1. Project Overview

1.1 Introduction

Reminder Settings is the screen that controls the automatic deadline reminders TaskFlow sends to assignees, task creators and selected recipients. Authorized users switch reminders and the deadline-day reminder on or off, choose the default reminder days for new tasks and the overdue frequency, and decide whether each reminder is also delivered to TaskFlow Mail. It is Screen 13 "Deadline Reminder Settings" of the original BRD.

1.2 Business Problem / Current Situation

Without a settings screen, reminder intervals are fixed in the program. A change ("remind three days before, not two") needs a developer and a new release. Teams cannot stop reminders during a

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

holiday period, cannot make overdue reminders less frequent, and reminders can be lost among other bell notifications.

1.3 Project Objectives

ID	Objective	Success measure
OBJ-REM-01	Let authorized users change reminder behaviour without editing source code	Every reminder setting on the screen can be changed and saved from the screen, with no restart
OBJ-REM-02	Give the organization control over how persistent and how visible reminders are	Overdue frequency (daily / weekly) and Mail delivery can be chosen; reminders can be stopped with one switch
OBJ-REM-03	Keep reminder configuration safe and consistent	Only holders of `settings.reminders.manage` can open or change it; invalid combinations are refused

1.4 Expected Benefits

- The organization adapts reminders to its own working rhythm in seconds.
- Managers and Administrators no longer depend on a developer to tune reminders.
- Employees receive reminders at sensible times, and optionally in their Mail inbox, so deadlines are not missed.

---

2. Stakeholders & User Roles

2.1 Stakeholders

Stakeholder	Interest / responsibility
Project owner (Jojo George)	Defines priorities, approves this BRD
Administrators and Managers	Maintain the reminder configuration
Employees, task creators, additional recipients	Receive the reminders this configuration controls

2.2 User Roles

Role	Description	Main responsibilities	Access level
Administrator	Manages the whole system	View and change reminder settings	Organization (full screen)
Manager	Assigns and monitors tasks	View and change reminder settings (granted by default)	Organization (full screen)
Employee	Works on assigned tasks	Receives reminders only	None (no access to the screen by default)
Custom role	Role defined on Role Configuration	As granted	Full screen when `settings.reminders.manage` is granted, otherwise none

> Roles and the access model are described in the overall BRD. Every reminder setting applies to the whole organization; there is no personal or team version.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

3. Scope

3.1 In Scope

- Viewing the current reminder configuration.
- Turning automatic deadline reminders on or off for the whole organization.
- Turning the deadline-day ("due today") reminder on or off.
- Default first reminder, second reminder and overdue frequency for new tasks.
- Turning delivery of reminder copies to TaskFlow Mail on or off.
- Showing the application timezone (read-only).

3.2 Out of Scope (this release)

- Generating, scheduling and de-duplicating reminders (the reminder engine) – described in the Notification BRD.
- Changing the application timezone or the in-app notifications switch – Application Settings.
- Per-task reminder days – chosen on Create / Edit Task (Task Management BRD).
- Outbound SMTP email – superseded by internal Mail (original Screen 14).
- Resetting all reminder settings to factory defaults with one button – not requested.

3.3 Modules Overview

#	Module	Purpose	Screens
1	Settings → Reminder Settings	Organization-wide configuration of automatic deadline reminders	Reminder Settings

Change from original BRD

Original BRD item	Current requirement
Screen 13 "Email notification setting"	**Also deliver reminders to Mail** – each reminder is copied to the recipient's internal TaskFlow Mail inbox. SMTP email (Screen 14) was superseded by internal Mail.
Screen 13 FR-5, FR-6, FR-8 (no reminders for completed/cancelled tasks, no past times, reminder history)	Kept as requirements of the reminder engine, in the Notification BRD; this screen only supplies the configuration.
Screen 13 FR-7 (consistent timezone)	The application timezone is shown read-only here and is changed on Application Settings.
Screen 20 "Default task reminder intervals"	Kept on this screen; Application Settings only links here.
Not in original BRD	Overdue frequency may be **Every week** as well as **Every day**; the deadline-day reminder has its own switch.

