed role keeps old rights in an open session	High	Low	BR-EMP-08 ends sessions at once
R-EMP-04	A custom role with employee rights but without project or department view rights sees empty filter and form lists	Medium	Medium	Grant `projects.view` and `departments.view` together with employee action permissions
R-EMP-05	The Assistant role-change path may not require the Administrator-only permission	High	Low	⚠️ To be confirmed whether that is intended
R-EMP-06	The details panel always shows **Edit**, even to users who cannot edit	Low	Medium	The server refuses the save; ⚠️ To be confirmed whether the button should be hidden

14. Acceptance Criteria

ID	Criterion	Verified by
AC-EMP-01	The list shows every live employee with projects, departments, role and status, and search and filters narrow it correctly.	SCREEN 1, REQ-EMP-01 to REQ-EMP-09
AC-EMP-02	Users without an employee action permission see no menu item and are sent to their dashboard; buttons appear only with their permission.	SCREEN 1, REQ-EMP-10 to REQ-EMP-12
AC-EMP-03	A deactivated person cannot sign in and their open sessions stop working.	SCREEN 1, REQ-EMP-13, REQ-EMP-14
AC-EMP-04	The only active Administrator cannot be deactivated, deleted or moved to another role.	REQ-EMP-15, REQ-EMP-19, REQ-EMP-47

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Criterion	Verified by
AC-EMP-05	Deleting yourself or a person with unfinished tasks is refused with the stated reason.	REQ-EMP-17, REQ-EMP-18
AC-EMP-06	A deleted person disappears from lists, cannot sign in, loses manager duties, and their tasks, comments and mail remain; their email and username cannot be reused.	REQ-EMP-16, REQ-EMP-20, REQ-EMP-21
AC-EMP-07	The details panel shows derived managers and, for a Manager, their projects and team.	SCREEN 2, REQ-EMP-22 to REQ-EMP-26
AC-EMP-08	Resetting MFA signs the person out, lets them sign in with their password, and sends them a notification.	SCREEN 2, REQ-EMP-27 to REQ-EMP-29
AC-EMP-09	A new employee is saved only with a valid `@taskflow.com` email, unique email and username, and a password of at least 6 characters.	SCREEN 3, REQ-EMP-30 to REQ-EMP-35
AC-EMP-10	Only users with the right permissions can choose a non-Employee role or the Administrator role.	REQ-EMP-36, REQ-EMP-37
AC-EMP-11	Project allocations on a new employee are rejected when a project repeats or the total passes 100%.	REQ-EMP-38 to REQ-EMP-41
AC-EMP-12	Editing never changes the password or allocations, and a username or role change signs the person out.	REQ-EMP-42 to REQ-EMP-46, REQ-EMP-49
AC-EMP-13	A person moved away from the Manager role no longer manages any project or department.	REQ-EMP-48

15. Requirements Traceability Matrix

Objective	Business rule(s)	Screen(s)	Functional requirement(s)	Acceptance criterion
OBJ-EMP-01	BR-EMP-02, BR-EMP-03, BR-EMP-10, BR-EMP-11, BR-EMP-12	SCREEN 1, SCREEN 2, SCREEN 3	REQ-EMP-01 – REQ-EMP-09, REQ-EMP-22 – REQ-EMP-26, REQ-EMP-30 – REQ-EMP-35, REQ-EMP-38 – REQ-EMP-42, REQ-EMP-49	AC-EMP-01, AC-EMP-07, AC-EMP-09, AC-EMP-11
OBJ-EMP-02	BR-EMP-01, BR-EMP-08, BR-EMP-09, BR-EMP-13	SCREEN 1, SCREEN 3	REQ-EMP-10, REQ-EMP-11, REQ-EMP-13, REQ-EMP-14, REQ-EMP-36, REQ-EMP-37, REQ-EMP-43 – REQ-EMP-46	AC-EMP-02, AC-EMP-03, AC-EMP-10, AC-EMP-12
OBJ-EMP-03	BR-EMP-04, BR-EMP-05, BR-EMP-14	SCREEN 1, SCREEN 3	REQ-EMP-12, REQ-EMP-15, REQ-EMP-17, REQ-EMP-19, REQ-EMP-47, REQ-EMP-48	AC-EMP-04, AC-EMP-05, AC-EMP-13
OBJ-EMP-04	BR-EMP-06, BR-EMP-07, BR-EMP-14	SCREEN 1	REQ-EMP-16, REQ-EMP-18, REQ-EMP-20, REQ-EMP-21	AC-EMP-05, AC-EMP-06
OBJ-EMP-05	BR-EMP-08	SCREEN 2	REQ-EMP-27, REQ-EMP-28, REQ-EMP-29	AC-EMP-08

16. Project Deliverables

#	Deliverable	Format
1	Employee Management screens (list, details panel, add/edit panel)	Application source code
2	Employee, allocation and membership data with seed sign-ins for Administrator, Manager and Employee	Database initialisation
3	BRD, FRD, HLD, LLD for Employee Management	Markdown
4	Unit and integration tests for employee rules (last Administrator, deletion, allocations, manager links)	Test project and results

17. Glossary

Term	Meaning
Employee	Any person with a TaskFlow sign-in account, whatever their role
Allocation	The percentage of a person's time given to one project, with a position
Position	A label for what a person does on a project (for example Developer, QA); it grants no access
Derived manager	A manager worked out from a person's departments and projects
Soft delete	Hiding a record from every list while keeping it and its history
MFA / two-step verification	Signing in with a password plus a code from an authenticator app
Session	A signed-in state on a device; ending it forces a new sign-in

18. Project Summary

Employee Management gives administrators one place to create sign-in accounts, give roles, switch accounts on or off, remove people who have left and reset lost authenticators. It keeps at least one Administrator active, stops self-deletion and the deletion of people with open work, ends sessions as soon as access changes, and keeps every person's history. The accurate employee list it maintains feeds tasks, dashboards, workload, reports and the TaskFlow Assistant.