4. Business Process / Workflows

4.1 Save Reminder Settings

Trigger: An authorized user wants to change how reminders behave · **Actors:** Administrator, Manager, Custom role, System

Step	Actor / System	Action	Result
1	User	Opens **Settings → Reminder Settings**	Current configuration and the application timezone are shown
2	User	Changes the switches, the first and second reminder and the overdue frequency	Form shows the new values
3	System	Checks that the first reminder comes earlier than the second	Error under **Second reminder** if not
4	User	Clicks **Save settings**	Values are sent for saving
5	System	Checks all values again (presence, allowed ranges, ordering)	Invalid values are refused with a message
6	System	Saves the values and records who changed them and when	Toast "Reminder settings saved" and a **Saved** tick
7	System	Uses the new switches from the next reminder run; new tasks start with the new default days	Existing tasks keep their own days

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: On 1 October, Manager Anita changes the first reminder from 2 to 3 days, keeps the second reminder at 1 day, sets **After the deadline** to **Every week** and saves. On 2 October she creates "Prepare Monthly Report" for Rahul, due 15 October 5:00 PM (application timezone Asia/Kolkata). The task starts with 3 days / 1 day / weekly, so Rahul, Anita and the additional recipient

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Priya receive reminders on 12 and 14 October, a "due today" reminder on 15 October, and then one overdue reminder a week while the task stays open. A task created on 30 September keeps 2 days / 1 day / daily.

Exceptions / alternate flows:

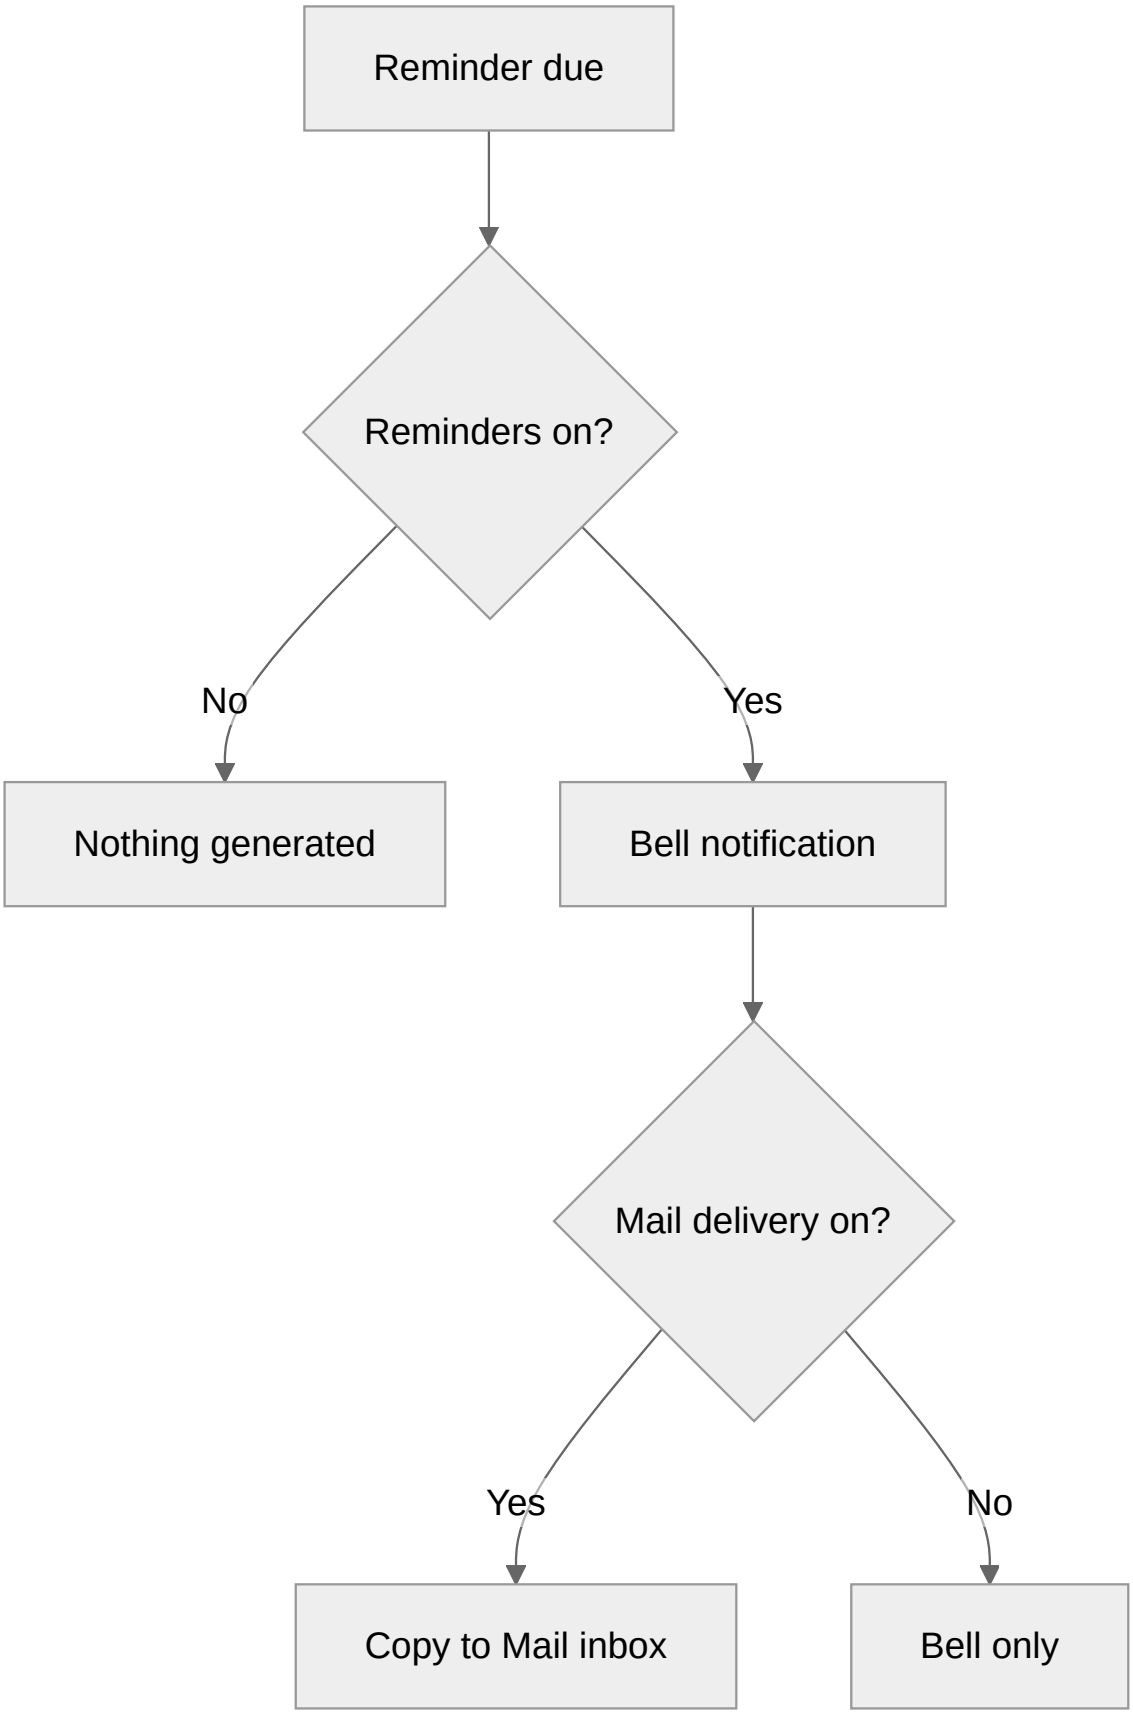

- The first reminder is not earlier than the second: the save is refused with "The first reminder must come earlier than the second reminder."
- The settings cannot be loaded: an error card with **Retry** is shown.
- **Send deadline reminders** is switched off: no reminders are generated for any task until it is switched on again.

4.2 Reminder Delivery Choice

Trigger: A reminder is due for a task · **Actors:** System

Step	Actor / System	Action	Result
1	System	Checks **Send deadline reminders**	When off, nothing is generated
2	System	Checks **Remind on the deadline day** for a "due today" reminder	When off, the deadline-day reminder is skipped
3	System	Creates the bell notification for each recipient	Shown in the Notification Center (unless in-app notifications are switched off on Application Settings)
4	System	Checks **Also deliver reminders to Mail**	When on, a copy from "TaskFlow" arrives in each recipient's Mail inbox

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Example: With Mail delivery on, Priya sees the 14 October reminder for "Prepare Monthly Report" both under the bell and in her Mail inbox, sent by "TaskFlow".

Exceptions / alternate flows:

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

- The deadline-day switch is off: on 15 October no "due today" reminder is created; the other reminders are unaffected.

---

5. Screen-by-Screen Requirements

SCREEN 1: Reminder Settings

Field	Value
Screen name	Reminder Settings (original BRD Screen 13 "Deadline Reminder Settings")
Module	Settings
Access	Administrator, Manager; Custom role with `settings.reminders.manage`. Employee: no access by default
Priority	Must

Purpose Let authorized users configure the automatic deadline reminders for the whole organization.

Screen Elements

- Page title **Reminder settings** and the line "Control the automatic deadline reminders sent to assignees, task creators and selected recipients."
- **Automatic reminders** group: **Send deadline reminders** switch; **Remind on the deadline day** switch, each with a hint.
- **Defaults for new tasks** group: **First reminder** (3, 2 or 1 days before), **Second reminder** (1 day before or on the deadline day), **After the deadline** (Every day or Every week).
- **Delivery** group: **Also deliver reminders to Mail** switch; **Application timezone** (read-only).
- **Save settings** button and **Saved** tick; loading placeholder; error card with **Retry**.

Functional Requirements

ID	Requirement	Priority
REQ-REM-01	The system shall display the current reminder configuration when the screen opens.	Must
REQ-REM-02	The system shall let the user switch automatic deadline reminders on or off for the whole organization.	Must
REQ-REM-03	The system shall generate no deadline reminders for any task while automatic reminders are switched off.	Must
REQ-REM-04	The system shall let the user switch the deadline-day ("due today") reminder on or off.	Must
REQ-REM-05	The system shall let the user choose the default first reminder as 3, 2 or 1 days before the deadline.	Must
REQ-REM-06	The system shall let the user choose the default second reminder as 1 day before the deadline or on the deadline day.	Must
REQ-REM-07	The system shall let the user choose the default overdue reminder frequency as Every day or Every week.	Must

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Requirement	Priority
REQ-REM-08	The system shall let the user switch delivery of reminder copies to the recipients' TaskFlow Mail inbox on or off.	Should
REQ-REM-09	The system shall always create the bell notification for a reminder, whatever the Mail delivery choice.	Must
REQ-REM-10	The system shall show the application timezone read-only, with a hint that it is changed on Application Settings.	Should
REQ-REM-11	The system shall refuse to save when the first reminder is not earlier than the second reminder.	Must
REQ-REM-12	The system shall check every value again when saving, independently of the screen.	Must
REQ-REM-13	The system shall refuse a save in which any of the six reminder values is missing.	Must
REQ-REM-14	The system shall use the defaults reminders on, deadline-day reminder on, first 2 days, second 1 day, overdue every day, Mail delivery on while no value has been saved.	Must
REQ-REM-15	The system shall pre-fill new tasks with the saved default first reminder, second reminder and overdue frequency.	Must
REQ-REM-16	The system shall keep the reminder days of existing tasks unchanged when the defaults change.	Must
REQ-REM-17	The system shall apply the saved switches from the next reminder run, without a restart.	Must
REQ-REM-18	The system shall record which user last changed the reminder settings and when.	Should
REQ-REM-19	The system shall confirm a successful save with the message "Reminder settings saved" and a **Saved** tick.	Should
REQ-REM-20	The system shall hide the menu item from, and redirect to their dashboard, users without `settings.reminders.manage`.	Must
REQ-REM-21	The system shall refuse any read or change of reminder settings by a user without `settings.reminders.manage`.	Must
REQ-REM-22	The system shall still display a saved value that is not one of the screen's fixed choices.	Could

Validations & Messages

Situation	Rule / message
First reminder not earlier than second	"The first reminder must come earlier than the second reminder." (under **Second reminder**)
First reminder out of range	Must be 1–30 days before the deadline
Second reminder out of range	Must be 0–30 days before the deadline (0 = on the deadline day)
Overdue frequency invalid	Must be Every day or Every week
A value missing	Save refused; every value must be sent
Success	"Reminder settings saved"
Load failed	"Could not load the reminder settings." with **Retry**

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

Situation	Rule / message
Save failed	"Could not save the reminder settings."
No permission	Menu item hidden; opening the address returns the user to their dashboard; a direct request is refused

Expected Result Managers and Administrators can tune deadline reminders without code changes: switch them on or off, choose the defaults for new tasks and the overdue frequency, and decide whether reminders also arrive in TaskFlow Mail.

6. Business Rules

ID	Rule	Applies to
BR-REM-01	Reminder settings are organization-wide; there is no personal or team version.	SCREEN 1
BR-REM-02	The first reminder must come earlier (more days before the deadline) than the second reminder.	SCREEN 1
BR-REM-03	The first reminder is 1–30 days before the deadline; the second is 0–30 days (0 = deadline day). The screen offers 3/2/1 and 1/0.	SCREEN 1
BR-REM-04	Default values are reminders on, deadline-day on, 2 days, 1 day, every day, Mail on – the original BRD default schedule.	SCREEN 1, reminder engine
BR-REM-05	Changed defaults apply to new tasks only; existing tasks keep the days they were created with.	SCREEN 1, Create Task
BR-REM-06	Bell reminders are always created when reminders run; Mail delivery only adds a copy.	SCREEN 1, reminder engine
BR-REM-07	The timezone is never changed on this screen.	SCREEN 1

Global rules that apply (see overall BRD section 6): reminder settings must be configurable; completed and cancelled tasks receive no further reminders; duplicate reminders are prevented; one application timezone is used for deadline comparisons.

7. Non-Functional Requirements

ID	Category	Requirement	Measure / target
NFR-REM-01	Performance	The screen loads and saves under normal office use without noticeable delay	As the global performance NFR in the overall BRD
NFR-REM-02	Security	Access is checked on every request, not only by hiding the menu	Requests without `settings.reminders.manage` are refused
NFR-REM-03	Usability	Each switch and list has a plain hint; errors appear next to the field	Every control on the screen has a hint text
NFR-REM-04	Reliability	Saved settings take effect without restart and survive restarts	New values used from the next reminder run (every 60 seconds by default)

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Category	Requirement	Measure / target
NFR-REM-05	Reliability	Missing settings never stop reminders	Defaults are used when a value is missing; missing values are filled at start without overwriting saved ones
NFR-REM-06	Maintainability	Reminder configuration is kept apart from the reminder engine	Engine reads the configuration; the screen never generates reminders
NFR-REM-07	Compatibility	Works in current desktop browsers with a responsive layout	As the global compatibility NFR
NFR-REM-08	Accessibility	Switches and lists are usable by keyboard and labelled	All controls have visible labels

8. Data Requirements

Entity / data set	Purpose	Key fields	Retention / rules
Reminder settings (organization-wide)	Configure automatic reminders	Reminders on/off, deadline-day reminder on/off, default first reminder days, default second reminder days, default overdue frequency, Mail delivery on/off	One value per setting; last changed by and at are kept; values missing at start are filled with defaults, saved values are never overwritten
Application timezone (read only here)	Show which calendar day a reminder belongs to	Timezone name	Owned by Application Settings
Task reminder days (per task)	The days actually used for a task	First, second, overdue frequency	Copied from the defaults when the task is created; owned by Task Management

9. Integrations & External Dependencies

System / service	Purpose	Required?	Notes
Reminder engine (Notification sub-module)	Reads the switches and Mail choice on each run	Required	When reminders are off, the whole run generates nothing
TaskFlow Mail (internal)	Receives reminder copies when Mail delivery is on	Optional	Internal mailbox; no external email service
Task Management	Uses the defaults for new tasks	Required	Existing tasks unaffected
Application Settings	Supplies the timezone and the in-app notifications switch	Required	In-app switch off stops all new bell notifications

No external system is involved.

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

10. Reporting Requirements

Not applicable for this sub-module.

11. Recommended Technology Stack (optional)

Not applicable for this sub-module. The technology stack is given in the overall BRD.

12. Assumptions, Constraints & Dependencies

Type	Description
Assumption	One organization per installation, so one set of reminder settings.
Assumption	Managers keep `settings.reminders.manage` as granted by default; an organization may change this on Role Configuration.
Constraint	The screen offers fixed choices (3/2/1 days, 1/0 days, daily/weekly).
Dependency	The reminder engine (Notification) and Create Task (Task Management) read these settings.
Dependency	The application timezone is maintained on Application Settings.

13. Risks

ID	Risk	Impact	Likelihood	Mitigation
R-REM-01	Reminders are switched off by mistake and nobody is reminded	High	Low	Hint "When off, no reminders are generated for any task."; access limited to `settings.reminders.manage`
R-REM-02	Mail delivery off here and in-app notifications off on Application Settings, so reminders reach nobody	High	Low	Hints on both screens explain the effect
R-REM-03	Users expect existing tasks to follow new defaults	Medium	Medium	Hint "Existing tasks keep the intervals they were created with."
R-REM-04	No history of earlier values, so a wrong change is hard to trace	Low	Medium	Last editor and time are recorded

14. Acceptance Criteria

ID	Criterion	Verified by
AC-REM-01	An Administrator or Manager opens Reminder Settings and sees the current configuration and the timezone.	SCREEN 1, REQ-REM-01, REQ-REM-10

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

ID	Criterion	Verified by
AC-REM-02	With **Send deadline reminders** off, no reminder is generated for any task.	REQ-REM-02, REQ-REM-03
AC-REM-03	With the deadline-day switch off, no "due today" reminder is generated; other reminders still are.	REQ-REM-04
AC-REM-04	After saving 3 days / 1 day / every week, a new task starts with these values and an older task keeps its own.	REQ-REM-05, REQ-REM-06, REQ-REM-07, REQ-REM-15, REQ-REM-16
AC-REM-05	With Mail delivery on, a reminder appears under the bell and in the recipient's Mail inbox; with it off, only under the bell.	REQ-REM-08, REQ-REM-09
AC-REM-06	Saving first = 1 day and second = 1 day is refused with "The first reminder must come earlier than the second reminder."	REQ-REM-11, REQ-REM-12
AC-REM-07	A save with a value missing is refused.	REQ-REM-13
AC-REM-08	On a new installation the screen shows on / on / 2 days / 1 day / every day / Mail on.	REQ-REM-14
AC-REM-09	A saved change is used by the next reminder run without restarting the application.	REQ-REM-17
AC-REM-10	A successful save shows "Reminder settings saved" and records the editor and time.	REQ-REM-18, REQ-REM-19
AC-REM-11	An Employee does not see the menu item, is returned to the dashboard from the address, and a direct request is refused.	REQ-REM-20, REQ-REM-21
AC-REM-12	A value saved outside the fixed choices (for example 5 days) is still displayed.	REQ-REM-22

15. Requirements Traceability Matrix

Objective	Business rule(s)	Screen(s)	Functional requirement(s)	Acceptance criterion
OBJ-REM-01	BR-REM-01, BR-REM-05, global rules	SCREEN 1	REQ-REM-01, REQ-REM-05, REQ-REM-06, REQ-REM-07, REQ-REM-10, REQ-REM-15, REQ-REM-16, REQ-REM-17, REQ-REM-22	AC-REM-01, AC-REM-04, AC-REM-09, AC-REM-12
OBJ-REM-02	BR-REM-04, BR-REM-06, global rules	SCREEN 1	REQ-REM-02, REQ-REM-03, REQ-REM-04, REQ-REM-08, REQ-REM-09, REQ-REM-14	AC-REM-02, AC-REM-03, AC-REM-05, AC-REM-08
OBJ-REM-03	BR-REM-02, BR-REM-03, BR-REM-07, global rules	SCREEN 1	REQ-REM-11, REQ-REM-12, REQ-REM-13, REQ-REM-18, REQ-REM-19, REQ-REM-20, REQ-REM-21	AC-REM-06, AC-REM-07, AC-REM-10, AC-REM-11

16. Project Deliverables

#	Deliverable	Format
1	Reminder Settings screen and its saving logic	Source code in the repository
2	Default reminder settings created on first start	Initialization at application start

© 2026 Jojo George. All rights reserved. · jojogeorge3344@gmail.com

#	Deliverable	Format
3	BRD, FRD, HLD and LLD for Reminder Settings	Markdown
4	Unit and integration tests for reminder settings	Automated tests

17. Glossary

Term	Meaning
First reminder	Reminder sent a number of days before the deadline (default 2)
Second reminder	Later reminder, 1 day before or on the deadline day (default 1 day before)
Deadline-day reminder	"Due today" reminder on the deadline day while the task is open
Overdue frequency	How often reminders repeat after the deadline: every day or every week
Bell notification	In-app notification shown in the Notification Center
TaskFlow Mail	The internal mailbox inside TaskFlow; reminder copies arrive from "TaskFlow"
Application timezone	The one timezone that decides which calendar day a deadline falls on
Recipient	The assignee, the task creator or an additional recipient of a task

18. Project Summary

Reminder Settings gives Administrators and Managers one organization-wide place to control TaskFlow's automatic deadline reminders: switch them on or off, keep or skip the deadline-day reminder, choose the default days for new tasks and the overdue frequency, and add a copy to TaskFlow Mail. Values are checked on the screen and again when saved, take effect on the next reminder run, and never change existing tasks.
